

POOJAN PATEL

Software Engineer

+1 (262) 612-6201 | poojanpatel3202@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with professional experience designing and delivering scalable, cloud-native backend systems and secure REST API using Java and Spring Boot on AWS. Hands-on experience with microservices, event-driven architectures, database optimization, and CI/CD automation in high-availability environments. Background includes internship-to-contract progression, strong collaboration in Agile teams, and exposure to data preprocessing and AI-driven backend workflows. Proven ability to build reliable, secure systems that support real-time, business-critical applications.

CORE SKILLS

Programming Languages: Java, Python, TypeScript

Backend Frameworks: Spring Boot, Spring MVC, Spring Security

API & Integration: REST API, OAuth2, JWT, JSON, Swagger/OpenAPI

Cloud Platforms: Amazon Web Services (AWS)

AWS Services: ECS, EKS, EC2, Lambda, SQS, Step Functions, RDS, DynamoDB, S3

Databases: PostgreSQL, Amazon RDS, DynamoDB

Architecture & Design: Microservices, Event-Driven Systems, Distributed Systems

Security: Authentication & Authorization, OAuth2, JWT, MFA

AI / Data Exposure: Data Preprocessing, Feature Engineering (basic), Machine Learning (foundational), Model Evaluation

CI/CD & DevOps: GitHub Actions, Jenkins, Docker, CI/CD Pipelines

Frontend & UI (Integration): React, TypeScript

Automation Tools: n8n

Testing & QA: Unit Testing, API Testing, Debugging

Development Practices: Agile/Scrum, Code Reviews, Sprint Planning

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Software Developer

Jan 2025 – Present

Careyou Pharmacy

United States

- Led end-to-end backend development as part of a two-engineer team, owning design, implementation, deployment, and support.
- Designed and implemented secure REST API using OAuth2, JWT, and MFA, strengthening authentication flows and reducing security incidents by 60%.
- Built event-driven backend workflows using AWS Lambda, SQS, and Step Functions to support real-time prescription processing with 99.9% system availability.
- Optimized PostgreSQL schemas, indexing, and queries to improve system throughput by 35% during peak usage.
- Owned CI/CD pipelines using GitHub Actions and Jenkins, improving deployment speed and reducing rollback incidents by 20%.
- Worked closely with frontend engineers to integrate backend APIs with React/TypeScript dashboards, reducing operational errors by 40%.

Software Developer (Intern)

Sept 2024 – Dec 2024

Careyou Pharmacy

United States

- Assisted senior developers in building and testing Spring Boot REST API for internal pharmacy systems.
- Learned and applied core AWS services (EC2, RDS, S3, Lambda) while supporting cloud-based backend components.
- Performed basic data preprocessing and validation tasks to support early automation and AI-related experiments.
- Helped document API endpoints, system workflows, and deployment steps to improve team knowledge sharing.
- Supported QA and debugging efforts by reproducing issues, writing test cases, and validating fixes.
- Participated in sprint planning, code reviews, and team stand-ups to gain hands-on experience with Agile development practices.

EDUCATION

Master of Science in Computer & Information Science

Dec 2024

University of Wisconsin – Parkside

Kenosha, WI

PROJECTS

Yoga Pose Detection System (Deep Learning & Backend)

Python, TensorFlow, OpenCV, AWS

- Developed a computer vision-based deep learning model to classify yoga poses from images and video streams.
- Performed data preprocessing, augmentation, and model training using TensorFlow and OpenCV to improve accuracy.
- Exposed inference results via backend APIs, enabling real-time pose feedback and analytics dashboards.

E-Commerce Platform Modernization

React, Node.js, PostgreSQL, AWS, Docker.

- Modernized a legacy platform by rebuilding backend APIs and frontend UI, reducing page load times by 40%.
- Deployed containerized services using Docker and AWS infrastructure.
