Professional Summary

Full-Stack Developer with 5+ years of experience specializing in modern React/Next.js frontends and .NET backends. Expert in building Web3 interfaces with Solidity, wallet integration, and multi-chain operations. Proven ability to lead the development of full-stack applications from concept to deployment, delivering scalable and user-centric solutions.

Skills

- Languages: JavaScript, TypeScript, C#, SQL, Solidity
- Frontend: Next.js, React.js, Redux, Tailwind CSS, HTML5, CSS3
- Backend & APIs: ASP.NET Core, .NET, Entity Framework, REST APIs, JWT
- Web3/Blockchain: Solidity, Web3.js, Ethers.js, MetaMask, WalletConnect, ERC-20, EVM
- Databases: SQL Server, PostgreSQL, SQLite
- Tools: Git, GitHub, Agile Methodologies

Professional Experience

Full Stack Developer | Byteflow Tech | Nigeria | Feb 2024 – Present

- **Led** the end-to-end development of a full-stack real estate application using **Next.js** and **.NET APIs**, facilitating online resident dues payment and streamlining estate onboarding.
- **Developed** the SERVICOM admin portal with **role-based access control**, improving complaint resolution workflows for government agencies (MDAs).
- **Built** responsive admin dashboards providing real-time analytics on reports and surveys, enhancing administrative decision-making.

ASP.NET Core Web API Tutor | Digital Bright Institute | Abuja, Nigeria | Sep 2023 (1-month contract)

- **Designed and delivered** a comprehensive curriculum on C#, OOP, and building secure RESTful APIs with **ASP.NET Core** and **Entity Framework**.
- **Guided** students through implementing **JWT authentication**, enabling them to build and secure functional backend systems.

Frontend Engineer | Stellus (Remote) | Jun 2024 – July 2025

- **Engineered** a Web3 user interface enabling users to connect wallets, deploy ERC-20 contracts, and manage smart assets, supporting multi-chain deployments for broader accessibility.
- **Implemented** secure wallet authentication (MetaMask, WalletConnect) and built dynamic dashboards with **Next.js**, **TypeScript**, and **Tailwind CSS** to display real-time transaction histories fetched from the blockchain.
- **Collaborated** with backend and smart contract teams to ensure seamless integration with EVM-compatible networks, enhancing application reliability and user experience.

Backend Developer (C#/.NET) – Solar Power Plant Project | Freelance | Sept 2022 – Jun 2023

- **Architected and built a .NET Web API** to collect and record solar plant performance metrics into an SQL database.
- **Implemented** an automated alert system for equipment failures, enhancing system reliability through robust exception handling.

Frontend Web Developer | Atoovis | Feb 2021 – May 2022

- **Contributed to an Agile team** in building a full-featured e-commerce platform, developing key features for buying, selling, and vendor operations.
- **Optimized** responsive UI components for product listings and checkout, improving cross-device user experience.
- **Managed** application state efficiently using **Redux Toolkit**, ensuring data consistency and simplifying debugging.

Education

Bachelor of Engineering, Computer Engineering | Afe Babalola University | 2018 – 2023

Licenses & Certifications

JavaScript Algorithms and Data Structures | freeCodeCamp
