

Vamsi Krishna

SQL/BI Developer

+1(662)-631-4649

cvamsikrish167@gmail.com

Professional Summary:

Highly accomplished **SQL / Power BI Developer / BI Engineer** with 5 years of experience designing, developing, and optimizing **enterprise BI solutions** across Healthcare, Finance, Managed Care, and Operations. Expert in transforming complex datasets into actionable insights, delivering **high-impact dashboards, KPI scorecards, forecasting reports, and ad-hoc analyses** to drive strategic decisions, improve operational efficiency, and reduce costs. Skilled in **Power BI, SSRS, SSAS, DAX, Power Query, Excel BI, Python, Spark, Databricks, Snowflake, SQL Server, SSIS, ADF, DataStage**, and cloud-based data integration and analytics.

Key Highlights:

- Delivered **45+ interactive dashboards, KPI scorecards, and operational analytics**, improving decision-making and KPI visibility by 30%+.
- Designed and optimized **enterprise ETL pipelines** using **SSIS, ADF, and DataStage** with robust error handling, logging, and performance tuning.
- Built **scalable Star/Snowflake data models, semantic datasets, and reusable dashboards**, improving reporting efficiency and data integrity.
- Implemented **data governance, validation frameworks, and metadata standards**, ensuring compliant and reliable reporting.
- Conducted **ROI analysis, cost optimization, and predictive modeling support**, enabling strategic business decisions.
- Collaborated cross-functionally in **Agile environments**, translating business requirements into high-value BI solutions.

TECHNICAL SKILLS:

- **Business Intelligence & Analytics:** Power BI (Desktop, Service, Gateway), DAX, SSRS, SSAS, Tableau, OBIEE, Power Query, Power Pivot, Excel BI (Pivot Tables, Power Query, Power Pivot)
- **ETL / Data Integration:** SSIS, Azure Data Factory (ADF), DataStage, Alteryx, Knime, DTS, Snowpipe, Database Migration Assistant (DMA), SQL Server Migration Assistant (SSMA)
- **Languages & Querying:** SQL, T-SQL, PL/SQL, Python (Pandas), Spark, PySpark, MDX, Visual Basic
- **Cloud & Databases:** Azure SQL Database, Databricks, BigQuery, Snowflake, SQL Server (2008–2019), Oracle, MS Access, MySQL
- **Data Modeling & Warehousing:** Star Schema, Snowflake Schema, ER Modeling, Facts & Dimensions, Operational Data Store (ODS), Semantic Models, Normalization/Denormalization
- **Reporting & Analytics:** KPI scorecards, financial dashboards, interactive dashboards, ad-hoc reporting, ROI analysis, drill-down, parameterized, and map reports
- **Performance & Optimization:** Query tuning, indexing, execution plan analysis, CTEs, stored procedures, views, triggers, UDFs, Database Engine Tuning Advisor
- **Version Control & Workflow:** Git, Azure DevOps, TFS, Jenkins, SVN, VSS, JIRA, Visio, SharePoint, ServiceNow, Agile/Scrum
- **Other Skills & Tools:** Data Governance, KPI frameworks, data validation, microservices architecture, REST/SOAP APIs, SOLID principles, design patterns (MVVM, DI, Singleton), UML, Windows 10/11, MS Office Suite, Red Gate, DbForge, Notepad++, WinMerge

PROFESSIONAL EXPERIENCE:

Client: Molina Healthcare, CA

Date: Aug 2024 to Present

Role: SQL/Power BI Developer

Responsibilities:

- **Designed and developed 25+ interactive Power BI dashboards and financial scorecards**, delivering **real-time insights** that **accelerated decision-making** across key business units. This initiative led to more data-driven decisions, contributing to a **15% improvement in operational efficiency**.
- **Engineered and optimized SSIS ETL workflows**, integrating data from **Excel, Salesforce, Intacct, and SQL Server**; **migrated SSIS packages from SQL 2014 to SQL 2022**, improving **execution performance by 35%** and reducing **data processing times** for critical reports by **50%**.
- **Built ADF pipelines** for data migration and modernization, implementing **incremental loads** and **metadata-driven patterns** to improve **data processing efficiency** and enable more timely access to business-critical data.
- **Authored and optimized T-SQL scripts**, implementing **indexing, query tuning, and temporary tables**, achieving a **40% improvement in query performance**, significantly speeding up **data retrieval** and enhancing **report generation** time for stakeholders.
- Developed **validation frameworks** aligned with **enterprise data governance**, ensuring **data integrity** and reducing **data discrepancies** by **25%**, resulting in more reliable reporting and decision-making processes.
- Created and maintained **SSRS 2022 reports** and **Power BI Service** solutions (e.g., **RLS, subscriptions, and data gateways**), which automated **weekly reporting cycles** and decreased manual intervention by **50%**, freeing up team resources for strategic projects.
- Performed **ROI, cost, and performance analysis**, consolidating **clinical, financial, and productivity data** into intuitive Power BI dashboards, enabling cross-functional stakeholders to **reduce operational costs by 10%** through better resource allocation.
- Collaborated with **Snowflake, IBM DataStage, Knime, and Alteryx**, optimizing **cloud data warehousing**, improving data pipeline reliability, and facilitating secure BI access via **SharePoint Online**, enabling better collaboration and **data accessibility** across departments.

Environment: Power BI, SSRS 2022, SQL Server (T-SQL), SSIS, ADF, Snowflake, IBM DataStage, Knime, Alteryx, Excel, Salesforce, Intacct, SharePoint Online, Power BI Service (RLS, subscriptions), Metadata & Governance frameworks

Client: Evernorth Health Services, Remote

Date: May 2020 to July 2023

Role: SQL BI Developer

Responsibilities:

- **Designed and developed Power BI and SSRS dashboards**, KPI scorecards, and financial/claims analytics, standardizing **data models** and enhancing **data visualization** to improve reporting efficiency, reducing development time by **20-30%**.
- **Developed complex T-SQL scripts**, stored procedures, **user-defined functions (UDFs)**, and **common table expressions (CTEs)** for advanced **data transformations**, validations, and reporting. Optimized **queries and indexing** to boost system performance by **35%**.
- Built and maintained robust **SSIS ETL frameworks** and **Azure Data Factory (ADF) workflows** with **incremental data loading, metadata-driven logic, and automated error handling**, integrating data from diverse sources (SQL Server, flat files, XML, Excel, Access).
- Designed and managed **Star/Snowflake data warehouse schemas, dimensional models, and semantic models** to support **analytical reporting, predictive analytics, and data mining**, enhancing **business intelligence** and reporting performance.
- Executed **data validation, reconciliation, and QA testing**; implemented **data governance and compliance frameworks** to ensure **data accuracy and regulatory compliance** across BI environments.
- Automated **BI workflows**, report generation, and **data refresh schedules** via **Power BI and SSRS**, cutting manual processes by **50%** and optimizing reporting efficiency.
- Delivered actionable **ROI analysis, cost modeling, and operational forecasting** for Finance, Operations, and Managed Care teams, driving **data-driven decision-making** and improving operational outcomes.
- Utilized **TFS and Git** for version control and collaboration within **Agile/Scrum** teams, ensuring **iterative delivery**, efficient project management, and **timely updates**.

Environment: SQL Server (2019/2016/2014), SSIS, SSRS, Power BI, T-SQL, DAX, Azure SQL, Azure Data Factory (ADF), Git, TFS, Agile, ETL, Data Warehousing, Data Integration, Data Governance, Reporting Automation, Business Intelligence

EDUCATION: Master's in Computer Science - Southeast Missouri State University
