WORK EXPERIENCE

Software Engineer Contractor Microsoft

Aug 2025 — Present
Remote

- Integrated Microsoft Copilot and agentic LLM-driven features into the global Dynamics 365 Sales Insights platform, enabling intelligent sales recommendations and AI-powered workflow automation used by 500,000 organizations worldwide
- Refactored and modularized a large Copilot service written in C# and .NET 8, eliminating redundant logic, and cutting Azure DevOps CI/CD pipeline runtimes by over 20%, improving developer productivity across 50+ international teams
- Implemented Roslyn analyzers and automated C# code-fix providers to enforce coding standards and detect logic issues at compile time, reducing deployment defects and saving 150+ developer hours per quarter through reliable releases

Middle Backend Engineer TBC Bank

May 2025 — Aug 2025
Remote

- Designed and built the backend infrastructure for TBC Capital investment platform using C# and .NET microservices, enabling secure trading and portfolio management for 100,000+ active users with real-time access to the US stock markets
- Developed and maintained the Autopilot Bot, an automated trading engine executing trades using predefined strategies, enabling new investors to trade confidently, while increasing platform engagement and generating new revenue streams
- Collaborated with cross-functional teams of analysts, DevOps engineers, and backend developers in an Agile environment using Azure DevOps, Git, and CI/CD pipelines, ensuring timely delivery of investment features aligned with business KPIs

Software Engineer Saatec Limited

Sep 2023 — May 2025
Hybrid

- Led the end-to-end development of a high-traffic e-commerce and retail management platform built with C# and .NET, serving 10,000+ daily users with minimal latency and through optimized database queries and in-memory caching strategies
- Identified and resolved a critical, long-standing backend defect in the ordering module built with ASP.NET Core and Razor Views, restoring full functionality, increasing conversion rates, and driving company's rapid revenue growth
- Migrated a 20+ year-old legacy system components to modern .NET Core, leading to a 75% improvement in performance

Assistant Professor Kutaisi International University

Aug 2023 — Jul 2025
On-site

- Teaching Algorithms and Data Structures, Theory of Computation, Linear Algebra, Discrete Probability courses
- Leading seminars and problem solving sessions, including tasks from the competitive programming club and ICPC finals

SKILLS

- **Languages:** C#, Go, Javascript, Python, Java, SQL, C++, Ocaml, Bash
- **Technologies:** .NET, Azure (Functions, App Service, Service Bus, DevOps, Key Vault, Cosmos DB), Docker, Entity Framework Core, Kubernetes, RabbitMQ, Apache Kafka, Redis, GraphQL, gRPC, REST APIs, PostgreSQL, SQL Server, MySQL, MariaDB, MongoDB, Git, CI/CD, SonarQube, AI and LLM Tools
- **Software Engineering & Architecture:** Object-Oriented Programming (OOP), Design Patterns, Microservices, Modular Monoliths, Event-Driven Architecture, SOLID Principles, Clean Architecture, CQRS, Distributed Systems, Refactoring, Agile

EDUCATION

Kutaisi International University

Bachelor's of Science, Computer Science

Georgia
Sep 2022 — Present

- **GPA:** 3.8 | Featured on Dean's List for outstanding academic performance; Recipient of National Scholarship, University Scholarship, and Mikheil Jincharadze Scholarship for exceptional achievements; Winner of KIU Summer School 2023
- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Distributed Systems, Relational & NoSQL Databases, Operating Systems, Computer Architecture, Numerical Programming, Deep Learning, Applied LLM Systems
