(812) 665-4072 | mrajasekhar245@gmail.com | Terre haute, Indiana | LinkedIn

SUMMARY

Supply Chain Analyst with 4+ years of experience in demand forecasting, inventory optimization, and supply planning. Skilled in Python, SQL, Power BI, Tableau, SAP, and Oracle NetSuite for data-driven decisions. Proven in reducing costs, improving forecast accuracy, and enhancing warehouse and vendor performance. Expertise in process improvement, KPI monitoring, and cross-functional collaboration to drive operational efficiency and supply chain excellence.

TECHNICAL SKILLS

Supply Chain & Operations Management: Demand Forecasting, Inventory Optimization, Supply Planning, Material Requirements Planning (MRP), Production Scheduling, Order Fulfillment, Procurement Support

Data Analysis & Reporting: SQL, Python (pandas), Power BI, Tableau, Excel (Power Query, Pivot Tables, Advanced Analytics), KPI Dashboard Development, Data-Driven Decision Making

Logistics & Distribution: Route Optimization, Freight Cost Reduction, Distribution Network Planning, Load Utilization, Warehouse Coordination, Third-Party Logistics (3PL) Management

ERP & Tools: SAP (MM & PP Modules), Oracle NetSuite, Advanced Excel Modeling, Data Validation, Master Data Management

Forecasting & Planning: Statistical Demand Forecasting, Capacity Planning, Safety Stock Optimization, Forecast Accuracy Analysis, Scenario Planning

Process Improvement: Process Flow Documentation, Continuous Improvement, Cost Optimization, Lead Time Reduction, Root Cause Analysis

Vendor & Stakeholder Management: Supplier Performance Evaluation, Vendor Negotiations, Cross-Functional Collaboration with Procurement, Manufacturing & Logistics Teams

Performance Metrics & KPIs: Forecast Accuracy, Inventory Turnover, On-Time Delivery, Production Throughput, Supplier Reliability, Cost Efficiency

EXPERIENCE

Supply Chain Analyst | Watsco, USA

Feb 2025 – Present

- Enhanced forecast accuracy by 15% through statistical demand modeling in Python and Excel, enabling more precise supply planning for high-demand HVAC product lines.
- Reduced excess inventory by 12%, cutting \$1.2M in annual holding costs across 5 regional warehouses while maintaining 98% service level.
- Streamlined reporting and decision-making by 20% via KPI dashboards in Power BI and Excel, improving visibility into on-time delivery, inventory turnover, and supplier performance.
- Improved production scheduling efficiency and reduced lead times by 10% by implementing integrated supply plans across procurement, manufacturing, and logistics teams.
- Minimized stockouts by 7% and boosted cross-functional workflow efficiency by optimizing MRP processes in SAP MM/PP modules.

Supply Chain Analyst | Dixon Technologies, India

Jun 2020 - Jul 2023

- Increased inventory turnover by 18% through statistical demand forecasting and capacity planning across multiple fulfillment centers using Python and Excel.
- Achieved 95% on-time supplier delivery, reducing procurement delays by 12% through proactive vendor management and performance tracking.
- Accelerated decision-making by 25% with Power BI and Tableau dashboards, monitoring forecast accuracy, inventory, and fulfillment KPIs in real-time.
- Boosted warehouse throughput by 15% and improved load utilization by 10% via optimized production scheduling and order fulfillment strategies.
- Reduced transportation costs by 7% by coordinating route optimization and freight planning with logistics teams and 3PL partners.
- Ensured 98% ERP master data accuracy through meticulous MRP support, data validation, and supply planning in Oracle NetSuite.
- Shortened average lead times by 12% and enhanced operational efficiency by implementing process improvements and documenting supply chain workflows.

EDUCATION

Master of Science in Computer Science | Indiana State University, Terre Haute, IN, USA

May 2025
