Full-Stack Developer | Software Solution Specialist

Versatile and entrepreneurial Software Developer with 8+ years of experience spanning full-stack, mobile, and backend development. Adept at leading projects end-to-end, from product conception to deployment, across diverse industries including hospitality, fashion, and fintech. Proven ability to architect scalable applications, optimize system performance, and drive product innovation. Technically proficient in Flutter/Dart, Firebase, Java, JavaScript, Python, and cloud architecture, with additional strengths in project management, cross-functional collaboration, and product ownership. Equally comfortable coding solo or leading agile teams through complex builds, client interactions, and long-term technical planning.

Skills

Technical Skills

- **Programming:** Advanced in Java (8+ years); proficient in HTML, CSS, JavaScript/Typescript, Python, Scala, C, C++, C#. Experienced in React, React-Native, Flutter/Dart, Vue.js Processing and GDScript.
- **Development:** Backend, frontend, and full-stack development experience. Experience in front-end web and mobile app development using React, React-Native, and Flutter/Dart. Deep understanding of Agile/Scrum methodologies.
- **DevOps:** Skilled in Github Actions, Jenkins, AWS, Heroku, and Spring Boot.
- **Database:** Proficient in Firebase Realtime DB, MongoDB, MySQL, and PostgreSQL.
- **Data Analytics:** Experience with Python data science libraries and advanced Excel.
- **AI/ML:** Experience in building custom GPTs and Linear Regression Models.

Jake Herman

Design and Communication

- **Product & Architecture:** Strong ability to understand and define stakeholder needs to then determine and leverage proper technologies for designing and providing an exceptional solution.
- **UX Design:** Understanding of UX principles to enhance usability and engagement.
- **Graphic Design:** Experienced with Photoshop and Canva.
- **Copywriting:** Skilled in creating engaging content and clear messaging.
- **Technical Writing:** Proficient in documenting complex software processes, user stories, feature definitions, etc.

Professional Skills

- **Problem-Solving:** Strong analytical skills and logical reasoning.
- **Product Management:** Experienced in leading product lifecycle processes with a focus on user-driven design.
- **Leadership:** Proven ability to manage cross-functional teams in Agile environments

Professional Experience

IntraNext Systems · Parker, CO

June 2025 - Present

Software Developer Contractor

As a full-stack developer, I contributed to both internal tools and customer-facing products using C#/.NET and Vue.js, handling new feature development, bug fixes, and performance improvements. I helped build a Windows-based socket client/server softphone using SIP, enabling real-time call interactions within a plugin architecture for call center environments. Additionally, I helped develop a web-based health monitoring application for tracking the status of client servers and services, as well as a supervisor dashboard for live agent oversight, which included call statistics, screen viewing, and real-time audio monitoring using WebRTC. My work spanned backend services, frontend interfaces, and API integrations, all within an agile team committed to delivering scalable and reliable solutions.

Jake Herman

Freelance Software Consultant/Developer · Denver, CO

Oct. 2024 - June 2025

Worked on multiple client projects in a range of capacities—from Lead Software Developer and Technical Consultant to Project Manager—providing end-to-end solutions across web and mobile platforms. Notable projects:

- **Luxury Hotel Loyalty Platform:**

- Served as Lead Full-Stack Developer for a custom-built web and mobile platform focused on hotel booking and rewards management.
- Designed and implemented full system architecture from scratch.
- Developed cross-platform front-end in Flutter/Dart.
- Engineered backend infrastructure using Firebase (Firestore, Cloud Functions, Hosting, and Authentication).
- Integrated Google Maps and Places APIs to support geo-aware hotel search and dynamic listings.
- Built custom endpoints to support user loyalty tracking, booking logic, and real-time interactions.

- **Fashion Boutique E-commerce Platform:**

- Led development of a custom e-commerce solution for a boutique fashion retailer, including both customer-facing storefront and internal admin management portal.
- Designed and built mobile-responsive web and mobile apps using Flutter/Dart.
- Developed Firebase backend for product catalog management, real-time order updates, and secure customer authentication, utilizing Firestore Cloud Functions, Hosting, Authentication, Storage, and Firestore.
- Created a robust Admin Dashboard for store owners to manage inventory, fulfill orders, and analyze performance metrics.
- Integrated Stripe APIs to enable secure payments, customer billing, and seller account management.

Groth, LLC · Denver, CO

Nov. 2022 - May 2024

Technical Co-founder, Software Solution Specialist

Co-founded the fin-tech startup, Groth, LLC, a personal finance app. Prototyped the MVP using React-Native. After receiving initial funding, hired a development & design team to build the app in which our tech-stack included Flutter/Dart, MongoDB, Heroku, AWS, Plaid, and

Jake Herman

Twilio. Wore many hats including that of Solutions Architect to define the overall business and system logic, Product Manager/UX Designer for defining product roadmap and optimal usability, General Manager for overseeing the product, development, and marketing teams, and even Marketer/Content Creator for user growth and acquisition as well as fundraising. Bootstrapped the app to launch in Apple App and Google Play stores in May 2023. The app has reached several thousand downloads, and social media presence has achieved over 319k views across TikTok, Facebook, Instagram, and YouTube.

Xactly Corp · Denver, CO
