

Mustafa Hussain Shaik

Java Developer

IL | 501-387-0804 | shaikmustafa.h@gmail.com | [LinkedIn](#)

SUMMARY

Java Developer with 4 years of experience designing and delivering scalable backend systems using Java 11, Spring Boot, Spring MVC, Hibernate, and REST APIs across enterprise and product-driven environments. Proven track record of building secure, high-performance microservices, implementing JWT-based authentication and role-based access control, and optimizing databases (PostgreSQL, Oracle, MySQL, MongoDB) to cut API latency by up to 35%. Good experience in deploying and monitoring applications on AWS (EC2, RDS, S3, CloudWatch) and automating CI/CD pipelines with Jenkins, Maven, and Docker, reducing release cycles by 40%. Strong background in microservices migration, performance tuning, and production stability, with consistent delivery in Agile Scrum teams and measurable improvements in system reliability and code quality.

SKILLS

Core Java: Java 8, Java 11, OOP Concepts, Collections Framework, Generics, Multithreading, Exception Handling
J2EE Technologies: JSP, Servlets, JDBC
Backend Frameworks: Spring, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
Web Services & Microservices: RESTful Web Services, REST APIs, JSON, XML, Microservices Architecture, API Gateway
Databases: Oracle, MySQL, PostgreSQL, MongoDB, SQL, PL/SQL, Database Design, Query Optimization
Cloud Technologies (AWS): Amazon Web Services (AWS), EC2, S3, RDS, IAM, CloudWatch
Web & UI Technologies: HTML5, CSS3, JavaScript, Bootstrap, REST API Integration
Build & CI/CD Tools: Maven, Gradle, Jenkins, CI/CD Pipelines
Middleware & Servers: Apache Tomcat, WebLogic Server
Testing: JUnit, Mockito, Postman, Unit Testing, Integration Testing
IDEs & Development Tools: Eclipse, STS (Spring Tool Suite), IntelliJ IDEA
Version Control: Git, GitHub
Project & Collaboration Tools: JIRA, Swagger (OpenAPI)
Methodologies: Agile, Scrum, SDLC
Programming Languages: Java, SQL

EDUCATION

Master of Science in Computer Science Purdue University, Indiana, United States	May 2025
Bachelor of Engineering in Computer Science and Engineering Deccan College of Engineering and Technology, India	July 2021

EXPERIENCE

ServiceNow, IL | Nov 2024 - Current | Java Developer

- Designed and developed Spring Boot-based backend services using Java 11, Spring MVC, and Hibernate to support core business workflows with clear service boundaries.
- Implemented secure authentication and authorization using Spring Security, JWT, and role-based access control, reducing unauthorized access incidents by 35%.
- Implemented asynchronous messaging using Apache Kafka and RabbitMQ to enable reliable, real-time communication between distributed microservices, improving system scalability and fault tolerance.
- Developed and consumed REST APIs using JSON and standardized response contracts, enabling reliable service-to-service communication across internal systems.
- Deployed backend services on AWS EC2 with RDS and S3 integration, leveraging CloudWatch for monitoring and improving production stability by 30%.
- Automated build and deployment workflows using Maven and Jenkins CI/CD pipelines, cutting release cycle time and manual intervention by 40%.

Fission Labs, India | Feb 2022 - July 2023 | Java Developer

- Designed and implemented scalable Java Spring Boot microservices with Hibernate and REST APIs, supporting high-volume transactional workloads with low latency and reliable service isolation.
- Optimized backend performance through SQL query tuning, indexing, and caching strategies across Oracle, MySQL, and MongoDB, reducing critical API response times by 35%.
- Implemented Spring Security with JWT-based authentication and authorization, enforcing role-based access control and meeting enterprise security and compliance standards.
- Designed and integrated event-driven workflows using Apache Kafka and RabbitMQ, ensuring reliable message delivery, decoupled services, and efficient processing of high-volume transactions.
- Led migration of legacy monolithic components into independent microservices, cutting deployment cycles from weeks to days and improving release agility.
- Performed in-depth production issue analysis and JVM performance tuning, eliminating recurring outages, reducing memory leaks, and improving overall system stability.

Infinite Infolab, India | Aug 2020 - Jan 2022 | Associate Java Developer

- Developed and maintained backend modules using Java 8, Spring MVC, Spring Boot, and JDBC, implementing business logic, validations, and exception handling to support enterprise web applications.
- Built and exposed RESTful APIs using Spring Boot and JSON payloads, enabling seamless integration with frontend applications and third-party systems while following REST standards.
- Optimized SQL queries and PL/SQL procedures on Oracle and MySQL, reducing query execution time by 30% and improving overall application responsiveness.
- Implemented Spring Data JPA and Hibernate for ORM mapping and transaction management, reducing boilerplate data access code by 40% and improving maintainability.
- Wrote unit and integration tests using JUnit, Mockito, and Postman, increasing test coverage by 25% and reducing production defects during UAT cycles.
