

Sai Yada

Software Engineer

yadasai1118@gmail.com | +1 (774) 244-3992 | [LinkedIn](#) | [GitHub](#)

SUMMARY

- Software Engineer with strong experience designing and developing scalable, high-performance applications using **Java, Spring Boot, Python, JavaScript, TypeScript, Node.js, React.js, and Angular**.
- Skilled in building **microservices, REST/GraphQL APIs, event-driven systems**, and distributed architectures across **AWS, Azure, and GCP**.
- Experienced in **DevOps, CI/CD automation, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, ArgoCD**, and cloud-native deployment workflows.
- Proficient in **Kafka streaming, Airflow pipelines, Spark processing**, and integrating modern **Generative AI (LLMs) and RAG (LangChain)** solutions into engineering ecosystems.
- Strong in **system design, application security (OAuth2.0, JWT, IAM, OWASP)**, automated testing (JUnit, Selenium, Cypress), and performance optimization for production systems.
- Collaborative engineer with proven experience in **Agile/Scrum**, cross-functional communication, code reviews, and delivering high-quality, production-ready software.

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C#, C++, Go, Kotlin, Swift, Ruby, SQL, NoSQL, Shell Scripting

Frameworks & Libraries: Spring Boot, Django, Flask, FastAPI, Node.js, Express.js, React.js, Angular, Vue.js, Next.js, Nuxt.js, .NET Core, ASP.NET, Hibernate, JPA

Web & API Development: RESTful APIs, GraphQL, Microservices, WebSockets, gRPC, API Gateway, OAuth2.0, JWT

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, DynamoDB, ECS, EKS, CloudWatch, API Gateway), Azure (App Services, Functions, ACR, AKS, Cosmos DB, Monitor), Google Cloud (GCE, GKE, Cloud Run, BigQuery, Cloud Functions)

DevOps, CI/CD & Automation: Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD, Bitbucket Pipelines, ArgoCD, Helm, Terraform, Ansible, Kubernetes Operators, CI/CD Pipelines, SRE Practices

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, SVN, Jira, Confluence, Agile/Scrum

Databases: MySQL, PostgreSQL, Oracle, MongoDB, Cassandra, Redis, Elasticsearch, Firebase, Snowflake

Testing & Quality Assurance: JUnit, Mockito, Selenium, TestNG, Cypress, Postman, Newman, PyTest, Jasmine, Mocha, JMeter, Locust

AI, ML & Data Engineering: Generative AI (LLMs), RAG (LangChain), TensorFlow, PyTorch, Pandas, NumPy, Apache Airflow, Kafka, Spark, Data Pipelines

Serverless & Modern Architecture: Serverless Computing, Event-Driven Architecture, Service Mesh (Istio/Linkerd), Distributed Systems, Message Queues (Kafka, RabbitMQ, SQS)

Containerization & Orchestration: Docker, Docker Compose, Kubernetes, OpenShift, EKS, AKS, GKE, Container Security (Trivy, Aqua)

Security & Compliance: OWASP, IAM, SSO, SAML, SSL/TLS, API Security, Cloud Security Best Practices, Zero-Trust Security

Monitoring & Observability: Prometheus, Grafana, CloudWatch, ELK Stack, Splunk, Datadog, Dynatrace, New Relic, OpenTelemetry

Mobile Application Development: Flutter, React Native, Android SDK, iOS SDK

System Design & Architecture: Scalability, High Availability, Load Balancing, Caching Strategies, CAP Theorem, Design Patterns, Distributed Systems

Big Data & Messaging: Apache Kafka, Spark, Hadoop, Kinesis, Pub/Sub

Other Skills: WebAssembly, Edge Computing, Feature Flags, Infrastructure as Code (IaC), Automation Scripts, Cost Optimization

Soft Skills: Problem-Solving, Analytical Thinking, Communication, Cross-Functional Collaboration, Code Reviews, Leadership, Mentoring, Agile Methodologies

WORK EXPERIENCE

Intuit | USA | Software Engineer

Aug 2024 – Current

- Designed and developed scalable **microservices** using **Java, Spring Boot, RESTful APIs, GraphQL, and gRPC**, improving performance, modularity, and system reliability.
- Built end-to-end **full-stack features** using **React.js, Node.js, and TypeScript**, enhancing UI responsiveness and customer engagement.
- Deployed cloud-native applications on **AWS (EC2, Lambda, S3, RDS, DynamoDB, EKS)** using **Terraform, Jenkins, GitHub Actions**, and containerized workloads with **Docker & Kubernetes**.
- Implemented **CI/CD pipelines** with automated build, test, and deployment workflows using **GitHub Actions, GitLab CI/CD, Jenkins**, reducing release time by 40%.
- Optimized data workflows using **Kafka, Airflow, Spark**, improving event-driven processing and real-time analytics.
- Integrated **Generative AI (LLMs) and RAG pipelines** using **LangChain, Python, FastAPI**, automating code reviews and documentation generation.
- Improved observability by configuring **Prometheus, Grafana, ELK, CloudWatch**, and implemented distributed tracing with **OpenTelemetry**.
- Conducted **unit, integration, and load testing** using **JUnit, Selenium, TestNG, Cypress, JMeter**, improving test coverage by 55%.
- Followed **Agile/Scrum** methodologies, collaborating with cross-functional teams, participating in sprint planning, code reviews, and technical design sessions.
- Enhanced application **security** by implementing **OAuth2.0, JWT, IAM, SSO, OWASP**, and secure API gateway routing.

iView Labs Pvt. Ltd. | India | Software Developer

Sept 2022 - July 2023

- Developed **web and mobile applications** using **Java, Spring Boot, React.js, Angular, Flutter, and Node.js**, improving user experience and system performance.
- Built scalable **REST APIs & GraphQL APIs**, integrating caching and asynchronous communication using **Redis, Kafka, RabbitMQ**.
- Containerized services using **Docker**, orchestrated environments using **Kubernetes (AKS/GKE)**, and automated deployments with **ArgoCD & Helm**.
- Implemented **Serverless Computing** using **AWS Lambda, Google Cloud Functions**, reducing infrastructure overhead.
- Worked with **MySQL, PostgreSQL, MongoDB, Firebase**, optimizing queries and designing normalized schema for high-performance applications.
- Developed and executed **automated test suites** using **Postman, Newman, Mocha, Cypress** to ensure quality and reliability.
- Strengthened system monitoring using **Datadog, Grafana, Prometheus**, establishing alerting for production issues.
- Participated in **system design, architectural reviews, API Gateway setup, distributed systems**, and design pattern implementation.

Cognizant | India | Software Developer (Internship)

March 2022 - Aug 2022

- Assisted in developing **Java, Python, and JavaScript-based** application modules following SDLC and Agile practices.
- Built and tested backend services with **Spring Boot, Node.js**, and integrated APIs with **Postman & Swagger**.
- Implemented automation scripts and basic CI/CD tasks using **Git, Jenkins, Docker**, reducing manual deployment efforts.
- Worked on integrating **MongoDB, MySQL, and Redis** for backend data storage and performed CRUD operations.
- Wrote **unit tests** using **JUnit, Mockito**, improving code reliability and reducing defects.
- Contributed to frontend enhancements using **React.js, HTML, CSS, JavaScript**, improving UI performance.
- Assisted in monitoring and debugging using **ELK Stack & CloudWatch**, ensuring application stability.

EDUCATION

Master in Computer Science | University of Missouri Kansas City, USA

Bachelor of Technology | VNR VJIET, Hyderabad, India

CERTIFICATIONS

- Building Web Applications with Django and PostgreSQL
- Mastering PostgreSQL: The Ultimate SQL Guide for Beginners
- Mastering AWS Serverless: Hands-On with Core AWS Services
- Python & Java: Master Backend & Frontend Web Developments
- React - The Complete Guide 2025 (incl. Next.js, Redux)
- Building FullStack E-Commerce App using SpringBoot & Angular
- The Complete Jenkins DevOps CI/CD Pipeline Bootcamp

PUBLICATIONS

A REVIEW ON HASHING APPROACH USING DART FOR VIRTUAL ASSISTANT DEVELOPMENT published by Gradiva Review Journal on June 2022 DOI: 10.37897.GRJ.2021.V7I11.21.49919

ACADEMIC PROJECTS

Smart Health Record Management System

- Developed a secure health record system with **JWT authentication** and **role-based access control (RBAC)** to safeguard sensitive medical data.
- Designed and implemented **FHIR-compliant data structures** for managing patient history, prescriptions, and lab reports.
- Built RESTful APIs using **Flask** and encrypted PostgreSQL for secure communication between patients and doctors.
- Developed a user-friendly frontend with **Angular** and **Bootstrap**, featuring interactive dashboards and health trend visualizations.
- Ensured scalable, modular backend architecture and enforced strong security and data-sharing standards in healthcare.

Voice of VNR – Voice Assistant App

- Led a 4-member team to develop a voice assistant mobile application to provide college-related information.
- Designed and developed an interactive UI using **Flutter**, and integrated real-time database using **Firebase**.
- Contributed to **voice recognition logic**, enabling dynamic query resolution through speech input.
