SUMMARY

Software Engineer with 5+ years of experience designing, developing, and deploying scalable web applications, microservices, and data-driven systems. Strong background in full-stack development, cloud platforms, data engineering, and applied machine learning. Proven ability to deliver secure, high-performance solutions in Agile environments.

SKILLS

Programming Languages: Python, Java, J2EE, C, JavaScript (ES6)

Frameworks & Libraries: Spring Boot, Node.js, React, Redux, Bootstrap, HTML5, CSS3

Web & API Technologies: RESTful Web Services, OAuth2, JWT, Microservices Architecture, API Security

Databases & Data Engineering: MySQL, PL/SQL, SQL Loader, SSMS, Snowflake, ETL Processes, SSIS

Cloud & DevOps: AWS, Microsoft Azure, Google Cloud Platform (GCP), Docker, Jenkins, Git, GitHub, Maven, Gradle, CI/CD Pipelines

Machine Learning & AI: Supervised Learning, Unsupervised Learning, Neural Networks, NLP, Computer Vision, Time-Series Analysis, Image Classification

Tools & IDEs: PyCharm, Eclipse, NetBeans, Spring Tool Suite, Visual Studio, Google Colab, Postman, JIRA

Methodologies & Operating Systems: Agile, Scrum, Waterfall, SDLC, Windows, macOS, Linux

EXPERIENCE

Software Engineer

| Feb 2025 – Present

CVS HEALTH – USA

- Designed and implemented scalable microservices using Java, Spring Boot, and REST APIs, supporting enterprise healthcare platforms.
- Developed full-stack features using React, JavaScript (ES6), HTML5, and CSS3, improving application usability and performance.
- Built secure APIs using OAuth2 and JWT, ensuring compliance with internal security and data protection standards.
- Integrated cloud services across AWS and Azure, enabling high availability and fault-tolerant deployments.
- Designed and optimized ETL pipelines using Snowflake and SSIS to support analytics and reporting workflows.
- Applied machine learning techniques including classification and time-series analysis to support data-driven decision making.
- Automated builds and deployments using Jenkins, Docker, Maven, and GitHub, improving release reliability.
- Collaborated with product owners, QA, and DevOps teams in an Agile/Scrum environment to deliver sprint commitments on time.

Software Engineer Intern

| Aug 2024 – Dec 2024

KAISER PERMANENTE – USA

- Assisted in developing backend services using Spring Boot and Node.js, following microservices best practices.
- Created responsive UI components using React, Redux, and Bootstrap, enhancing user experience across applications.
- Developed and tested RESTful APIs using Postman, ensuring correctness and performance.
- Supported database operations using MySQL and PL/SQL, including data validation and optimization.
- Contributed to cloud deployments on AWS and Azure, assisting with containerization using Docker.
- Participated in code reviews, sprint planning, and daily stand-ups as part of an Agile development team.

Software Developer

| Aug 2019 – Dec 2022

COGNIZANT – INDIA

- Developed enterprise web applications using Java, J2EE, Spring Boot, and JavaScript, supporting multiple business domains.
- Designed and maintained RESTful services and backend logic for high-volume applications.
- Worked extensively with MySQL, PL/SQL, and SQL Loader for data processing and reporting.
- Built and maintained ETL workflows to move and transform data across systems.
- Implemented CI/CD pipelines using Jenkins, Git, Maven, and Gradle, improving deployment efficiency.
- Supported production systems by troubleshooting performance issues and resolving defects.
- Collaborated with cross-functional teams following SDLC and Agile methodologies.

EDUCATION

Masters in Computer & Information Science

Southern Arkansas University, USA
