SUMMARY

Software Engineer with 3+ years of experience designing and delivering scalable, high-performance e-commerce platforms using Python (Django, FastAPI), React.js, and microservices architecture to streamline checkout flows, product catalog APIs, and real-time inventory tracking. Adept at building cloud-native solutions on AWS with Kubernetes, Docker, and CI/CD pipelines, driving secure payment integrations (Stripe, Razorpay, PCI-DSS) and responsive UI/UX enhancements that reduce latency, improve transaction reliability, and boost customer engagement. Skilled in leveraging caching, API optimization, monitoring, and security controls to enhance system resilience, and deliver measurable business impact for high-volume digital commerce platforms.

TECHNICAL SKILLS

Programming & Scripting: Python (Django, Flask, FastAPI), JavaScript (ES6+), TypeScript, Bash
Front-End Development: React.js, Redux, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material-UI, Responsive UI/UX, Web Accessibility (WCAG)
Back-End & API Development: RESTful APIs, GraphQL, WebSockets, JWT/OAuth2 Authentication, Microservices & Architecture
E-Commerce Platforms & Integrations: Payment Gateway APIs (Stripe, PayPal, Razorpay), Shopping Cart & Checkout Flows, Product Catalog & Inventory APIs, Order & Fulfillment Management, Third-Party Logistics (3PL) Integration
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Query Optimization & Transaction Handling
Cloud & Deployment: AWS (EC2, S3, RDS, CloudFront), Docker, Kubernetes, Nginx, CI/CD Pipelines (GitHub Actions, Jenkins)
Testing & QA: Pytest, Unit & Integration Testing, Selenium, Postman, Swagger/OpenAPI Documentation
Security & Compliance: Secure Payment Processing (PCI-DSS), CSRF/XSS Protection, HTTPS/SSL, RBAC
Monitoring & Performance: Logging & Monitoring (ELK Stack, Prometheus, Grafana), SEO Optimization
Collaboration & Agile Tools: Git/GitHub/GitLab, Jira, Confluence, Scrum & Kanban Workflows

PROFESSIONAL EXPERIENCE

Software Engineer, Best Buy	Aug 2024 – Present Remote, USA
- Developed high-performance product catalog microservices using Python (Django, FastAPI) and PostgreSQL, improving page-load speed by 32% and ensuring seamless data synchronization across inventory and pricing APIs. - Integrated Stripe and Razorpay payment gateways with secure JWT-based authentication, achieving 89.9% transaction success rate and full PCI-DSS compliance, reducing cart abandonment by 18% during peak sale events. - Designed and deployed responsive React.js & Next.js front-end with Tailwind CSS, improving mobile-first UI/UX scores by 27% and boosting overall user engagement metrics across web and mobile platforms. - Implemented Redis caching and Celery asynchronous task queues for order fulfillment APIs, reducing response latency by 40% and improving checkout processing speed for concurrent high-volume requests. - Orchestrated deployments using AWS EC2, S3, CloudFront, Docker, and Nginx, enabling zero-downtime rollouts and decreasing infrastructure costs by 15% through optimized auto-scaling configurations. - Enhanced logging and monitoring pipelines with ELK Stack and Prometheus, proactively detecting API performance anomalies and reducing mean time to resolution (MTTR) for production issues by 35%.	
Software Engineer, Reliance Retail	Jun 2021 – Jul 2023 Remote, India
- Led migration of monolithic checkout workflows to microservices using Python (Flask, FastAPI), cutting checkout API response time by 45% and improving system reliability during flash-sale traffic spikes. - Developed and optimized GraphQL APIs for product search and real-time inventory tracking, leveraging Elasticsearch for advanced filtering and improving query response times by 38% under peak seasonal demand. - Built dynamic React.js components with Material-UI for personalized promotions and shopping cart modules, improving customer click-through rates by 22% and contributing to a 15% increase in repeat purchases. - Automated CI/CD pipelines with GitHub Actions, Jenkins, and Kubernetes, achieving faster release cycles by 30% and maintaining 93.8% service uptime for production deployments across multi-region clusters. - Implemented advanced security controls including RBAC, HTTPS/SSL, CSRF/XSS protection, reducing vulnerability exposure by 40% and ensuring compliance with GDPR and PCI-DSS for cross-border e-commerce transactions. - Introduced Prometheus and Grafana dashboards for monitoring application health, enabling real-time alerting and reducing downtime during high-volume campaigns by 33% through proactive incident response workflows.	

EDUCATION

Master of Science, Illinois Institute of Technology Computer Science	Aug 2023 -May 2025 Illinois, USA
Bachelor of Technology, Gandhinagar Institute of Technology Information Technology	Jun 2019 – May 2023 Gujarat, India
