

Khevana Pandya

Regulatory Affairs Specialist

USA | 551-298-4147 | khevanapandya1505@gmail.com | [LinkedIn](#)

SUMMARY

A highly skilled Regulatory Affairs Specialist with 3+ years of experience supporting global regulatory submissions and compliance for medical devices, combination products, and pharmaceuticals. Proven track record in preparing and managing 510(k), PMA, IDE, CE Marking, and Health Canada submissions while ensuring alignment with FDA (21 CFR Part 820), EU MDR, ISO 13485, and HIPAA standards. Adept in developing regulatory strategies, conducting risk assessments (ISO 14971, FMEA), and facilitating GCP-compliant clinical trial documentation. Experienced in using regulatory systems like Veeva Vault, MasterControl, software for submission management and audit readiness. Strong collaborator across R&D, Quality, and Clinical teams, with expertise in labeling compliance, CAPA oversight, and regulatory lifecycle management. Demonstrated ability to train internal teams on regulatory updates and inspection preparedness to ensure continuous compliance in global markets.

SKILLS

Regulatory Submissions & Strategy:	510(k), PMA, IDE, De Novo, EU MDR, MDD, CE Marking, Clinical Trial Applications, Regulatory Strategy Development, Clinical Protocols.
Compliance & Documentation:	Design History File (DHF), Device Master Record (DMR), Labeling Compliance, UDI Implementation, Change Management, Risk Management (ISO 14971, FMEA), SOP Review, Technical File Creation, Technical Writing, Document Control Systems.
Post-Market Compliance:	Complaint Handling, CAPA, Nonconformance (NC) Documentation, PMS, Vigilance, Risk Analysis (ISO 14971).
Quality Systems & Audits:	QMS (ISO 13485), 21 CFR Part 820, cGMP Compliance, Audit Readiness, Gap Analysis, CAPA, Complaint Handling, Post-Market Surveillance (PMS), Vigilance Reporting.
Tools & Systems:	Veeva Vault RIM, MasterControl, eCTD Submission Software, FDA eSubmitter, TrackWise, eQMS (Qualio, Ultralight Labs), Microsoft Office Suite (Word, Excel, PowerPoint, Teams, SharePoint), Google Workspace, MS Project.
Core Competencies:	Cross-Functional Collaboration, Project Management, Stakeholder Communication, Critical Thinking, Problem Solving, Adaptability, Attention to Detail, Teamwork.

EXPERIENCE

Regulatory Affairs Assistant | SafeBeat RX INC, USA

August 2025 – Present

- Supported **new product development** (NPD) by drafting **10 SOPs**, implementing **20+ eQMS** documents, developing internal quality records, performing **gap analysis** of standards, and assisting with validation protocol per **IEC 60601-2-25**.
- Documented **FDA submission issue request (SIR)** meeting outcomes into regulatory action plans and file updates; addressed reviewer comments with evidence-based justifications.
- Investigated **20+ NCs** and complaints with QA, supporting CAPA initiation and timely closure.
- Drafted and routed **10+ ECOs and DCOs** and participated in three design reviews, verifying V&V updates and risk files for accuracy and traceability.

Regulatory Affairs and Quality Assurance Specialist Intern | Exelint International, USA

July 2024 – January 2025

- Managed **document control lifecycle** and authored **technical documentation (DIOM Matrix, V&V Protocols)** within eQMS systems (**Qualio, Veeva**) to ensure change traceability and regulatory alignment with ISO 13485 and MDR.

- Supported both **pre- and post-market regulatory documentation** aligned with EU MDR submissions and **CE Marking** compliance, including technical file creation, and strategic regulatory assessments.
- Managed product registration on **EUDAMED** by compiling and submitting device information.
- Drafted SOPs and WIs, tracked **SOP publishing**, and **Document Change Requests** (DCRs) for controlled documents.
- Prepared device descriptions for 4 products, supporting **EU MDR technical documentation** and **notified body audits**.
- Supported **preparation for a 510(k)** by evaluating ISO and performance standards and verifying 25+ test reports.
- Performed **incoming inspection and verification** of labeling, packaging, and documentation for 10+ devices.
- Reviewed Corrective and Preventive Action (CAPA) reports and complaints to understand Quality System Regulation (QSR).
- Reviewed product labelling and IFUs for compliance with ISO 15223 requirements during document change cycles.

Regulatory Affairs Associate | HCL Tech, India

May 2021 – August 2023

- Coordinated the preparation and electronic submission of EU MDR Technical Documentation and 510(k) dossiers (eSTAR format), leveraging Veeva Vault RIM and electronic publishing tools to ensure compliance across FDA, EU, Health Canada, and other global authorities.
- Managed global labelling and artwork change control processes in compliance with country-specific medical device regulations and UDI requirements, overseeing labelling lifecycle and approval workflows in MasterControl to ensure traceability, version control, and global alignment across 20+ markets.
- Performed regulatory intelligence and gap assessments for medical device submissions in APAC and LATAM, staying current with updates from local health authorities and regulatory bodies (e.g., ANVISA, TGA, HSA), which improved market entry readiness by 35% through the development of region-specific submission strategies.
- Tracked post-market activities and lifecycle changes such as post-approval design changes, re-certifications, and field safety corrective actions (FSCAs) using Excel-based trackers and Power BI dashboards, reducing compliance risks and ensuring ongoing regulatory maintenance across diverse product portfolios.
- Collaborated with global Regulatory Affairs, Quality Assurance, and CMC teams, as well as local affiliates, to coordinate submission timelines for technical files, CERs, and risk management documents, using MS Project and Excel to ensure timely responses to regulatory queries and mitigation of non-conformities.
- Prepared and maintained inspection-ready documentation including Design History Files (DHF), Device Master Records (DMR), UDI records, change logs, and SOPs, supporting readiness for Notified Body audits, FDA inspections, and MDSAP assessments, contributing to successful outcomes with zero major observations.
- Delivered onboarding and technical training for new Regulatory Affairs staff on EU MDR technical documentation structure, Veeva Vault usage, labelling workflows, and document versioning, enhancing team efficiency and promoting regulatory compliance across global teams.
- Led process optimization initiatives that resulted in a 30% reduction in submission timelines and a 25% decrease in Health Authority query resolution times, through workflow automation, standardized templates, and strengthened cross functional communication.

EDUCATION

Master of Science, Regulatory Affairs, Northeastern University | Boston, USA

September 2023 – June 2025

Bachelor of Pharmacy, Nirma University | Ahmedabad, India

September 2019 – May 2023

PROJECT

Regulatory Affairs Associate | Neurodegenerative Disease Company, USA

- Structured **clinical validation protocol** for a Virtual Reality-based SaMD, defining endpoints and statistical methods in alignment with ICH E6(R2).

Regulatory Affairs Associate | Lighthouse XR, USA

- Developed **U.S. regulatory strategy** for a Class II SaMD by evaluating FDA pathways such as De Novo and Traditional 510(k) and conducted predicate analysis to support substantial equivalence rationale.
