

JARED PFEIFER

☎ 385-239-9700 | ✉ Pfeif11001@gmail.com | 🌐 [linkedin.com/in/jared-pfeifer-131555b1/](https://www.linkedin.com/in/jared-pfeifer-131555b1/)

PROFESSIONAL SUMMARY

Embedded Systems and Software Engineer with 8+ years' experience, including 4+ years as a Senior Engineer and 3 years in software and embedded systems. Master's in Computer Engineering with expertise spanning hardware and software, from circuit design and RTOS to full-stack development. Proficient in Python, C++, Go, Java, and SQL, with additional experience in cloud networking, app development, and automation. Multilingual in Portuguese and Spanish, skilled at bridging hardware and software teams to deliver robust solutions.

TECHNICAL SKILLS

Programming: Python, C++, C, Assembly, Go, SQL, SystemVerilog, Java

Tools: Linux, vi/vim, Nano, Docker, Bitbucket, Jira, CircleCI, CMake, Bash, CLion, PyCharm, VS Code, Android Studio

Hardware/Firmware: Circuit design, ARM Cortex firmware, real-time systems, debugging, schematics

Cloud/Networking: AWS, S3, Bluetooth, LoRa, Zigbee, Wi-Fi, Cellular

Development: App building, scripting, unit testing, automation, GUI development

Languages: Portuguese, Spanish

Certificates: Scientific Computing with Python (LinkedIn)

WORK EXPERIENCE

Embedded Systems Engineer | Speedhut – Orem, UT | Jun 2023 – Sept 2024

- Wrote C code for vehicle gauge peripherals, improving stability and accuracy
- Designed firmware for ARM Cortex processors to meet timing and control needs
- Created and debugged electrical circuits and schematics for hardware integration
- Integrated codebase into Bitbucket for version control and collaboration
- Automated device programming and testing in Python, reducing errors

Software Engineering Intern | LiveView Technologies – Orem, UT | May 2022 – Jun 2023

- Designed hardware test units to validate components and catch defects early
- Corrected bugs in Live Unit Camera software, improving reliability
- Worked with Python, C++, and SQL across development and debugging tasks
- Contributed in Agile/Scrum sprints to deliver features on schedule
- Implemented a battery reset feature, saving thousands in replacement costs

Senior Data Domain TSE | Dell EMC – Draper, UT | Feb 2018 – Aug 2022

- Supported enterprise Data Domain storage systems for reliable backup
- Debugged errors using CLI and log files to restore service
- Explained technical fixes to customer technicians, reducing escalations

Validation, Support, Lead Generation, Computer Engineering Intern | Digicert – Lehi, UT | Apr 2016 – Feb 2018

- Researched domains in databases to resolve ownership and validation issues
- Debugged new features before upgrades to prevent release regressions
- Worked with Java and SQL to support reliable development and database operations

EDUCATION

Master of Science in Computer Engineering — Brigham Young University, Provo, UT (Expected Apr 2025)

PROJECTS

- Created a command-line shell
- Programmed multiple types of data structure trees
- Designed and built a DC-DC Boost converter for charging an electronic device
- Designed and built a Bluetooth Information Relay System for remote control cars
- Engineered a hand-gesture-controlled vehicle using machine learning
- Developed a budgeting app using Java
- Researched and reported on MAC Address Derandomization Options

ADDITIONAL EXPERIENCE

- 7+ years of sole property management experience, including finance, tenant relations, and property maintenance
