

Tarun Vella

Supply Chain Analyst

Dallas, TX | Email: tarunvella1@gmail.com | Mobile: +1 469-790-2323 | LinkedIn

Summary

Supply Chain & Analytics Professional with **5 years** of experience in healthcare, IT-enabled services and global enterprises, including Elevance Health and Mphasis, specializing in demand forecasting, inventory optimization, logistics and procurement. Skilled in leveraging advanced analytics (Excel, Python, SQL), ERP systems (SAP, Oracle NetSuite) and BI tools (Power BI, Tableau) to drive data-driven decisions, reduce costs and streamline operations. Adept at implementing end-to-end supply chain strategies encompassing S&OP, vendor management, risk mitigation, last-mile fulfillment, and sustainable sourcing, while fostering cross-functional collaboration and stakeholder engagement. Experienced in applying Lean Six Sigma, agile methodologies and process automation to enhance performance and efficiency, with a passion for harnessing emerging technologies such as RPA, AI/ML and blockchain to build resilient, transparent and future-ready supply chain ecosystems.

Skills

- **Supply Chain Expertise:** Demand Forecasting, Inventory Optimization, Logistics, Procurement, Strategic Sourcing, Sales & Operations Planning (S&OP), Last-Mile Fulfillment
- **Collaboration & Management:** Cross-functional Team Collaboration, Stakeholder Engagement, Supplier Relationship Management, Change Management, Agile Methodologies
- **Technical Proficiency:** Forecasting Tools, Inventory Control Systems, MRP, RFID and Barcode Systems, Supply Chain Software
- **Analytical and Problem-Solving:** Critical Thinking, Decision-Making Abilities, Problem-Solving Skills, Root Cause Analysis
- **Project Management:** Milestone Tracking, Project Coordination, Project Planning, Task Prioritization
- **Industry Knowledge:** Compliance and Regulations, Cost Reduction Strategies, Market Research, Understanding of Industry Trends
- **Documentation and Reporting:** Dashboards and Reports, Documentation Skills, KPI Measurement, Report Generation
- **Improvement & Risk Management:** Lean Six Sigma, KPI Dashboards, Root Cause Analysis, Risk Analysis Frameworks (FMEA), Supply Chain Risk Management, Process Automation
- **Tools & Technologies:** Excel (Advanced), Power BI, Tableau, Python (Pandas, NumPy), R, SQL, SAP (MM, IBP), Oracle NetSuite, Microsoft Dynamics 365, Kinaxis, Blue Yonder
- **Process & Analysis:** Lean Six Sigma, KPI Dashboards, Root Cause Analysis, Risk Analysis Frameworks (FMEA), Supply Chain Risk Management, Process Automation

Experience

Elevance Health, USA | Supply Chain Analyst | Jul 2024 – Current

- Performed demand forecasting using Python, SQL and advanced statistical models, enabling a 15% reduction in excess medical inventory and a 25% improvement in inventory turnover, directly supporting cost optimization in healthcare operations.
- Designed and deployed Power BI dashboards for real-time KPI monitoring (inventory turnover, lead times, provider utilization and claims accuracy), leading to a 22% improvement in executive decision-making speed.
- Drove 15% cost savings in transportation and freight by evaluating carrier performance metrics, streamlining logistics operations and renegotiating vendor contracts aligned with healthcare compliance standards.
- Conducted root cause analysis on recurring supply and claims disruptions, implementing corrective actions that reduced delays by 30% and improved member service reliability.
- Spearheaded the adoption of automated inventory and procurement systems, achieving a 40% reduction in stockouts and a 30% boost in order accuracy, ensuring critical medical supplies were consistently available to providers and patients.
- Partnered with cross-functional teams (procurement, logistics, clinical operations and provider networks) to optimize healthcare supply chain workflows, decreasing lead times by 20% and improving on-time delivery rates to 95%.
- Built interactive Power BI and Tableau dashboards for executives and clinical leadership, enabling data-driven insights into claims processing, provider performance and patient service efficiency, improving decision-making by 30%.
- Applied Lean Six Sigma methodologies to healthcare operations, streamlining claims handling and supply chain processes, resulting in a 10% cycle time improvement.
- Negotiated supplier contracts and managed vendor relationships, yielding a 5% reduction in procurement costs while maintaining compliance with HIPAA and healthcare quality standards.
- Developed predictive models to forecast patient demand and claims volume, enabling proactive staffing and resource allocation across clinical and operational teams.
- Collaborated with actuarial and data science teams to analyse member health data, supporting initiatives that improved population health outcomes and reduced readmission rates.
- Enhanced regulatory compliance reporting by automating dashboards for CMS, NCQA and HIPAA requirements, reducing manual reporting effort by 35%.
- Partnered with provider networks to optimize claims processing and reimbursement cycles, reducing payment delays and enhancing provider satisfaction scores.

Mphasis, India | Supply Chain Analyst | June 2018 – Nov 2021

- Conducted in-depth analysis of supply chain performance metrics and delivered actionable insights through detailed management reports, enabling leadership to drive 15% improvement in operational efficiency.
- Partnered with procurement teams to streamline sourcing of raw materials and MRO supplies, optimizing inventory management and reducing stockouts by 28% through predictive planning.
- Designed and automated monthly KPI dashboards (supplier performance, stock turnover, lead times) using SQL and Excel, providing critical input for quarterly business reviews and executive decision-making.
- Collaborated with production and logistics teams to improve inbound scheduling and vendor coordination, achieving a 20% reduction in receiving delays.
- Supported ERP (SAP) system implementation by creating process documentation, conducting end-user training sessions for 30+ employees and ensuring seamless adoption with minimal disruptions.
- Performed supplier risk assessments and ensured compliance with industry regulations, identifying cost-saving opportunities that reduced material expenses by 10% through vendor negotiations and strategic sourcing.
- Developed and delivered training materials and workshops on inventory forecasting tools and control systems, enhancing workforce capabilities and fostering a culture of process excellence.
- Leveraged SQL for data mining, reporting and predictive modelling, helping reduce excess inventory costs by 10% and improving cash flow predictability.
- Partnered with cross-functional stakeholders to standardize reporting processes, reducing manual effort by 25% and improving the accuracy of supply chain data analysis.
- Spearheaded data-driven cost optimization initiatives by identifying inefficiencies in procurement cycles, contributing to an overall \$250K annual savings for the business unit.

Education

Master in Information Technology and Management | The University of Texas at Dallas | Jan 2022 - May 2024

Bachelor in Computer Science | Visvesvaraya Technological University | Aug 2015 - Aug 2019

Certificate

- **SAP Analytics Cloud** – Advanced Reporting & Data Modeling
- **SQL for Data Analysis** – Hands-on SQL Queries, Joins, Subqueries, Aggregations
- **Business Analysis Fundamentals & Process Management** – BA principles, BPMN, Stakeholder Engagement
- **Microsoft Power BI Certification** – DAX, Data Modeling, Dashboard Design
- **SAP EWM & SAP TM Training** – Extended Warehouse & Transportation Management
- **Data Analytics & Visualization with Google** – Data storytelling, Google Sheets, Looker Studio

Projects

Sales Performance Dashboard & Root Cause Analysis

- Designed a Power BI dashboard framework for operational reporting, adapting techniques used for Medicaid claims and HEDIS compliance monitoring.
- Extracted and transformed large datasets using SQL, mirroring ETL practices from SSIS/AWS Glue pipelines at Mphasis; created DAX metrics for performance benchmarking and risk stratification.
- Conducted root cause analysis for anomaly detection in claim denials and eligibility gaps; modeled insights using Excel based funnel analysis and presented executive-level summaries—similar to stakeholder reporting at Elevance.

Business Process Optimization & UAT Documentation

- Led a mock process optimization project to simulate manual report reduction workflows, echoing TO-BE vs AS-IS modeling performed at Elevance using Visio and business glossaries.
- Developed BRDs, FRDs, RTMs, and test cases aligned with the documentation standards used in Confluence and SharePoint across both Elevance and Mphasis.
- Simulated UAT with end-to-end defect logging and test traceability in Jira, reflecting real-world experience supporting audit readiness and CMS reporting.

Logistics & Inventory Analytics for SAP Simulation

- Modeled KPIs related to delivery timelines and transport efficiency using SAP EWM/TM simulation data—applying the same Tableau dashboard techniques used at Mphasis for HEDIS and provider analytics.
- Replicated structured ETL logic and SQL-based profiling from Medicaid encounter data workflows, using Excel Power Query to visualize cost reduction and fulfillment trends.
- Presented simulation results in executive-style reporting format, mimicking stakeholder reporting cadence and impact analysis reviews seen in healthcare finance environments.
