SUMMARY

Detail-Oriented Regulatory Affairs professional with 2+ years of experience, specializing in Medical devices and regulatory submissions across the U.S. and international markets. Skilled in 510(k), PMA, and EU MDR submissions, ensuring documentation aligns with regulatory standards.

EDUCATION

Northeastern University
Master's in Regulatory Affairs

Boston, MA
Sep 2023 - Dec 2025

PROFESSIONAL EXPERIENCE

Regulatory Systems Business Support Intern | Apellis Pharmaceuticals

Mar 2025 - Sep 2025

- Streamlined access management processes across Veeva Vault, REGIS, and CTIS by configuring user roles and permissions for 350+ users, reducing access request turnaround time by 40%, and strengthening system compliance for regulatory audits.
- Consolidated and reconciled data from five regulatory tracking systems using advanced Excel functions, elevating reporting efficiency by 35% and supporting the timely completion of cross-functional regulatory deliverables.
- Integrated audit-ready change control documentation across three regulatory platforms (Veeva Vault, REGIS, CTIS), driving a 50% decrease in inspection findings by standardizing evidence collection and automating workflow tracking using SharePoint.
- Drove validation and UAT testing of 30+ regulatory system enhancements (MSRs), accelerating compliant system releases by 20% through early defect identification and documentation.
- Developed KPI dashboards for submissions, system enhancements, and access management, increasing leadership visibility by 30%.
- Authored step-by-step reference guides for global health authority portals, reducing onboarding errors and ad hoc support requests.

Regulatory Affairs Associate | Smilax Laboratories

Feb 2022 - Aug 2023

- Managed a foreign registration database to track product registrations, renewals, and post-approval changes, ensuring 100% regulatory compliance through proactive lifecycle maintenance.
- Authored and reviewed SOPs and regulatory documentation aligned with ISO 13485, ISO 14971, GMP, GCP, and GLP, supporting compliant manufacturing and product release.
- Drove regulatory gap assessments and QC reviews, reducing audit discrepancies by 15% and improving inspection readiness.
- Partnered cross-functionally with Quality, Manufacturing, R&D, and Clinical teams to assess regulatory impact of changes, enabling 20% faster resolution of regulatory queries.
- Interpreted evolving regulatory requirements to support labeling, technical documentation, and submission-ready content, reducing documentation rework by 10%.

SKILLS

- Regulatory & Quality:** FDA 510(k), CAPA (Corrective and Preventive Actions), CE Marking, EU MDR/IVDR & Health Canada Device License Applications, Technical File Preparation, Regulatory Change Management and Risk Mitigation, FDA QSR (21 CFR Part 11/820), MDSAP Standards, SOP/WI/QMS documentation, Regulatory Inspections
