SUMMARY

Software Engineer with 4 years of experience building and operating backend and full-stack systems in regulated financial and enterprise environments. Currently working at Morgan Stanley on Java and React-based platforms supporting internal banking and risk workflows, contributing to microservices stability, AI-assisted classification, and analyst-facing tools used by 900+ users. Hands-on with Spring Boot, REST APIs, MongoDB, and frontend state management, with practical exposure to integrating LLM services in a controlled, review-driven setup. Previously delivered production microservices, scalable data layers, and cloud deployments on AWS, improving performance, reliability, and release velocity across multiple client systems.

EXPERIENCE

MORGAN STANLEY

Software Engineer (Full Stack)

Aug 2025 – Current

- Contributed to backend **microservices** using **Java**, **Spring Boot**, and **RESTful APIs**, supporting digital banking workflows processing **\$18M+** monthly transactions while improving response stability by **11%**.
- Optimized **MongoDB** access layers through **index tuning** and query refactoring, reducing read latency by **14%** and preserving audit-aligned transactional consistency.
- Integrated **AI-assisted services** using **LLM APIs**, **prompt engineering**, and **inference orchestration** to enable transaction categorization, increasing classification precision by **9%**.
- Supported **model inference pipelines** by implementing **JSON validation**, **feature normalization**, and **confidence scoring**, reducing downstream processing errors by **13%** across review queues.
- Delivered frontend modules with **React** and **Redux Toolkit**, consuming **AI-enriched APIs** to surface flagged transactions and improving review turnaround time by **15%** for **900+** users.
- Collaborated with **frontend engineers**, **UX designers**, **data scientists**, and **product owners** in **Agile Scrum** teams, achieving **95%+** sprint delivery consistency and cutting rework by **12%**.

INFORMATIVE WEB SOLUTIONS

Full Stack Developer

Remote, IN

May 2021 – Dec 2023

- Designed and implemented a robust **Microservices architecture** using **Java (Spring Boot)** and **Python (FastAPI)**. Developed secure **RESTful APIs** with OAuth2 authentication, improving API response times by **21%**.
- Engineered scalable data layers using **PostgreSQL** and **Elasticsearch**. Implemented query tuning and advanced indexing strategies that increased search accuracy and retrieval performance by **26%** for large-scale enterprise datasets.
- Built dynamic and responsive web interfaces using **React** and **Angular**. Applied **component-driven design** and centralized state management (**Redux/RxJS**), which reduced UI defects by **17%** and ensured seamless cross-browser consistency.
- Implemented comprehensive **automated testing frameworks** using **JUnit** and **Pytest**, achieving **80%+ code coverage** while performing **unit**, **integration**, and **end-to-end testing** to ensure **software reliability** and **system stability**.
- Containerized applications using **Docker** and orchestrated deployments with **Kubernetes (EKS)**. Managed auto-scaling and environment isolation on AWS, maintaining a **99.5% uptime** for mission-critical business solutions.
- Established version control and release cycles using **GitHub Actions** and Git. Led pull-request reviews and collaborated with cross-functional teams to align API schemas with business requirements, accelerating feature delivery by **19%**.

EDUCATION

ARIZONA STATE UNIVERSITY

Masters in Information Technology

Tempe, AZ

Jan 2024 - Dec 2025

SKILLS

- Backend & API Development:** Java, Spring Boot, Python, FastAPI, RESTful APIs, Microservices Architecture, OAuth2, API Security, Asynchronous Processing, Rabbit MQ, Caching(Redis).
- Frontend Engineering:** React, Redux Toolkit, TypeScript, JavaScript, HTML, CSS, Angular, Component-Based Architecture, State Management, Responsive UI Development, JUnit, Pytest.
- Databases & Search:** PostgreSQL, MongoDB, Elasticsearch, Query Optimization, Indexing Strategies, Data Modeling.
- Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Jenkins, Container Orchestration, Cloud-Native Deployment, Terraform, Infrastructure as Code, Monitoring (Prometheus/Grafana).
- AI & Data Integration:** LLM APIs, Prompt Engineering, Inference Workflows, Feature Normalization, Confidence Scoring.
- Development Tools:** Git, GitHub, Gitbash, Agile Scrum, API Contract Design, Cross-Functional Collaboration.
