

Maneesha R Mundla

 maneesharedy831@gmail.com  2026310594  Chicago, IL  LinkedIn

Summary

- **Data Analyst with 2+ years of experience** analyzing operational, customer, and healthcare datasets to drive **data-informed decision-making, performance optimization, and measurable business outcomes across cross-functional teams**.
- **Proficient in Python, SQL, and R** for data analysis, statistical modeling, and building **reproducible, scalable analytics workflows** across structured and semi-structured data sources **to support reporting, insight generation, and predictive analysis**.
- Experienced in designing BI dashboards, analytical reports, and data validation frameworks using Tableau, Power BI, and cloud data platforms to support reliable reporting and data-driven decision-making across business teams.
- Applies statistical and machine learning techniques including regression, classification, clustering, and NLP to **analyze complex datasets, derive actionable insights, and support predictive analysis and data-driven decision-making**.
- Experienced in performing **comprehensive data validation, reconciliation, and quality assurance checks** to ensure the accuracy, consistency, and reliability of analytics outputs across reporting layers, analytical pipelines, and downstream data consumers.
- Adept at **translating ambiguous and evolving business problems into well-defined analytical approaches**, leveraging exploratory data analysis, structured problem-solving, and clear communication to deliver insights that inform stakeholders and guide data-driven strategic decisions.
- Strong collaborator with experience partnering with product, finance, compliance, and engineering stakeholders, delivering clear documentation and insight-driven recommendations.

Skills

Programming & Querying: — Python, SQL, R, PySpark, Shell Scripting

Libraries & Frameworks: — Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels, TensorFlow, PyTorch, NLTK

Databases & Data Platforms: — Snowflake, Amazon Redshift (analytics exposure), PostgreSQL, SQLite

Analytics & Data Science: — Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modeling, Regression, Classification, Clustering, NLP, A/B Testing, Feature Engineering

Business Intelligence & Visualization: — Tableau, Power BI, Excel, Microsoft Fabric

Version Control and Collaboration Tools: — Git, GitHub, GitLab, Jira, Confluence, Trello

Data Engineering: — ETL/ELT Support, dbt, Databricks, Dimensional Modeling, Data Validation & Reconciliation

Cloud & Tools: — AWS (S3, Redshift), GCP, Git, Jenkins, Docker, VS Code

Professional Experience

Data Operations Associate, AccugenLabs

08/2025 | Chicago, IL

- Transformed CRM (HubSpot) and financial (QuickBooks) datasets into **actionable business insights**, improving leadership visibility into sales performance, customer behavior, and transaction trends, while increasing reporting efficiency by **80%**.
- Designed and maintained **operational and financial dashboards** using Power BI and SQL to support executive and operations teams in monitoring KPIs across inventory, revenue, and workflow performance.
- Built and supported **analytics-focused data models and transformations** using dbt, enabling consistent metrics and accelerating dashboard and reporting turnaround time by **65%**.
- Performed **data validation, reconciliation, and quality checks** between source systems and reporting layers to ensure accuracy, completeness, and reporting continuity across analytics deliverables.
- Tracked equipment usage and maintenance cycles using analytical reports, integrating insights into operational planning to reduce unplanned downtime and improve resource utilization.
- **Created and maintained comprehensive, structured documentation** covering datasets, metrics definitions, reporting logic, and known data caveats, **ensuring transparency, audit readiness, and long-term scalability of analytics and reporting systems**.
- Identified data quality issues and reporting gaps, escalating findings with clear context and recommended next steps to stakeholders.

Data Analyst, BrightGeeks Technology

11/2024 – 06/2025 | Remote

- Analyzed customer interaction data generated from chatbots and voice assistants to identify usage trends, engagement patterns, and resolution gaps across multiple consumer-facing websites **for product performance insights**.
- Built and maintained analysis-ready reporting datasets by structuring raw conversational logs via API-based data collection workflows, enabling consistent reporting and ad-hoc analysis **for business and product teams**.
- Developed Tableau-style analytical summaries tracking interaction volume (300+ weekly sessions), response accuracy, and resolution rates to support product and operational decision-making **across multiple stakeholders**.
- Performed data validation and reconciliation across interaction logs to ensure reporting accuracy and consistency prior to downstream consumption **in dashboards and reports**.
- Partnered with senior engineers to support emerging analytics patterns, including automated insights and AI-assisted reporting, while maintaining a primary focus on reliable analytics delivery **across evolving platforms**.

- Authored clear documentation covering dataset structure, reporting assumptions, and known data caveats to support stakeholder transparency and reporting clarity.

Data Analyst Intern, Microgen Health

10/2023 – 08/2024 | Chantilly, VA

- Built and maintained BI dashboards delivering real-time insights into insurance claims performance, improving operational visibility and reducing reporting lag for healthcare operations teams **across multiple reporting cycles**.
- Wrote SQL queries to support ad-hoc analysis, recurring reports, and data quality checks across patient and claims datasets **for consistent and reliable reporting**.
- Supported ETL validation by performing reconciliation and exception analysis, achieving 98% data accuracy and ensuring compliance with healthcare reporting standards **across regulated data pipelines**.
- **Automated discrepancy detection workflows**, resolving insurance claim issues with 85% accuracy and accelerating revenue cycles for faster billing resolution **across multiple payer and provider data streams**.
- **Collaborated with finance and compliance stakeholders** to define metrics, validate data sources, and document reporting logic for audit-ready reporting and governance **across regulated healthcare reporting environments**.

Programmer Analyst, Cognizant Technology Solutions

03/2022 – 07/2023 | India

- Conducted customer segmentation and trend analysis across 50+ global hospitality properties to inform engagement and retention strategies for loyalty programs across diverse customer segments **and regional business units**.
- Designed and maintained executive dashboards tracking member growth, redemption trends, and satisfaction metrics using SQL and BI tools for senior leadership reporting **across multiple business functions**.
- Analyzed reservation workflows and conversion funnels in collaboration with product and marketing teams, driving a 35% increase in conversion rates through data-driven optimization **and continuous performance monitoring**.
- Optimized SQL- and Python-based reporting workflows, reducing manual effort and improving the accuracy and reliability of analytics outputs for business-critical reporting **across enterprise reporting environments**.
- Maintained reporting documentation and collaborated with QA teams to ensure consistency and correctness across analytics deliverables through standardized reporting practices **and quality assurance procedures**.

Projects

Lifestyle Impact on Diabetes Management

- Analyzed 250,000+ records from the BRFSS public health dataset using Spark in Databricks to explore relationships between lifestyle factors and diabetes outcomes across multiple demographic and health indicators.
- Performed **data cleaning, exploratory data analysis, and feature engineering** to prepare structured datasets for statistical and machine learning analysis. Created visualizations and summary reports to communicate insights and support **data-driven public health recommendations**.
- Built predictive models including **logistic regression, random forests, and k-means clustering**, achieving **91.8% accuracy** in identifying patterns related to diabetes risk.

Offensive Language Identification in Tweets

- Collected and analyzed **multiple publicly available Twitter datasets** to identify offensive and abusive language patterns using NLP techniques.
- Implemented and evaluated **BERT-based models and traditional classifiers** (SVM, Random Forest) to detect offensive content, achieving **92% accuracy and 0.91 F1 score**. Generated performance reports and visualizations to compare models and interpret results.
- Applied **TF-IDF vectorization and hyperparameter tuning** to improve model performance and generalization.

Choosr – AI-Assisted Decision Support

- Built a **prototype decision-support application** that uses user preferences and contextual inputs to generate personalized recommendations.
- Stored and queried user data using **Supabase and SQL** to support basic analytics and preference tracking. Analyzed user interactions to identify **preference patterns and usage trends** that informed improvements to recommendation logic.
- Designed simple dashboards and UI flows to demonstrate how analytical insights support better user decisions.

ClimateGPT Performance Analysis

- Collected and organized **public climate and emissions datasets** into a SQLite database to support structured analysis.
- Built lightweight **Python data pipelines** to clean, transform, and load data for downstream querying and evaluation.
- Analyzed query performance and response relevance, improving output quality by **40%** through optimized data preparation and indexing.

Education

Masters in Data Analytics Engineering -George Mason University (GPA-3.90)

08/2023 – 05/2025

Coursework: Statistics, Data Visualization, Data Mining, Big Data Essentials, ML Algorithms, NLP, LLM's.

Bachelor of Engineering-Acharya Institute of Technology(CGPA:3.8)

08/2018 – 06/2022

Certificates

- Career Essentials in Data Analytics by Microsoft
- Power BI, SQL, R track course by DataCamp
- JPMorgan Chase & Co. - Excel Skills Job Simulation
