Profile Summary

Results-oriented Regulatory Affairs graduate with a Doctor of Pharmacy degree and hands-on experience in FDA 510(k) submissions, ISO 13485 compliance, and CAPA implementation. Adept at optimizing clinical research processes using EDC systems (Clindox, Medidata), ensuring regulatory compliance and data integrity. Skilled in driving medical device development, streamlining global regulatory strategies, and maintaining high-quality standards in fast-paced, regulated environments.

Skillset

- **Regulatory Expertise:** FDA 510(k), PMA, IDE, De Novo, eCTD submissions, EU MDR, CDSCO MDR 2017, 21 CFR Parts 11/803/806/807/820, GxP, QSR, ISO 13485, Risk Management (ISO 14971), Post-Market Surveillance (PMS), Unique Device Identification (UDI)
- **Quality Systems:** CAPA, Design Control, Root Cause Analysis, Non-Conformance Management, Quality Management Systems (QMS), Audit Preparation (FDA, Notified Body)
- **Clinical Research:** EDC Systems (Clindox, Medidata, REDCap), eCRF Development, Clinical Trial Management, GCP, Protocol Development
- **Technical Tools:** MS Office (Word, Excel, PowerPoint), Teams, Documentum, Veeva Vault, SharePoint, Adobe Acrobat, Statistical Analysis Tools (SPSS, SAS)
- **Professional Skills:** Regulatory Strategy Development, Technical Writing, Cross-Functional Collaboration, Project Management, Gap Analysis, Stakeholder Communication, Process Optimization, Problem-Solving in Regulated Environments.

Education

Master of Science in Regulatory Affairs | Northeastern University | Boston, MA | GPA: 3.8/4.0 | Sep 2023 – Jun 2025

- Relevant Coursework: Medical Device, Global Regulatory Strategy, Quality Systems

Doctor of Pharmacy | Bharat Institution of Technology | Hyderabad, Telangana, India | GPA: 3.23/4.0 | Sep 2017 – Jul 2021

- Relevant Coursework: Clinical Research, Pharmacology, Drug Analysis, Pharmacokinetics, Therapeutic Drug Monitoring, Pharmaceutics

Professional Experience

Regulatory Affairs Associate | Thermo Fisher Scientific, USA | Jan 2025 – Present

- Author and compile FDA 510(k) and PMA submissions, ensuring 100% compliance with 21 CFR Part 820 and EU MDR across multiple medical device product lines.
- Implement CAPA processes across R&D and manufacturing teams, reducing non-conformance issues by 15% through proactive risk assessments and corrective actions.
- Coordinate with cross-functional teams to align product development with ISO 13485 and global regulatory requirements.
- Streamline eCTD and document control workflows, reducing submission preparation time by 20% and improving team efficiency.
- Monitor regulatory updates and provide strategic guidance for compliance across medical device classifications.
- Support clinical trial operations by managing eCRFs in EDC systems (Clindox, Medidata), achieving 98% data integrity.

Clinical Assistant (Medical Oncology Department) | KIMS, India | Mar 2022 – Jul 2023

- Documented vital signs and updated EMRs with 99% accuracy, improving clinical documentation and patient data integrity.
- Optimized patient scheduling and insurance claim processing, reducing wait times by 25% and enhancing clinic efficiency.
- Facilitated patient-provider communication, educating patients on oncology therapies and increasing adherence by 30%.
- Assisted oncologists with treatment procedures, chemotherapy preparation, and follow-up care to improve patient outcomes.
- Supported clinical trial teams by coordinating patient recruitment, scheduling visits, and managing eCRFs in Clindox and Medidata with 98% accuracy.
- Trained new staff on EMR usage and clinical protocols, improving team efficiency and reducing onboarding time by 20%.

Regulatory Affairs Associate | Maxgen Technologies, India | Mar 2021 – Mar 2022

- Assisted in preparing regulatory submissions, including 510(k) and CDSCO dossiers, achieving 100% submission acceptance.
- Conducted gap analyses to align processes with ISO 13485, reducing compliance discrepancies by 20%.
- Supported CAPA implementation, resolving 10+ quality issues through root cause analysis and corrective action plans.
- Drafted SOPs and technical documentation, improving document retrieval efficiency by 30%.
- Monitored regulatory updates and ensured alignment with FDA, EU MDR, and CDSCO requirements.
- Utilized EDC systems to manage clinical trial data, maintaining 98% accuracy in eCRF documentation.

Academic Projects

Medical Device Regulatory Strategy | MG Health Tech, Texas, USA | May 2025 – Jul 2025

- Developed a comprehensive regulatory framework aligned with CDSCO's Medical Device Rules (MDR), 2017, focusing on risk-based classification, ISO 13485-compliant QMS, and post-market surveillance obligations.
- Streamlined licensing requirements, reducing approval timelines by 10% through optimized documentation processes.

Cardiovascular Safety of PPIs | Krishna Institute of Medical Sciences, Hyderabad, Telangana, India | Jul 2021 – Jun 2022

- Conducted an observational study evaluating cardiovascular risks of proton pump inhibitors, enhancing clinical risk profiles.
- Analyzed study data using SPSS and SAS, presenting findings to support evidence-based clinical decision-making.

Certifications

- Clinical Research Internship – 15-day hands-on training
- STANSYS Software Training – Certified in Data Analysis Tools
- Good Clinical Practices – NIDA Clinical Trials Network
- Clinical Research & E-Cell IIT Kharagpur Event – Participant
- NSS Orientation & Youth Festival – Certified Volunteer
