PROFILE

- Result-driven Software Developer with a **master's degree** in Computer Applications from **NIT Calicut**, India
 - 5+ years of experience writing clean, robust, and reusable code
 - Proficient in **Java, Spring Boot, React**, Web technologies, **Git, MySQL, AWS Services**, and various development tools, with a track record of successfully delivering complex projects following **Agile** methodologies
 - Expertise in building/consuming **REST APIs** & utilizing **Kafka** for **microservice** communication
 - Possess strong programming, debugging, analytical, interpersonal, and communication skills
 - Possess thorough knowledge of Object-Oriented Concepts, SOLID principles, and design patterns
 - Driven to excel individually and collaborate seamlessly within a team.
 - Seeking an opportunity to tackle challenging tasks, foster continuous learning in cutting-edge technologies, and enhance interpersonal skills.
-

EMPLOYMENT HISTORY

June 2024 — Present	Software Development Engineer - Amazon	Seattle, WA
	• Worked on notification template creation system for marketing and transactional notifications for all channels(email, push, SMS) using React, Typescript, MJML, HandleBars, Java, Spring, Amazon DynamoDB, Lambda, S3 etc • Worked on different feature support and bug fixes on existing notification template system that includes working on UI and, backend services, writing unit tests using Junit/Mockito/EasyMock/Jest, writing integration tests, testing feature/service on different environment and perform deployment to production environment • Refactored the existing email development template to reduce the email payload size by 40% • Integrated a new pipeline stage into the CI/CD process using AWS infrastructure, enhancing deployment • Designed and developed REST APIs using Java and Springboot, used Amazon DynamoDB for data management, and AWS Lambda for compute operations. • Worked on enabling SMS channel on internal notification template creation system, it includes working on UI using react, typescript and working on backend using Java spring, DynamoDB, other Amazon AWS services like S3 • Worked on WhatsApp feature support on the internal notification template creation system, it includes working on UI side using react, typescript and backend includes java spring, dynamoDB	
Sep 2022 — Dec 2022	Java Developer, eBay	Seattle, WA
	• Worked with the Payment Gateway team on a seller migration project. Implemented the feature to migrate seller data to a different platform based on various configurations and eligibility criteria using Spring Batch. • Introduced an end-to-end workflow to enable concurrent execution of multiple batch jobs, optimizing efficiency. • Developed Python automation scripts to automate data processing (filtering and transforming) tasks from CSV files, resulting in time savings and increased accuracy. • Utilized Java, Spring Boot, Maven, Git, Elasticsearch, and SQL in an Agile environment to deliver robust solutions and JUnit for writing unit test cases. • Debug and fix bugs to ensure smooth service operation.	
May 2021 — Jun 2022	Senior Software Engineer, Morgan Stanley	Bangalore
	• Led the implementation of systems supporting Client Reference Data & Regulatory Management, ensuring compliance with KYC regulations. • Designed and developed micro-services using Spring and followed Agile methodologies, resulting in scalable and maintainable code. • Utilized Kafka for seamless communication among services and DB2 as a reliable data source. • Contributed to object-oriented modeling projects by implementing new attributes in the cache system. • Developed user interface using ReactJS, created different UI Components, React Hooks, and worked on Conditional Rendering, Forms, Events, etc. • Collaborated on enhancing the internal client onboarding platform using Java, Angular, and Drools. • Demonstrated strong testing abilities by using JUnit and Mockito to ensure application reliability.	

Aug 2019 — Apr 2021

Software Engineer, Magnitude Software

Bangalore

- Played a key role in the backend development of Apache Drill **JDBC** (JAVA) and ODBC (C++) data connectivity drivers.
- Successfully implemented new features, resolved bugs, and maintained drivers at the latest standards for customer release.
- Automated the release process of ODBC drivers as **NuGet Packages**, reducing manual effort and improving efficiency.
- Employed Salesforce for customer support and Jira for efficient task management.
- Leveraged Tableau and Microsoft Power BI for **Data Visualization** and ODBC Driver Testing.
- Ensured a streamlined development process with **Bamboo** for CI and CD, and **Perforce** P4V for Version Control.
- Used Confluence for comprehensive project documentation.

Jun 2018 — Jul 2019

Software Engineer, Netcracker Technology

Bangalore

- Contributed to the development of the **Order Management System** for TELUS Network as a **Java developer**.
- Implemented the **backend** of a customer portal to display subscribed services, enhancing user experience.
- Utilized Java, SQL, and JSON to facilitate data processing and communication between the **front end** and back end via **REST API**.
- Employed **Tomcat**, **Maven**, and **SVN** for seamless project development and version control.
- Debug and fix bugs to ensure smooth service operation.
- Involved in writing SQL queries.
- Consistently ensured the high-quality and timely delivery of project milestones.

Jan 2018 — Jun 2018

Software Engineer Intern, Netcracker Technology

Bangalore

- Worked on core Java, SQL, and Netcracker's internal platform
- Revised, modularized, and updated old code base to modern development standards and improved functionality
- Understood the debugging process for a large system, fixed bugs in the existing system
- Involved in writing SQL queries
- Carefully documented technical workflows and knowledge in the private wiki for the education of newly hired employees.

EDUCATION

Jul 2015 — Jun 2018

Master of Computer Application (MCA), National Institute of Technology Calicut

Calicut

- Graduated with a CGPA of 7.99 on a 10-point scale.
- Coursework included advanced topics in software development, algorithms, database management, and system analysis.

Jul 2011 — Jul 2014

Bachelor of Computer Application, Indira Gandhi National Open University - Achieved a score of 73%

Delhi

SKILLS

Programming Languages - Java, Typescript, Javascript, Python

Frameworks - Spring boot, REST API, React

Databases: MySQL, DynamoDB, MongoDB

AWS: EC2, IAM, S3, Lambda, Cloudwatch

Unit Test Frameworks: JUnit, Mockito

Version Control: Git, SVN, Perforce

CI/CD: Jenkins, Bamboo

Concepts: Data Structures & Algorithms, Microservices, Object Oriented Design Patterns, Problem-Solving

Tools and Technologies: Maven, **Kafka**, Drools, Jira, Confluence, **Apache Spark**

PERSONAL PROJECTS

Jun 2017 — Dec 2017

WeShare (Java, Servlet, JSP, MongoDB, JavaScript, HTML, CSS)

- Developed a dynamic discussion forum with user authentication.
- Implemented post creation, commenting, liking, and real-time one-to-one chat.
- Utilized Java Servlets, JSP and MongoDB for efficient data handling and storage.
