SUMMARY

- **Supply Chain Business Analyst** with 5+ years of expertise optimizing **supply chain processes** across **Consumer Products, Retail, and Manufacturing industries**, specializing in **SAP SCM modules (SD, MM, EWM, LE, IBP)** and **Manhattan WMS**.
- Leveraged **Tableau** and **Power BI** for advanced **data visualization, forecasting, trend analysis**, and **time series analysis**, delivering actionable insights that improved supply chain efficiency and minimized operational bottlenecks.
- Experienced in **Global Demand Planning, Inventory Management, Risk & ROI Analysis, Logistics Execution**, with expertise generating **production plans, inventory reports**, and **analytics** to support strategic decisions and drive **continuous improvement** via **Kaizen**.
- Proficient in designing and implementing **warehouse layouts** and processes within **SAP EWM, optimizing storage capacity, reducing costs**, and improving order fulfilment efficiency while ensuring seamless integration with **SAP SD** and **SAP MM**.
- Expert in managing **end-to-end Supply Chain Operations**, including **cost optimization, inventory tracking**, and **Sales Data Management**, driving improvements in **picking, packing**, and **shipping** through SAP system integrations, reducing fulfilment errors.
- Strong knowledge of **Agile** and **Waterfall** SDLC methodologies, ensuring timely project execution, improving **workflows**, and supporting enterprise-wide digital transformation initiatives.
- Experienced in **Strategic Delivery, Organization and Team building**, and **Consulting** with expertise in **Business, Information Security Services, Application Integrity**, Business Continuity Management, Infrastructure & Operations Security, Privacy & Data Protection, Security Management.

SKILLS

Languages: SQL, PL/SQL, Python, R, C, Java, HTML, CSS

Tools & Databases: Power BI, Tableau, Excel, VBA/Macros, Azure DevOps, Jira, Git, Visual Studio, Manhattan WMS, Oracle, SQL Server, PostgreSQL, SAP HANA, Microsoft Dataverse

Methodologies: SDLC, QA Life Cycle, Waterfall, Agile, ASAP/Activate, Lean Six Sigma (Green Belt), Just-in-Time (JIT), 5S, Kaizen (Continuous Improvement), Value Stream Mapping, Root Cause Analysis (5-Why, Fishbone), PDCA Cycle, Ad-hoc Analysis

SCM Skills: Forecasting, Demand Planning, Outsourcing, Inventory Management, Procurement, Logistics & Transportation, Change Management, Project Planning, Budgeting & Scheduling, Sales & Operations Planning (S&OP), Risk Mitigation, ROI Analysis

Business Analysis: Business Definition Requirements, Business Process Analysis, Use Case Modeling & Analysis, Market Research Analysis, Change Management, Stakeholder Engagement, UML (Use Case, Activity, Sequence, DFD, Component Diagrams)

Data & Business Skills: Data Extraction, Data Cleaning, Data Visualization, Complex Data Analysis, KPI Tracking & Reporting (OTIF, Fill Rate, Cycle Time), Scenario Modeling, Process Modeling, What-if Analysis, Impact Analysis

SAP Modules: SAP IBP (Integrated Business Planning), Sales & Distribution (SD), Materials Management (MM), Extended Warehouse Management (EWM), Transportation Management (TM), Logistics Execution (LE), SAP ERP

Cloud & Data Platforms: SAP S/4HANA Cloud, Oracle SCM Cloud, Azure Synapse, AWS S3, Google BigQuery

Logistics & Operations: Warehouse Management Systems (WMS), Transportation Management Systems (TMS), Inbound/Outbound Logistics, Supplier Scorecarding, Vendor Management, Order Management, RFID/IoT Supply Chain Integration

Collaboration & Communication: Cross-functional Team Collaboration, Procurement Support, Supplier Relationship Management, Global Supply Chain Coordination, Stakeholder Communication, Project Documentation & Reporting, Continuous Improvement Facilitation

PROFESSIONAL EXPERIENCE

Walgreens, TX, USA

Nov 2023 – Present

Senior Supply Chain Business Analyst

- Designed and implemented an **SAP Fiori** user interface to input material, plant, warehouse, and order details, using **RFC-enabled function** modules for **shelf-life tracking**, minimizing product wastage, resulting in reduced excess stock by 1,500 units and decrease in inventory holding costs by approximately **\$120,000 annually**.
- Built **interactive dashboards** using **Tableau** and **SQL**, tracking key supply chain metrics such as **delivery times, Freight costs** and **INCOTERMS** resulting in a 10% **reduction in delivery delays** and a 7% reduction in **freight costs**.
- **Executed Data Extraction, Transfer & Load (ETL)** processes using SAP Data Services 4.0 to integrate CSV files into SAP HANA tables, facilitating real-time updates of exchange rates and providing **supply planners** with actionable insights regarding **product availability** and potential **supply chain disruptions**.
- Collaborated with the **Inventory Management** team to develop key **Tableau reports**, improving inventory turnover; Created automated reports with **SQL, Excel**, and **VBA**, reducing manual data processing time from **12 to 4 hours per week**, boosting reporting efficiency
- Led the integration of **SAP IBP** with **SAP S/4HANA**, streamlining data synchronization across **supply, demand**, and **procurement functions**, enhancing **end-to-end supply chain visibility** and enabling faster decision-making across teams
- Defined **planning parameters** such as **horizons** and **forecasting methods**, optimizing the **supply chain KPI** which ensured timely Material availability by 12%, **reducing stock-outs** and ensuring timely deliveries.
- Analyzed the complete supply chain process, from receiving an order in **OMS (Order Management System)** and **WMS (Warehouse Management System)** to final delivery, ensuring seamless order flow which decreased order processing delays by **24 hours**.
- Redesigned **order management** and **logistics processes**, enhancing customer service, global **freight management**, and **domestic logistics**, leading to faster **order processing**.
- Managed the **Return Process**, overseeing the **planning, scheduling**, and **tracking** of material issues for over **1,100 returns**, ensuring a 98% **On-Time Delivery** service level.
- Mapped and mediated data between source tables and WMS data using **MS Access** and **Excel**, ensuring **data integrity**, improving **consistency**, and **reducing errors**, which directly enhanced **order fulfillment accuracy**.
- Performed **cost-benefit analyses** for **supplier efficiency programs** and strengthened **supply chain KPIs** resulted in cost savings of **\$105K annually** and elevated regional distribution centers service by converting **push-driven supply planning** to **demand-driven pull system**.
- Coordinated with **cross-functional** teams (**Finance, Procurement, Logistics, Operations**) to gather user requirements through meetings and **JAD** sessions, documenting detailed Desktop Procedures, **use cases**, and **process flow diagrams** to streamline operations.
- Prepared **Business Requirement Documents (BRDs)** by gathering **functional requirements** from stakeholders, defining clear **project scopes**, and reducing project timelines by creating technical guidelines that improved project efficiency.
- Worked closely with **master data** teams to maintain accurate **inventory records** in ERP systems, reducing **stock discrepancies** and preventing **stockouts** and **overstock situations**, resulting in an estimated **\$80K - \$120K** in annual savings.
- Contributed to all SAP project stages using the **ASAP** methodology (**Preparation, Blueprint, Realization, Final Preparation, Go-Live**, and **Support**), ensuring seamless traceability of business, functional, and system requirements through a detailed **traceability matrix**.
- Developed and maintained **supply chain performance metrics**, improving **service delivery, internal management**, and **vendor accountability** across various projects.
- Assisted in the creation of comprehensive **Test Plans, Test Cases**, and **Scenarios** for manual, **system integration**, and **regression testing**, improving system reliability and significantly **reducing post-deployment issues**.
- Used **VLOOKUP** and **XLOOKUP** to reconcile large inventory, procurement, and sales datasets, quickly identifying discrepancies between ERP, WMS, and supplier records to improve data accuracy and reporting reliability.

DHL, INDIA

Jan2020–Dec2022

Supply Chain Analyst

- Gathered and documented **business requirements** by leading stakeholder meetings, preparing **GAP** analysis documents, and conducting **AS-IS** and **TO-BE** process studies to identify inefficiencies, driving workflow optimization.
- Engineered **over 20 automated SAP IDOC** interfaces leveraging the **IDOC/ALE framework** to streamline **Order-to-Cash (O2C)** processes, reducing manual data entry and improving data accuracy and integrity using **ETL tools** like SAP Data Services.
- Generated **custom reports** and **SQL queries** to monitor critical SCM metrics such as **delivery routes**, **shipping expenses**, and **lead times**, offering valuable insights that enhanced **logistics efficiency** and supported **data-driven decision-making**
- Collaborated with **cross-functional teams** to analyze **logistics data**, utilizing **regression analysis** to identify last-mile delivery bottlenecks, leading to a 10-12% improvement in overall delivery efficiency.
- Built **Power BI** dashboards to track **KPIs** such as **inventory turnover**, **replenishment time**, and **lead times**, enhancing decision-making and reducing lead times by 2-3 days
- Optimized **route determination** in the **Order-to-Cash (O2C)** process, integrating **SAP** systems to reduce **delivery costs** and ensured timely **shipment delivery**, decreasing late deliveries by **50-75** units per day through intelligent route selection based on real-time data.
- Implemented **TM (Transportation Management)** to optimize **transportation planning** and execution by integrating real-time data and utilizing **optimization algorithms** for efficient **route selection**, reducing empty miles and improving delivery performance.
- Applied **Lean Six Sigma** to streamline processes, utilizing **JIT(Just-In-Time)** and **EOQ(Economic Order Quantity)** which reduced inventory holding costs. Conducted **Root Cause Analysis/ Ad-hoc analysis** by applying **DMAIC** to identify inefficiencies in inventory levels which resulted in handling approximately **500 fewer stock discrepancies** per month which optimized decision-making for inventory team.
- Deployed **Manhattan WMS** Planning solutions to **optimize inventory levels**, **production schedules**, and **distribution networks**.
- Effectively communicated **data insights** to **non-technical stakeholders**, translating technical findings into actionable business strategies to enhance decision-making and engagement.
- Monitored **EDI transactions** and resolved errors using **Azure DevOps**, reducing error resolution time by 40%, which enhanced communication between SAP systems and external partners.
- Built **dynamic Excel models with XLOOKUP** to automate cross-table validation, reduce manual data matching, and support faster decision-making for inventory tracking, supplier performance, and operational analysis.

EDUCATION

Master of Science in Computer Science
University of North Texas
