

NIMRITHA CHANDRASEKAR

Dearborn, MI — nimritha@umich.edu — (313) 607-0192 — linkedin.com/in/nimritha-chandrasekar-a150a5238

PROFESSIONAL SUMMARY

Supply Chain Analyst with 2+ years of experience at Amazon driving data-backed decisions across global sourcing, inventory planning, and fulfillment operations. Specialized in building dashboards, cost models, and process improvements that reduced cycle times, improved on-time performance, and identified multimillion-dollar risk and savings opportunities. Proficient in Excel, SQL, Power BI, and enterprise SCM systems, with a strong focus on turning operational data into actionable strategy

EDUCATION

Master of Science in Supply Chain Management

Aug 2024 – Present

University of Michigan

Key Coursework: Logistics & Transportation, Data Analytics for SCM, Operations management, Strategic Sourcing, Lean Six Sigma, Supply Chain Analytics

Bachelor of Engineering in Biotechnology

Jun 2018 – May 2022

Karunya University, India

ACADEMIC ACHIEVEMENTS

Dean's List, University of Michigan–Dearborn

Fall 2024 – Winter 2025

PROFESSIONAL EXPERIENCE

Supply Chain Analyst — Amazon India

July 2022 – August 2024

- Led and monitored tariff exposure analysis estimating \$10M+ potential impact across global sourcing operations; supported mitigation through alternate vendor strategies across 10+ North American, minimizing supply disruption risks.
- Designed and launched the OneDemand (Plan of Record) Dashboard, improving visibility of funded/unfunded demand to the subcomponent level; reduced query resolution time by 30% and accelerated decision-making for the Demand Planning team.
- Built a dynamic NPI Cost Dashboard delivering real-time insights on 10+ new product introductions (NPIs); implemented predictive cost modeling that informed \$10M+ in active risks and \$15M+ in forecasted opportunities, driving proactive procurement planning.
- Automated Power BI and Excel VBA dashboards to monitor inventory turns, order cycle times, and cost-to-serve KPIs, enabling real-time performance tracking and reducing manual reporting workload by 35%.
- Streamlined order management by integrating Warehouse Management System (WMS) and Transportation Management System (TMS) data flows, improving on-time fulfillment rates by 18% and enhancing end-to-end shipment visibility across regional distribution centers.
- Reduced dock-to-stock cycle time by 22% through workflow redesign of receiving and put-away processes; applied Lean Six Sigma principles to eliminate bottlenecks and increase warehouse throughput.
- Improved S&OP alignment efficiency by 15% by linking store demand signals, transportation schedules, and supplier purchase orders, ensuring synchronized forecasting and smoother replenishment execution.

Enrollment Management Student Ambassador (on campus job)

Sep 2024 – Present

University of Michigan

- Managed and resolved 50+ student inquiries weekly through case management systems—applicable to supply chain customer service and stakeholder communication
- Coordinated logistics for 10+ recruitment events per semester, managing material preparation and ensuring efficient execution, demonstrating event planning and resource management skills
- Processed and maintained accurate records for 200+ students weekly using Microsoft Office and Google Suite, showcasing data management and organizational capabilities

TECHNICAL SKILLS

Tools & Systems: SAP, Oracle SCM, Power BI, Tableau, Excel (Advanced), SQL

Techniques: Forecasting, Inventory Optimization, Data Visualization, Process Mapping

SOFT SKILLS

Analytical and detail-oriented with strong problem-solving, communication, and cross-functional collaboration skills, adaptable, and customer-focused professional committed to continuous improvement, innovation, and service excellence.

CERTIFICATIONS

Lean Six Sigma Green Belt – Coursera (2023), APICS Certified in Planning and Inventory Management (CPIM) – In Progress, Power BI for Business Analytics – LinkedIn Learning (2024)

ACADEMIC PROJECTS

Blockchain-Based Return & Refund Management

- Automated return validation using blockchain, cutting errors by 30% and speeding dispute resolution.

Order Management System Redesign

- Improved last-mile delivery 20% with AI-based routing and optimized resource allocation.

LEADERSHIP & ACTIVITIES

President, Supply Chain Association

Secretary, American Society for Quality
