Work Authorization: Authorized to work in the U.S. — no employer sponsorship required.

OBJECTIVE STATEMENT

Software Engineer with 4 years of experience developing and modernizing data-driven web applications and APIs. Strong background in backend development, database-backed systems, and modern development practices including containerization, CI/CD, and collaborative version control. Comfortable working across unfamiliar codebases and technologies to improve maintainability, reliability, and long-term sustainability of software systems.

TECHNICAL SKILLS

Languages: Go, Java, Python, SQL, JavaScript

Web & Backend: Spring Boot, Django, REST APIs, gRPC, Microservices

Databases: PostgreSQL, MySQL, Microsoft SQL Server

DevOps & Tools: Docker, Kubernetes, CI/CD, Git, Linux

Practices: Secure development, testing, code review, Agile/Scrum

WORK EXPERIENCE

Scodus Innovations

Kathmandu, Nepal

Backend Developer

02/2022-11/2023

- Developed and maintained data-driven backend services using Go and gRPC, supporting web applications with high-volume database interactions.
- Designed and optimized SQL queries, schemas, and indexes across PostgreSQL and MySQL, improving performance and reliability by up to 40%.
- Collaborated with product and business teams to translate requirements into maintainable system designs, improving data consistency across services.
- Modernized deployment workflows using Docker and CI/CD pipelines to enable automated, repeatable deployments, reducing release cycles by 60% and improving operational stability.

IshaniTech

Lalitpur, Nepal

Java Developer

01/2020-02/2022

- Built and supported Spring Boot web applications with SQL-backed REST APIs for business-critical workflows.
- Refactored existing codebases and optimized SQL queries and ORM mappings, achieving a 35% improvement in query performance.
- Worked closely with cross-functional teams to debug data issues, validate outputs, and improve application reliability.
- Participated in code reviews and implemented automated testing (JUnit, TestNG) in an Agile development environment.

PROJECTS

Smart To-Do List – Python, Django, SQLite, Bootstrap, JavaScript

- Web-based task management application with user authentication, CRUD operations, sorting/filtering, profile management, email notifications, and responsive UI.

Chat System – Go, PostgreSQL, Docker, WebSocket

- Real-time 1-on-1 messaging platform using WebSockets, featuring efficient data storage, message delivery tracking, and containerized deployment.

Web-Scraping System – Go, PostgreSQL, Docker, Gin, GORM, JWT

- Authenticated data ingestion system supporting scraping, storage, querying, and validation with 99.9% uptime.

Transaction Centralization – Flutter, Go, GORM, MySQL, JWT

- Cross-platform mobile app aggregating financial transactions across banking, PSPs, and e-commerce platforms into a unified dashboard.

EDUCATION

Saginaw Valley State University, Saginaw, Michigan

Master of Science in Computer Science & Information Systems (MS-CSIS)

01/2024-12/2025

Pokhara University, Cosmos College, Nepal

Bachelor of Engineering in Computer Engineering (BCE)

09/2017-08/2022

Spoken Languages: Fluent in English, Hindi, Nepali
