

RESUME OF ROEL CANTU

512-806-6885

roel.cantu@yahoo.com

Professional Summary

Technical Skills

- AWS - EC2, Elastic Beanstalk, RDS, S3, Autoscaling, Load Balancing, IAM
- Languages: JavaScript, MySQL, XML, JSON, Java 8, HTML, CSS, Bootstrap
- Frameworks: Angular and ReactJS
- Software: MySQL Developer, VS Code, Git, Eclipse, Spring Tool Suite 4, Java/J2EE
- Servers: Apache Tomcat
- Databases: MySQL, Oracle SQL, Oracle APEX.
- Automation: Jenkins, Selenium, Salesforce

Professional Experience

Veterans Affairs/Booz Allen, Austin, TX

Feb. 19, 2025 – July 25, 2025

Full-Stack Java Developer

- Knowledge of CI/CD Pipelines, Jenkins/GitHub Actions, and Source code repositories, such as Git and GitHub Copilot
- Proficient in Java and Selenium, with experience in building automated test scripts
- Developed and executed automated tests using Selenium, Java, and other industry-standard tools.
- Ensure compliance with Agile methodologies, maintaining detailed process documentation.
- Built responsive, accessible and performant Single-Page Applications using React.js modern technology stack, such as state, props, Rest APIs, components, HTML/CSS, etc.
- Created and Tested the REST Web Services, with Postman and JMeter, within the libraries that support the Microservices.
- Worked with AWS (EC2, Elastic Beanstalk, RDS, S3) to send app to the cloud, Jenkins to maintain constant builds, and Docker to run and contain all applications on the projects.
- Rendered solid technical expertise in Software Development Life Cycle and core Java technologies to develop applications based on specific client requirements.

USAA/TCS San Antonio, TX

Dec. 16, 2024 – Feb 17, 2025

Full-Stack Software Engineer

- Built responsive, accessible and performant Single-Page Applications using React.js modern technology stack.
- Contributed to the change of an existing application to React.
- Created and Tested the REST Web Services with Postman
- Worked with AWS (EC2, Elastic Beanstalk, RDS, S3, IAM) to send app to the cloud, Jenkins to maintain constant builds, and Docker to run and contain all applications on the projects.
- Worked on back-end environment with Java/J2EE, Microservices, Spring MVC, Spring Boot, Maven, GitHub, Linux Commands, Hibernate, MySQL.

AT&T Austin, TX**Aug. 16, 2021 – July 09,2024****Full-Stack Software Engineer**

- Configured multiple libraries for microservices.
- Used AT&T ECO software to create and run pipelines for libraries.
- Participated in the migration of an application from the old legacy application to Azure.
- Assisted with the development of the applications using Jenkins, Git and Maven
- Worked on Java 17 and Spring Boot 3 Upgrade for all libraries.
- Used software, such as Jenkins, ECO Pipelines, Spring Boot, Maven, Git, Java, JFrog, JIRA to create User Stories, Azure, SonarQube, JMeter, Rainmaker, Veracode, and Kubernetes.
- Built responsive, accessible and performant Single-Page Applications using React.js modern technology stack.
- Contributed to the change of an existing application with Angular 16. Created reusable components and used TypeScript, RxJS, Restful APIs, Angular CLI, HTML/CSS, Services, pipes, two-way binding, etc. throughout the project application.
- Created and Tested the REST Web Services, with Postman and JMeter, within the libraries that support the Microservices.
- Worked with AWS (EC2, Elastic Beanstalk, RDS, S3, IAM) to send app to the cloud, Jenkins to maintain constant builds, and Docker to run and contain all applications on the projects.

Veterans Affairs, Austin, TX**June 01, 2020 – Aug. 16 ,2021****Full Stack Java Developer**

- Created front-end applications with technologies, such as Angular 11, HTML, CSS, Bootstrap.
- Worked on back-end environment with Java/J2EE, Microservices, Spring MVC, Spring Boot, Maven, GitHub, Linux Commands, Hibernate, MySQL.
- Developed REST Web Services for client to consume JSON data from databases, such as MySQL, Oracle SQL, and Oracle APEX.
- Used Amazon Web Services, such as Elastic Beanstalk, EC2, RDS, and S3 to deploy applications to the cloud.
- Worked with Jenkins, Docker, and Kubernetes practices for continuous delivery with high quality software.

SkillStorm Commercial Services, Lake Mary, FL**Nov. 2019-April 09, 2020****Full Stack Java Developer**

- Java/JEE, HTML, CSS, JavaScript, MySQL, ReactJS, REST, Angular 11, Spring MVC, Spring Boot, Spring Data JPA, and Hibernate.
- Worked with Hibernate, Spring MVC, MySQL, Java/J2EE (Java 8), React, REST APIs, and Spring Boot on project.
- Used Spring MVC, Spring Boot, Docker, Jenkins, AWS (EC2, IAM and RDS), Lambda Expressions, Angular 8, Bootstrap, HTML, Microservices, MySQL, and CSS, and Pair Programming for several projects at Skillstorm.
- Added functionality to current projects and created client-side features with JavaScript, Angular 8, and ReactJS.
- Developed database, tables, queries, views, and stored procedures with MySQL. Connected to Java Spring Boot projects with hibernate and MySQL
- Worked with Java/J2EE and Maven to add functionality, REST APIs, and dependencies to the Web Applications.
- Worked with AWS (EC2, Elastic Beanstalk, RDS, S3) to send app to the cloud, Jenkins to maintain

constant builds, and Docker to run and contain all applications on the projects.

- Created test cases with JUnit and used Test-Driven Development (TDD) to make sure all features were working as expected.
- Knowledgeable and exposed to technologies, such as AWS S3 and EBS, Unix commands, CI/CD Integration, Docker, Jenkins, and SOAP.
- Used GitHub as host for version control to commit projects to the repository.

Apex Systems/Accenture, San Antonio, Texas

Aug.2019-Oct. 2019

Java Developer

- Worked in a application with frameworks, Tools, and Databases, such as Java/J2EE (Java 8), Oracle APEX, Spring MVC, Spring Boot, ReactJS, JavaScript, HTML, CSS, REST, Spring MVC, Spring Boot, and MySQL.
- Tested USPS web pages with HP UFT Automation Tool.
- Created SQL queries to retrieve matching bar codes to receptacles.
- Created business components for testing Military and Civilian Bar Codes.
- Quality Assured co-workers tests and code.

Infosys Limited, Dallas, Texas

Sept. 2018-Mar. 2019

Technology Analyst

- Develop, design, code, test, debug, document, and install programs.
- Design, implement and maintain Java application within all phases of the Software Development Life Cycle (SDLC).
- Worked in a application (CRM) with frameworks, Tools, and Databases, such as Java, ReactJS, JavaScript, HTML, CSS, REST, Spring MVC, Spring Boot, and MySQL.
- Solid CS fundamentals: OOP, data structures, etc.,
- Provide technical support and consultation for Java web services application and infrastructure questions.
- Identify opportunities to fine-tune and optimize applications of Java Web Services developed projects.

APEX Systems/Lockheed Martin, Fort Worth, Texas

Jan. 2018-Aug. 2018

Java Back-End Developer

- Developed programs in Angular 6, Java/J2EE, JavaScript, Spring, REST Web Services, Hibernate, HTML, CSS, Bootstrap, and SQL.
- Develop application program logic from customer-defined specifications.
- Design, implement and maintain Java applications within all phases of the SDLC.
- Develop, design, code, test, debug, document, and install programs.
- Knowledge of source control concepts and tools, such as Git and Maven.
- Solid CS fundamentals : OOP, data structures, design patterns, etc.,
- Imported and exported Excel files through Java and SQL.

Education

- Bachelor of Science in Information Technology, University of Phoenix, Jan. 9, 2012
- Concentration: Software Engineering
- I received a Bachelor's Degree in Software Engineering Technology with a 3.53 GPA.
- Associates Degree in Biomedical Technology, Texas State Technical College
Dec. 2006

- I received an Associate's Degree in Biomedical Equipment Technology with a 3.50 GPA.
- Dean's list twice
