

Xiaowen (Tony) Tang

707-908-7369 | xiaowt@umich.edu | 1816 STADIUM PL, APT 11, ANN ARBOR, MI 48103

EDUCATION

UNIVERSITY OF MICHIGAN

Ann Arbor, MI

STEPHEN M. ROSS SCHOOL OF BUSINESS

Master of Business Analytics, May 2026

GPA: 3.5

- Relevant Coursework: Advanced Spreadsheets, Predictive and Prescriptive Analytics, Data Exploration and Visualization, Data Architecture and Acquisition, Software Teams and Project Management, Causal Inference.

UNIVERSITY OF WASHINGTON

Seattle, WA

Bachelor of Science in Economics, Minor in Business Administration, June 2025

GPA: 3.7

- Relevant Coursework: Computational Finance, Business Finance and Information Systems, Empirical Industrial Organization, Econometrics and Data Science, Advanced Scientific Computing.

PROFESSIONAL EXPERIENCE

GUANGZHOU RURAL COMMERCIAL BANK, Guangzhou, China

Credit Risk Analyst Intern

June 2022 – August 2022

- Conducted exploratory data analysis using Excel and Python (pandas) to identify repayment and cash-flow patterns, supporting credit decision-making and loss mitigation.
- Queried, cleaned, and structured financial, transactional, and credit datasets using SQL Window Functions, evaluating key financial ratios (e.g. DTI, current ratio, interest coverage) for 30+ loan applicants daily to support underwriting and operational risk decisions.
- Co-developed early-warning indicators with underwriting teams using SAS/SQL extracts and Excel (Power Query + VBA automation), improving high-risk account identification by 18%.
- Built Tableau and Excel dashboards to visualize performance, delinquency, and default metrics, enabling senior leadership to monitor portfolio operations and make data-driven decisions.

HIRAIN TECHNOLOGIES, Beijing, China

Human Resource Analyst Intern

October 2023 – December 2023

- Analyzed recruitment pipeline data using Dayee (Workday-like ATS), producing operational reports to improve hiring efficiency.
- Maintained and analyzed workforce performance datasets in Excel, supporting operational capacity planning and performance optimization, driving a 17% improvement in key metrics.
- Managed and optimized an SQL-based employee database, processing 100+ daily record updates and applying CTEs, stored procedures, and query optimization to enhance data accuracy and operational efficiency.
- Designed interactive KPI dashboards in Excel and Tableau, enabling managers to track workforce operations and make data-driven decisions, improving efficiency by 15%.

WOODWARD, MI, USA

Data Analyst

January 2026 – April 2026

- Designed and developed Power BI dashboards for a Supply Chain Control Tower, integrating demand, supply, inventory, cost, and delivery metrics to support IBP/SIOP planning and operational decision-making.
- Analyzed reporting gaps and performance bottlenecks, identifying opportunities to improve forecasting accuracy and inventory optimization decisions.
- Partnered with supply chain and operations stakeholders to translate business questions into analytical dashboards and KPIs.

RELEVANT PROJECTS

Profit-Maximizing Decision Rules and Prescriptive Analytics in Peer-to-Peer Lending (Skills: R: Machine Learning, Predictive & Prescriptive Modeling)

Department of Economics, University of Washington | Spring 2025 (team of four)

- Reconstructed missing borrower attributes in rejected loan files using LASSO, GAM, and multinomial logistic regression, enabling consistent risk modeling across millions of records; simulated defaults and recoveries to uncover key drivers of credit risk.
- Reverse-engineered Lending Club's rejection rules with classification trees and random forests, then built a profit-maximizing approval strategy by integrating predicted default risk, recovery rates, and expected returns, significantly increasing portfolio profitability.

Lululemon Sales and Operations Analytics Dashboard (Skills: Alteryx, Power BI, SQL, ETL, Data Visualization)

Ross School of Business, University of Michigan | Fall 2025 (team of five)

- Built an automated analytics pipeline by integrating Alteryx ETL workflows with Power BI dashboards to cleanse, transform, and forecast retail sales and inventory data from SQL and CSV sources, reducing manual reporting time by 70 percent.
- Developed optimized Power BI data models and DAX-driven visualizations to track regional trends, product performance, and demand forecasts for Lululemon's retail operations.

SKILLS

- SQL, Python, R, Power BI, Tableau, Alteryx, Excel (Power Query), MATLAB, Stata, Java, RShiny, Microsoft Office Suite
