SUMMARY

Business Analyst with hands-on experience in Oracle EBS R12, specializing in A2R and PJ2P process enhancements. Skilled in process mapping, data analysis, and optimizing financial modules such as General Ledger, Receivables, and Cash Management. Proven ability to collaborate with business and management teams to diagnose issues and drive IT system improvements, ensuring efficient ERP operations and data-driven decision-making.

EDUCATION

University Of Arizona

Master's of Science, Business Analytics

May 2025

Reva University, India

Bachelor of Technology, Computer Science and Engineering

Jul 2022

WORK EXPERIENCE

ACCENTURE

Jul 2022 - Jul 2024

Package Application Developer

INDIA

- Enhanced A2R and PJ2P processes by leveraging Oracle EBS R12 modules, including Payables, and collaborating with business members to streamline P2P workflows through effective process mapping and requirements gathering, improving invoice processing efficiency.
- Optimized operational efficiency by customizing Oracle modules such as Purchasing, Inventory, and Accounts Payable to drive improvements in both supply chain and financial reporting, aligning with Projects to Profit requirements.
- Engaged with business stakeholders to perform requirements gathering and data analysis for supplier response in the RFQ process, utilizing Oracle ERP and Excel to support informed sourcing decisions in financial operations.
- Resolved data discrepancies and approval bottlenecks within P2P workflows by applying data analysis and change management techniques in Oracle E-Business Suite, reducing PO-to-Invoice matching errors by 15% and supporting accurate financial reporting.
- Developed SQL and PL/SQL scripts to automate critical supply chain and financial operations, supporting enhancements to Oracle EBS functionality while reducing manual effort.
- Coordinated with IT and business stakeholders to integrate SCM modules with Finance and Inventory systems, aligning Oracle EBS enhancements with business requirements and reinforcing A2R objectives.
- Performed SQL-based performance tuning and conducted data integrity checks on inventory transactions, receipts, and supplier invoices to optimize system reliability for financial operations including Cash Management and Receivables.
- Enhanced Oracle EBS system performance through advanced SQL, PL/SQL, and report generation, ensuring sustained support and timely enhancements of financial modules such as Payables and Fixed Assets.

PROJECTS

AI-Driven Predictive Maintenance System

University of Arizona, Eller College of Management

- Designed and deployed an AI-powered predictive maintenance system for EcoIntelli, enhancing operational efficiency through real-time monitoring and failure prediction.
- Implemented machine learning algorithms to detect anomalies and forecast equipment breakdowns, reducing downtime and optimizing resource allocation.
- Utilized AWS IoT for real-time sensor data collection and Apache Hadoop for big data processing.
- Visualized maintenance KPIs through dashboards built in Power BI and Tableau, enabling data-driven decisions.
- Ensured regulatory compliance by generating automated sustainability reports using AI insights and ChatGPT-driven analytics.
- Led documentation and stakeholder communication using strategic content generated with AI tools.

Credit Risk Analysis and Modeling

University of Arizona, Eller College of Management

- Analyzed a dataset of 36,000+ credit applications to identify key demographic and financial factors affecting creditworthiness.
- Applied statistical modeling in R and Python to segment clients based on risk categories and tailor lending strategies accordingly.
- Developed interactive dashboards in Tableau to present credit risk insights to stakeholders.
- Proposed data-driven recommendations to optimize credit policies, minimizing default risk and enhancing decision-making.
- Conducted data preprocessing and feature engineering in Excel and Python for enhanced model accuracy.

Public News Droid – News Aggregator Application

REVA University

- Developed a mobile-first news platform with role-based access control and multi-factor authentication using Firebase Authentication.
- Enabled real-time database synchronization for instant news updates using Firebase Realtime Database.
- Implemented push notification systems through AWS SNS and OneSignal, improving user engagement by 30%.
- Built a structured content management system with keyword tagging, event categorization, and user-based personalization.

- Designed a clean and responsive front-end interface using Flutter, HTML, CSS, and JavaScript.

Surveillance Camera with Motion Detection and Remote Access

REVA University

- Engineered motion detection algorithms to enhance real-time security alert systems.
- Integrated infrared night vision to improve visibility in low-light conditions, significantly increasing monitoring effectiveness.
- Built a web-based UI for remote camera configuration, enabling secure access and camera control via mobile and desktop.
- Applied encryption protocols and performed vulnerability assessments to ensure compliance with security standards and protect sensitive data.

SKILLS

- **Core Skills:** Machine Learning, Data Visualization, Data Handling, Data Modeling, Fundamentals Of Generative AI, Data Cleaning And Preparation, Statistical Analysis, Oracle E-Business Suite, Oracle ERP, Data-Base Management, Supply Chain Management
- **Programming Languages:** C, Python, Java, HTML, R Coding, SDLC, Agile
- **Data Analysis:** Pandas, Numpy, Matplotlib, Seaborn, Scikit-Learn
- **Machine Learning:** Logistic Regression, Decision Trees, KNN, Neural Networks
- **DataBase:** SQL, PLSQL, Oracle EBS, Toad
- **Tools And Frameworks:** Tableau, Power BI, Hex, Apache Kafka, Gsuite, Spark, Hadoop, Confluence, Microsoft Excel, Word, PowerPoint
- **Project Management:** SDLC, Agile, Scrum, Kanban, JIRA, Notion, Slack
- **Business Analysis:** Requirements Gathering, Change Management, Process Improvement
- **Oracle EBS Modules:** General Ledger, Payables, Receivables, EBtax, Fixed Assets, Cash Management, AGIS, Cost Management
