SUMMARY

Solutions-oriented software engineer with experience in full-stack development, strong background in STEM. Experience in patents, international regulations, marketing, sales, customer service, and management of chemical reagents. Over 5 years start-up and academic experience. Committed to high quality work on cross-functional, interdisciplinary, international teams.

PROFESSIONAL EXPERIENCE

Sonos, Santa Barbara, CA — EU Cyber Security Engineer Oct 2024 – August 2025

- Regulatory cyber security documentation for various products, specialized in EN documentation and review.
- Internship work that led to working directly with the Software Engineering Leads to ensure full compliance.

Oakhalo, San Francisco, CA — Fullstack Developer / Freelancing May 2023 – Present

- Golden Ratio Analytics Services Contractor working on a humanitarian relief web application with React.js, designing a mapping interface.
- Dockerized the web application with the deployment system, routing information Interfaced in Neo4j.

Insitro, South San Francisco, CA — Associate Scientist July 2021 – August 2022

- Developed robust protocols for high-throughput scalable, neurodegenerative disease models
- Motor Neuron (ALS, Parkinsons, Alzheimer) culture for downstream assay development and cross team training

Gigagen/Gigamune, South San Francisco, CA — Research Associate February 2018 – June 2021

- Patent review and summarizing findings to determine novel CRISPR enzyme eligibility for unlicensed use
- Single Cell antibody and T cell discovery platform to find novel treatments for cancer, toxins and infectious diseases

Wyatt Technology, Santa Barbara, CA — Administrative Assistant May 2017 – February 2018

- Assisted Marketing: 2018 Trade Show coordination and the 2017 Global Sales Meeting logistics.

Kliebenstein Laboratory, UC Davis — Undergraduate Researcher October 2014 – August 2016

- Main genetics projects: Glucosinolate Secondary Metabolism, Heterozygosity Project and Y1H Primary Metabolism

Eucalyptus Systems, Santa Barbara, CA — Administrative Assistant May 2012 – October 2014

- Collaboration with various departments: engineering, accounting, HR, finances, office manager

EDUCATION

Hackbright Coding Academy — San Francisco, CA December 2022- March 2023

- Accelerated, 12-week Software Engineering program aimed at supporting diverse groups entering into Computer Science

Bachelor of Science in Cell Biology — University of California, Davis September 2014 – June 2016

- Cellular Biology including statistics and data analytics, for the purpose of genetics scientific research

Biology — Santa Barbara City College September 2012 – May 2014

- General lower level biology program, participated in various education programs to increase women in STEM

CERTIFICATION / additional

LinkedIn: Typescript, Next.js, Agile Foundations, CSS Essential Training, Github, SQL (Postgres, SQLite), Docker, React.js, General AI, D3.js, Software Developer Programming, Node.js

PROJECTS

Nautical Tours <https://github.com/Nelson00011/NauticalTours>

Boating Tours web application using: Flask, Javascript, Jinja, Bootstraps, PostgresSQL, SQLAlchemy, Python

Boho Bags <https://github.com/Nelson00011/boho>

Ecommerce application with Boho fashion designs utilizing: REACT.js, Strapi.js, MUI, Node.js, Formik, Stripe

EventApp <https://github.com/Nelson00011/EventMulti>

Event application to allow logged in users to update gating details in REACT.js, MUI, Node.js, Express.js

SKILLS

Languages: Javascript (AJAX, JSON), Python, R, HTML, CSS, Typescript

Frameworks,
Databases: Flask, JQuery,

Bootstrap, Material UI, MongoDB, SQLAlchemy, PostgreSQL, SQL, REACT.js, Express.js, Strapi.js, Node.js, Next.js, Firebase

Source Control: Git, Github.

Generic Skills: R studio, Excel, FlowJo ImageJ, Serial Cloner, Microsoft Office, PRISM, CRM, LIMS, Benchling.com, Discord, Slack, Lucid Charts.
