PROFESSIONAL SUMMARY

Supply Chain Analyst with 4+ years of experience driving large-scale supply chain optimization across retail and manufacturing environments. Proven expertise in demand forecasting, inventory optimization, S&OP, procurement analytics, and logistics optimization, supporting operations managing \$100M+ inventory portfolios. Strong background in SAP (ERP, HANA, IBP), Power BI, Tableau, SQL, and Advanced Excel, with a track record of delivering double-digit cost reductions, service-level improvements above 95%, and inventory efficiency gains of up to 20%. Adept at partnering with cross-functional stakeholders in fast-paced, data-intensive US enterprise environments.

SKILLS

- Supply Chain & Operations:** Demand Forecasting | Inventory Optimization (EOQ, Safety Stock, JIT) | S&OP | Procurement Analytics | Supplier Performance Management | Logistics & Transportation | Warehouse Operations | Risk Mitigation | Cost-to-Serve Analysis
- Data & Analytics:** Advanced Excel (VBA, Power Query, PivotTables) | SQL (SQL Server, MySQL) | Python | Statistical Analysis | A/B Testing | KPI Design & Management | Forecast Accuracy (MAPE, Bias)
- Enterprise Systems & Platforms:** SAP ERP (MM, SD) | SAP HANA | SAP IBP – Demand Planning | Transportation Management Systems (TMS) | Ariba
- Visualization & Reporting:** Power BI | Tableau | Executive Dashboards | Automated Reporting | Data Governance
- Process Improvement & Leadership:** Lean & Continuous Improvement | Root Cause Analysis (5 Whys, Fishbone, FMEA) | Value Stream Mapping | Project & Change Management | Stakeholder Engagement

WORK EXPERIENCE

Walmart, USA

Oct 2024 – Current

Supply Chain Analyst

- Led inventory planning and replenishment analytics for a \$250M+ multi-category retail portfolio across high-volume, multi-node US distribution networks, optimizing working capital while sustaining 98% in-stock performance across priority SKUs.
- Improved overall inventory efficiency by 15% by recalibrating EOQ, safety stock, and replenishment parameters, reducing carrying costs and excess inventory without compromising service-level agreements.
- Drove \$8M+ (~10%) reduction in excess and obsolete inventory by leading ABC/XYZ SKU segmentation in partnership with merchandising and operations teams, enabling value- and variability-based inventory prioritization.
- Increased demand forecast accuracy by 12% (MAPE reduction) by optimizing SAP IBP Demand Planning, integrating promotional uplift modeling, seasonality, and historical sales trends to improve supply-demand alignment.
- Designed and deployed executive-level Power BI dashboards tracking inventory turnover, order cycle time, fill rates, and supplier lead-time variability, reducing manual reporting effort by 70% and enabling near real-time decision-making.
- Led a US-focused multi-echelon inventory optimization (MEIO) initiative, analyzing millions of transaction records using SQL and Excel to model demand volatility and lead-time risk, delivering \$12M+ in annual safety-stock savings while maintaining >95% service levels.

Endurance Technologies, India

Jan 2020 – Jul 2023

Supply Chain Analyst

- Led end-to-end supplier performance analytics for 200+ global vendors using SAP MM and Tableau, improving on-time delivery by 15% across automotive component supply chains and strengthening supplier compliance and accountability.
- Automated SKU-level demand, inventory, and supply chain reporting using Excel VBA and advanced analytics, reducing reporting cycle time by 60% and enabling leadership with faster, data-driven forecasting and capacity decisions.
- Optimized transportation and logistics operations by implementing TMS-driven route planning and real-time shipment tracking, reducing freight costs by 12% (~\$300K annually) while improving regional delivery reliability.
- Facilitated cross-functional S&OP cycles across sales, planning, and production, increasing forecast accuracy by 15% and reducing critical component stockouts by 10%, aligning demand with production capacity.
- Designed and executed A/B testing for demand forecasting models and reorder strategies, reducing excess inventory by 18% while maintaining Greater than 95% customer service levels and improving working capital efficiency.
- Applied Lean and continuous improvement principles to shop-floor material flows and reporting processes, eliminating non-value-added activities and delivering \$50K+ in annual cost savings (~15% of departmental budget), while leading a successful SAP HANA reporting rollout with 95% user adoption in under 2 months.

EDUCATION

Master's in Information Systems

May 2025

Pace University, New York, USA
