

Education

University of Cincinnati	Cincinnati, Ohio
Master of Science, Business Analytics	August 2026
Certificate in Artificial Intelligence in Business	
De La Salle Lipa	Lipa, Philippines
Bachelor of Science, Information Technology	April 2014

Skills

Technical Skills	Analytical & Business Skills
- Power BI & Tableau – Interactive Dashboards, DAX, Power Query - Excel – Advanced Functions, PivotTables, VBA - SQL – Data Extraction & Transformation - AI-Assisted Analytics & AI Agents – LLM-based agent concepts, prompt engineering, and task automation - Python & R – Basic proficiency (data wrangling, descriptive statistics)	- Data Analysis & Visualization (Power BI, Tableau, Excel) - Forecasting & Trend Analysis - Management Reporting & KPI Development - Process Improvement & Internal Controls

Professional Experience

DATA ANALYST II – GOPRO	June 2022 – April 2025
Business Intelligence & Executive Reporting – Led end-to-end BI initiatives delivering automated dashboards for sales forecast vs. actuals, competitor benchmarking, and KPI performance used by senior leadership. ETL & Data Preparation – Performed data extraction, transformation, and validation from multiple source systems to produce clean, reliable datasets supporting dashboards and reporting layers. Dashboard Automation & Optimization – Designed and deployed scalable dashboards using Power BI and Excel, reducing manual reporting by 50% and improving reporting accuracy and turnaround time. Performance Analysis & Insights – Conducted trend, variance, and comparative analysis to identify risks and opportunities, supporting data-driven forecasting and planning decisions.	
DATA ANALYST – COHU INC.	August 2021 – June 2022
Manufacturing Performance Reporting – Developed dashboards and KPI reports focused on shipment execution, revenue (plan vs. actual), backlog, on-time delivery (OTD), and lead-time performance using Excel and Power BI. Manufacturing Revenue, Shipment & Execution Analytics – Built reports tracking weekly shipment trends, intercompany vs. third-party revenue, and execution risks across critical and non-critical customers to support operations reviews. Production & Resource Analytics – Analyzed manpower, machine utilization, and total work hours to support production planning and improve on-time order fulfillment by 15%. Production & Material Forecasting Support – Built monthly, quarterly, and annual forecasting reports for raw material requirements to support production planning and execution.	
PURCHASING ANALYST OFFICER – FUNAI ELECTRIC PHILIPPINES INC.	June 2016 – November 2020
Reporting & Data Visualization – Built standardized management reports and dashboards to support material planning, cost tracking, inventory visibility, and management reviews. Manufacturing & Planning Data Analysis – Worked extensively with BOM and BOP structures, incorporated ECN updates, and used MRP outputs to ensure material, cost, and planning data were accurately reflected in reports. Material Costing & Forecasting Analysis – Performed monthly material cost calculations and forecasting, updating cost and planning reports as BOM, pricing, or volume changes occurred. Operations & Process Improvement – Supported supply chain and warehousing process improvements through data analysis and documented standard operating procedures. Inventory Accuracy & Reporting Improvements – Improved inventory accuracy to 90% through discrepancy analysis, reporting enhancements, and audit support.	
SUPPLY CHAIN ANALYST – B/E AEROSPACE	September 2015 – February 2016
Operational & KPI Reporting – Prepared periodic operational and KPI reports for plant-level and senior management reviews. Material Planning & Forecasting – Forecasted raw material requirements on a monthly, quarterly, and annual basis and analyzed forecast vs. actual performance.
