EXPERIENCE

Boehringer Ingelheim

Jan 2025 – Jul 2025

MSAT Process Validation Co-Op

Fremont, CA

- Authored and compiled 10+ CMC validation dossiers, ensuring batch documentation completeness, accuracy, and cGMP compliance per 21 CFR 211, directly supporting CMC section requirements for regulatory submissions and product release readiness.
- Drafted comprehensive CMC control strategy summary, supported data mapping and performed statistical trending analyses for Continuous Process Verification (CPV) reporting, directly supporting Module 3 documentation requirements and strengthening regulatory oversight of product and process status.
- Collaborated cross-functionally with MSAT, QC and QA to compile analytical data, manufacturing records, and control strategies for validation dossiers, ensuring file-ability and regulatory acceptance of CMC documentation.
- Designed and implemented an Excel-based data tracking system for Continuous Process Verification, enabling real-time visibility of analytical results, reducing data verification time by 60%.
- Coordinated FDA and ANVISA audit responses by staging, verifying, and compiling CMC analytical documentation, ensuring confidentiality and proper redaction, and tracking all audit documentation to maintain inspection-ready regulatory records.
- Supported CAPA and deviation management by investigating manufacturing quality events, experience directly applicable to managing post-approval CMC variations and quality event documentation.

InstantDetect Solutions, Inc.

Sep 2025 – Dec 2025

Regulatory Affairs Associate - Capstone

Remote, USA

- Evaluated FDA quality system and design control requirements (21 CFR Part 820) for Class IIa medical device development, ensuring alignment with QMS expectations.
- Assisted in developing risk-based regulatory strategy integrating design verification and clinical validation.
- Collaborated with team to draft clinical trial quality framework, emphasizing data integrity, traceability, and compliance with Good Documentation Practices (GDP).
- Conducted gap assessment of documentation and processes against FDA 21 CFR Part 820 and ISO 13485 standards to identify documentation improvements in data traceability, control systems, and regulatory compliance readiness.

Glenmark Pharmaceuticals

May 2022 – Aug 2022

Regulatory Affairs CMC Intern

Mumbai, India

- Evaluated and compiled comparative CMC analysis of 8+ ANDAs and ICH Q7-Q10 guidelines, creating detailed eCTD Module 3 analytical requirement summaries for 3 active pharmaceutical development programs, building foundational expertise in Module 3 structure, content, and formatting requirements.
- Reviewed and compiled 20+ CMC quality system documents including SOPs, change controls, manufacturing batch records, and CAPA protocols; identified 3 documentation gaps and supported corrective action proposals ensuring CMC records meet cGMP standards and regulatory filing requirements.
- Partnered with QA Project Leads to compile vendor qualification audit reports for 3 critical API suppliers, evaluating quality systems and documenting compliance findings to support Module 3.2.S.
- Supported compilation of analytical method validation data and specifications documentation for Module 3 CMC sections, ensuring alignment with ICH guidelines and regulatory expectations for identity, purity, quality, and strength testing requirements.

Sen-Jam Pharmaceutical

Sep 2024 – Dec 2024

Regulatory Affairs Intern - Experiential Project

Remote, USA

- Developed comprehensive regulatory strategy utilizing 505(b)(2) pathway, incorporating CMC considerations for manufacturing controls, analytical methods, and Module 3 documentation requirements to support accelerated development timelines while maintaining quality standards.
- Designed global submission plans for 3 major regulatory regions and created regulatory requirement matrix comparing 20+ compliance elements across jurisdictions, including quality system expectations and GMP standards.
- Created risk management plan covering manufacturing, CMC documentation, and regulatory compliance risks across 6 development phases, enabling streamlined lifecycle management while maintaining quality and regulatory standards for post-approval variations.

EDUCATION

Northeastern University

Masters in Regulatory Affairs, GPA 3.94

Dec 2025

Boston, MA

Manipal College of Pharmaceutical Sciences

Bachelors in Pharmacy

May 2023

Manipal, India

ACADEMIC PROJECTS

- Led team of 8 to develop and compile GMP manufacturing documentation including SOPs and control strategies for herbal-based pharmaceutical product completing project 2 months ahead of schedule.
- Developed NDA lifecycle strategy for Gabapentin including post-approval CMC variation planning, annual report requirements, and submission timelines. Created budget models and post-marketing strategies.
- Authored regulatory documentation including Investigator's Brochure, Breakthrough Designation Request with manufacturing and control summaries, and Pre-IND meeting materials for combination products, reinforcing Module 3 authoring and structured CMC documentation expertise.

SKILLS

Quality Systems & Documentation: Control Strategy Documentation, Batch Record Review and Compilation, GDP, Quality Event Management, Process Validation Documentation, Change Control and CAPA Documentation, Gap Assessment and Risk Management

Cross-Functional Project Management: Collaboration with Manufacturing, QC, QA, and R&D Teams, Multi-functional Meeting Coordination and Review Sessions, Submission Document Compilation and Review Meetings, Vendor Qualification and Supplier Audits

Core Competencies: Technical Writing and Authoring, Statistical Analysis and Trending, Veeva Vault, TrackWise, LIMS, MES, MS Office Suite, Root Cause Analysis, Attention to Detail and Accuracy, Six Sigma Green Belt (Expected Completion: End of Jan 2026)

LEADERSHIP EXPERIENCE

Wollaston's

Inventory and Quality Supervisor - Deli

Jan 2024 – Dec 2025

Boston, MA

- Fostered collaborative team environment across 6-member shift team, reducing operational errors by 25% through quality oversight and on-the-floor quality monitoring experience translating directly to regulatory team collaboration.
- Delegated responsibilities and managed project timelines across team members, reducing fulfillment time by 30% and inventory discrepancies by 40% through, labeling accuracy, and inventory review processes.

Manipal College of Pharmaceutical Sciences

College Soccer Team Captain

May 2021 – May 2023

Manipal, India

- Led 25-member team demonstrating project management, coordination with stakeholders, and ability to operate in fast-paced, dynamic environments requiring quick decision-making and collaborative problem-solving.
- Managed complex logistics including registrations, travel coordination for 8+ events, and budget allocation within \$1000 annual budget, reinforcing planning, organization, timeline management, and documentation discipline applicable to regulatory project management.
- Mentored 12 junior players through structured development program, improving technical skills and game strategy understanding, resulting in 3 players advancing to inter-university championships.
