

Manasa Srija Siddula

+1 (857)565-7863 | manasa.siddula@utdallas.edu | [Linkedin](#)

Summary

Data-driven graduate student in Information Technology and Management with hands-on experience designing end-to-end data pipelines, ETL workflows, and Big Data solutions. Proficient in Python, R, SQL, Spark, Hive, HDFS, AWS Cloud, MongoDB, and Tableau, with strong expertise in data modeling, time-series analysis, and scalable analytics system design. Seeking Data Engineer / Data Analyst roles.

Skills

Languages & Tools: Python, R, SQL, Advanced Microsoft Excel, JIRA

Data Analysis & Statistics: Data Wrangling, Exploratory Data Analysis (EDA), Hypothesis Testing, Regression Analysis, A/B Testing, Time-Series Analysis

Databases: HiveQL, MySQL, MongoDB

Cloud & Big Data: AWS Cloud(S3, Redshift), Databricks, Hadoop, Apache Spark(Pyspark), Snowflake

Data Visualization & BI Tools: Tableau, Power BI, Advanced Microsoft Excel (Pivot Tables, Power Query)

Certifications & Training: AWS Cloud Practitioner

Experience

The University of Texas at Dallas, Richardson, TX

August 2024 - Present

Graduate Teaching Assistant

- Collaborated with International Business faculty to plan and deliver course content for 230+ students, helping increase lecture engagement and clarity through structured support and content coordination
- Evaluated assignments, quizzes, and presentations for 230+ students, ensuring 100% on-time grading and improving academic feedback quality and consistency
- Facilitated weekly office hours and one-on-one guidance, answering 50+ student queries per week on global markets, trade concepts, and international strategy, increasing student performance and confidence

Education

THE UNIVERSITY OF TEXAS AT DALLAS, Richardson, TX

August 2024 - May 2026

Master of Science in Information Technology and Management

ANDHRA UNIVERSITY, Visakhapatnam, IN

August 2019 - July 2023

Bachelor of Engineering in Civil Engineering

Projects

COVID-19 Data Exploration

- Created complex SQL queries using joins, window functions, and aggregate operations on a dataset with 20+ columns and 1M+ records to extract actionable insights on global COVID-19 trends.
- Designed interactive Tableau dashboards to visualize regional trends and enable data-driven decision-making

Big Data Fleet Risk Analytics (HDFS | Hive | Sqoop | Impala | Tableau)

- Built a scalable Big Data pipeline by transforming geolocation datasets using Spark, migrating structured data to Hive via Sqoop, and querying through Impala/Tableau to deliver interactive fleet risk dashboards and operational analytics
- Optimized data storage and query performance by designing partitioned Hive tables and leveraging Impala for low-latency queries, achieving a 60% reduction in query execution time, 50% decrease in data scan volume, and 65% faster dashboard response times, enabling interactive fleet risk dashboards and actionable operational insights..

COVID-19 OTT & Box Office Data Engineering Project (Python | ETL | Tableau)

- Constructed scalable data preparation workflows using Python and Tableau to analyze COVID-driven entertainment trends, delivering reliable structured data for analytics and uncovering major shifts in box office and streaming performance
- Designed an animated Tableau visualization for OTT platform user growth (Netflix, Disney+, Hulu) using time-based transitions and filters, enabling intuitive analysis of subscriber trends and accelerating insight into streaming adoption during and post-COVID periods

Real Estate Price Prediction Web App (Python | Flask | Pandas | NumPy | HTML/JS)

- Implemented data pipeline for preprocessing (outlier removal, feature engineering, dimensionality reduction) using Pandas and NumPy
- Deployed Linear Regression model via Flask API and connected it to a responsive HTML/JS frontend for real-time inference
