

Kim Ngoc Nguyen

(949) 430 9045 | soudunno@gmail.com | [Linkedin](#) | [Portfolio](#) | Garden Grove, CA, USA

EDUCATION

California State Polytechnic University, Pomona

Master of Science in Business Analytics (GPA: 3.88/4.00)

Aug 2023 – Aug 2025

Vietnam National University - International University

Bachelor of Engineering, Logistics and Supply Chain Management (*Full BIDV scholarship*)

2018 - 2022

EXPERIENCES

Samsung Electronics America

Logistics Analyst

California, USA

Nov 2025 – present

- Pulled daily outbound logistics data from WMP, validated shipment and order status, and integrated datasets into Power BI dashboards for operational tracking
- Transformed and standardized data using Excel (Power Query, PivotTables, advanced formulas) and integrated datasets into Power BI dashboards for outbound performance tracking
- Designed and maintained Power BI reports for daily outbound operations, enabling fast visibility into forecasting reports
- Analyzed shipment exceptions and trends; partnered with 3PLs, warehouse teams, and internal stakeholders to resolve issues and improve outbound execution

TRUMPF Inc.

Sales Data Analyst Intern

California, USA

Jan 2025 – Aug 2025

- Developed and automated US-wide sales reports using Excel and Power BI (DAX & Power Query), covering KPI metrics, conversion rates, etc. eliminating 100% of manual reporting process with drill-downs and drill-through analytics
- Collaborated cross-functionally with sales, analytics and operational teams to deliver customer and competitor insights, supported strategic decision-making and assisted in securing \$2M sales revenue for one order
- Designed SQL-based queries to support ad hoc reporting and market analysis, developed Power Automate workflows to streamline internal tracking and automate daily updates in the US Sales dashboard, saving ~5 labor hours per week
- Maintained and validated operational and CRM data (SAP & C4C), supporting regional managers with accurate insights into 16K+ sales records, demo rates, and sales targets for Western regions

First Source Marketing Alliance

Financial Analyst (Consulting)

California, USA

Nov 2023 – Nov 2024

- Directly communicated with clients, filed individual tax returns and prepared audit documentation across multiple states, maintaining 99% client satisfaction through accurate compliance with federal and state regulations
- Created monthly P&L reports and tracked key performance indicators to evaluate operational performance, conducted variance analysis between actuals and budget, pricing assistance
- Analyzed large datasets for reconciliation issues; uncovered trends, opportunities, flagged inconsistencies and created actionable solutions based on advanced analytics for stakeholders
- Delivered financial analysis and strategic reports to stakeholders using Tableau dashboards; supporting budgeting, forecasting, revenue optimization and investment decisions through clear data visualization and performance insights

FICO Tay Ninh Cement JSC

Supply Chain & Procurement Specialist

HCMC, Vietnam

June 2022 – Aug 2023

- Streamlined the bidding process and reduced vendor selection time with market analysis and proposed supplier assessment for the team, achieving annual cost savings of 13% on lubricants and 18% on forwarding services
- Executed contracts, SLA agreements and purchase orders with domestic and international vendors for POSMs, marketing services, spare parts and consumables—consistently delivering 10% under budget and ahead of deadlines
- Performed demand planning and inventory analysis to optimize procurement and stock levels, ensuring efficient and sustainable supply chain operations, minimizing excess inventory costs
- Oversaw inbound and outbound logistics planning; handled customs clearance, reverse logistics and claims coordination, vendor invoicing for domestic and international shipments

SKILLS

Programming & Query Languages: SQL (MySQL, PostgreSQL, Microsoft SQL Server), Python, R, C++, C#, Matlab, PySpark

Tools & Platforms: Power BI, Tableau, Looker Studio, SAP, Infor VISUAL, SmartView, C4C, Excel (PivotTables, Power Query, VBA), Visio, Google Cloud Platform, Apache Spark, Hadoop, SSIS, SSAS, Jupyter Notebook, Erwin, ArcGIS

Other: Intuit ProSeries, Microsoft Office Suite, Bloomberg

PROJECTS

National Parks Information and Recommendation Dashboard

Developed an interactive Power BI dashboard showcasing all US National Parks by integrating 5 years of visitor data and park details via API web scraping; used Python and Power Query for data cleaning, with built-in filters to enhance accessibility and user exploration

Proactive-Data-Breach-Management-in-Healthcare-with-NLP

Developed a proactive approach to manage data breach risks in healthcare by analyzing patterns and characteristics of breaches using text analytics. Employed logistic regression, topic modeling (LDA) and advanced NLP techniques BERT and NER

Food-Delivery-Time-Prediction-Model

Built predictive models using linear regression, decision trees, random forest and XGBoost to evaluate delivery time; applied cross-validation and measured performance with MSE and R-squared, resulting in improved accuracy and better overall delivery experience
