SUMMARY

Data and operations analytics professional with 3 years of experience turning complex healthcare and supply chain data into actionable insights. Skilled in SQL, Power BI, Tableau, and Snowflake, with a track record of improving workflows, optimizing forecasting, and automating reporting to drive multi-million dollar cost savings.

EDUCATION

University of Illinois at Chicago

Chicago, IL

Bachelor of Science in Data Science, concentration in Supply Chain Operations

TECHNICAL SKILLS

Programming: SQL, Python, R, Snowflake **Data Analytics:** Power BI, Tableau, DAX **ERP:** Salesforce, SAP S4

WORK EXPERIENCE

Elevance Health

Chicago, IL

Senior Competitive Intelligence Developer

Mar 2025 - Sep 2025

- Analyzed Elevance Health's pricing using SQL, and Snowflake, comparing contracted rates to national health carriers to pinpoint cost-saving opportunities. Supported the contracting team with data driven insights that strengthened negotiations and contributed to \$3M+ in healthcare cost reductions.
- Optimized Snowflake data warehousing and ETL workflows to improve performance, reduce report turnaround time by 25%, and streamline reporting across multiple data sources.
- Partnered with physicians, analysts, and executives to translate operational needs into sustainable reporting solutions supporting financial and clinical performance goals.
- Implemented QA processes by reviewing Tableau dashboards built by our support team, validating accuracy and resolving discrepancies. Provided training to support increase dashboard adoption and improve reporting consistency.

DMG MORI USA

Hoffman Estates, IL

Trade Operations Analyst

Apr 2023 - Mar 2025

- Led ETL process optimization and data warehousing on 110,000 machine parts using SQL to integrate new data sources into the existing architecture by identifying inefficiencies, improving data accuracy and reporting efficiency.
- Leveraged complex SQL queries to create algorithms for business metrics, securing \$190k in duty drawbacks under the Japan-USA Free Trade Agreement, and maximizing financial returns from U.S. Customs.
- Used SQL and Power BI to develop predictive modeling and data personalization models to monitor broker activity providing streamline reporting processes to leadership with actionable insights and reducing manual reporting by 30%.
- Recognized for metadata management and travelled to Japan to represent my department for the SAP S4 project to collaborate with product, engineering, and executive teams to design and implement innovative data solutions.
- Utilized QuestaWeb SaaS to streamline operational support while efficiently managing \$11M in 2024 shipments in the Foreign-Trade Zone(FTZ) to improve data governance and optimize duty deferral benefits of up to \$450k.

Travis Mathew - Part Time

Schaumburg, IL

Client Associate Specialist

Aug 2019 - Present

- Analyzed daily and weekly inventory reports to optimize stock levels, reduce overstock/stockouts, and improve product availability during peak sales cycles.
- Partnered with sales, marketing, and supply chain teams to adjust promotions and merchandising based on real-time KPI trends, implementing automated reporting that improved decision-making and boosted revenue by 17%.

PROJECT EXPERIENCE

DoorDash

Chicago, IL

Inventory & Operations Analytics Project

Nov 2025 - Dec 2026

- Analyzed 60k+ delivery and inventory records using SQL, Power BI, DAX, and Excel to uncover category, store, SKUs, and time of day drivers of missing items, and late deliveries across DoorDash's supply chain.
- Built automated dashboards and data models in Power BI using DAX measures to quantify issue rates, SKU impact, store performance, and forecasting gaps, improving visibility into replenishment and in-stock accuracy.
- Delivered actionable insights and operational recommendations including early-morning restocking optimization, high-risk category prioritization, SKU-level vendor alignment, and partner-store performance plans.

Illinois Department of Human Services

Chicago, IL

Workforce Analytics & Tableau Dashboard Initiative

Feb 2022 - Apr 2022

- Analyzed statewide workforce participation data using Excel, Tableau, and advanced data visualization techniques to evaluate employment trends across disability type, gender, race, age, and employment status.
- Designed and delivered 10 interactive Tableau dashboards with automated filters, KPIs, and drill downs, improving IDHS leadership's ability to track workforce representation and identify demographic gaps.
- Provided insights that informed resource allocation decisions for 50,000+ Illinois residents with disabilities, enabling more efficient program funding, improved reporting accuracy, and better statewide workforce planning.
