

Harsha Devisetty
harshadevisetty0009@gmail.com
(469) 960-3665
Sr. Java Full Stack Developer
<https://www.linkedin.com/in/harsha-devisetty0009/>

Career Summary:

- Around 8+ of experience as a **Java/J2EE Developer** includes Analysis, Design and Development of quality software for **Standalone Applications** and **Web-based applications**
- Strong exposure towards Software development methodologies **Waterfall and AGILE like Scrum and TDD**.
- Hands on Experience on **JDBC** and **HIBERNATE** for persisting data to different relational database and extensive knowledge in **Java Persistence JPI**
- Hands on experience in Web application development using –**Angular JS, HTML, CSS, JavaScript, XML**.
- Worked on Struts open source java framework utilizing **Struts Tiles, Struts Controllers (Action and Forms) and Client server validations**.
- Experience with Open source frameworks using Struts, **Spring Batch**, and Hibernate and used design patterns like **Singleton, DAO, Factory, DTO, and MVC**.
- Good exposure on different Spring modules like **Spring DAO, Spring MVC, Spring IOC and Spring AOP**
- **Developed recipes for Tomcat**.
- Experience in **Client-Server** and **N-tier** web applications development, deployment and maintenance using **Java, J2EE, Servlets, JSP, JSTL, JDBC, Struts, Spring Batch, Hibernate, JNDI, MDB, XML, XSLT, HTML, AJAX CSS, JavaScript, Web Services**.
- Data Mining and **Querying ERP Implementation** for E-commerce Framework.
- Worked on .NET third party tools like **Telerik data controls and JQuery UI controls**.
- Good Knowledge in implementing web services such as **SOAP and REST using WSDL, CXF2, JAX-WS and JAX-RS**.
- Well experience in configuring and deploying applications onto application servers like **Tomcat 8.0/9.0**.
- Used **Log4J** for enabling runtime logging and performed system integration test to ensure quality of the system.
- Expertise in writing unit test cases using **Junit testing Framework**.
- Implemented **Snowflake data** warehouse for efficient data storage and analytics in pharmaceutical projects at Pfizer.
- Leveraged **GraphQL's** query language to empower front-end developers to request specific data fields as needed, improving performance and reducing over-fetching.
- Good knowledge in using **ANT Scripts for building and deploying the application in web/app servers**.
- Extensive experience in using IDE tools like **Eclipse, IntelliJ and RAD**.
- Involved in performance tuning, code re-factoring, load test, technical design documentation and User manuals.
- Committed team player with strong analytical and problem-solving skills, ability to quickly adapt to new environment and technologies.
- Significant work experience in **spring framework and middleware technologies** such as **EJB's, Web Services and Messaging technologies like Web services using SOAP, Restful, JAX-RPC and UDDI with CORBA**.
- Good knowledge of Hibernate and Hibernate Query Language (**HQL**) in addition to **AOP Spring, Spring -Web Flow, Spring transaction management and Spring MVC**.
- Experienced of database connectivity (**JDBC**) for databases with **Oracle, SQL Server, MySQL, MS Access, DB2 and PL/SQL** stored procedures.
- Proficient in **Java 8/11/17, J2EE, EJB's, Java Beans, Struts 1.1/1.2/1.3, Spring 2.0, Hibernate 2.x, 3.x JSP, Servlets, XML**.

Education:

- **Bachelors of Science in Computer Science**
California State University Long Beach

Technical Skills:

Programming Languages	Java, Python, PL/SQL, UML
Java Technologies	JEE, Servlets, EJB, Java Beans, JDBC, JMS, JSTL.
Web Technologies	JSP, Servlets, EJB, JDBC, JavaBeans, HTML5, CSS3, JavaScript v1.8, Web Services, AJAX 16.1.0, JQuery 3.1.0, ReactJS, NodeJS and Angular JS
Web Services	Restful, SOAP, UDDI, CORBA, WSO2.
Web Frameworks	Spring, Spring Boot, Hibernate, Struts, JSF, Flask.
Databases	Oracle9i, Oracle12c, SQL Server, IBM DB2 UDB, SQL, PL/SQL, MongoDB, PostgreSQL.
Cloud Services	Azure, Virtual Machines, Azure Storage, Backup, Site Recovery, Virtual Network, VPN Gateway, Load Balancer, SQL Database, Key Vault
Logging Frameworks	Log4j
Application and Web Servers	IBM WebSphere, JBOSS, Web logic, Apache Tomcat, and Apache Web Server.
IDE	Eclipse, My Eclipse, NetBeans, IntelliJ, Spring Tool Suite.
Building Tools	ANT, Maven, SBT.
Methodology	Object Oriented Analysis, Design and Development using UML
Testing Tools	Junit, Mockito.
Automated Testing Tools	Selenium
Version Controls and Bug Tracking	Git, SVN, Rational ClearCase, Rational ClearQuest, CVS, JIRA, Team Forge.
Operating Systems	Windows (7, Vista, XP, 2000, 98, NT), Mac, UNIX, Red Hat Linux

Professional Experience:

Client: Pfizer, New York

Feb 2020 – Present

Role: Back-end/ Full-stack Developer

Responsibilities:

- Developed the application leveraging **Spring IO/Spring Boot** and **Hibernate ORM**, including scripts for Maven build, deployment, and configuration.
- Implemented data interactions using **Hibernate and SQL** with a **SQL Server database**.
- Engaged in **Java** backend development with **Spring, Spring Boot**, and **microservices**.
- Created and deployed **Spring Boot microservices** for enterprise software distribution.
- Transitioned a **monolithic** application to a **microservices** architecture using **Spring Boot** and **Kafka**.
- Facilitated **microservices** communication through **HTTP** and **REST**, adopting a SOA methodology.
- Configured databases on **Amazon RDS** or **EC2** according to project needs.
- Developed **Spring Restful** web services that produce JSON outputs.

- Transitioned existing applications to a microservices framework using Rest APIs and Spring Boot.
- Designed a **POC** for authentication and authorization using **Oauth2** in a Spring Boot microservice, with **JWT** for tokenization.
- Implemented **Kafka** producers and consumers to enable reliable data transfer between different components of the application ecosystem.
- Updated and maintained a **GraphQL** layer for managing user interactions with a **PostgreSQL** database.
- Handled **AWS** services including **CLI, EC2, VPC, S3, ELB Glacier, Route 53, CloudTrail, IAM, and Trusted Advisor**.
- Utilized **Snowflake's** scalability and performance features to handle large volumes of data for real-time decision-making processes.
- Integrated **Snowflake** with Java applications to streamline data processing and enhance data-driven insights.
- Collaborated on designing **GraphQL** types and resolvers to streamline frontend data access.
- Implemented **GraphQL** subscriptions for real-time data updates, enhancing user experience in Pfizer's healthcare application.
- Updated unit and integration tests for GraphQL and library levels to ensure functionality.
- Developed a Java API for interfacing with **Amazon S3** for media file storage and retrieval.
- Worked across the front end, business, and persistence layers using the Spring framework.
- Implemented **MVC** design pattern with the Spring framework for web-tier architecture.
- Developed custom components using **J2EE, Spring, Hibernate, and Java8/17** for data extraction and loading.
- Managed microservices deployment to **Kubernetes** via **Jenkins** pipelines, including Docker registry management and Pods configuration.
- Worked on **FHIR** APIs to enable secure and standardized access to healthcare data, promoting interoperability and data sharing among healthcare systems.
- Adopted **agile** methodologies, including paired programming, test-driven development, and scrum meetings.
- Focused on Spring Boot for web services development.
- Initiated new library development within a microservices architecture using **REST APIs** and **Spring Boot**.
- Optimized **Mongo** database performance through various indexing strategies.
- Utilized **HL7 FHIR** mapping to transform HL7 v2.x messages into FHIR resources, enabling seamless interoperability and data sharing in healthcare environments
- Managed **Kafka** message partitioning and replication factor settings within a Kafka Cluster.
- Conducted unit testing of core functionalities using **JUnit** and engaged in code reviews and production support.
- Developed an API using **AWS Lambda** for server management and code execution in **AWS**.
- Selected optimal **AWS** services based on specific compute, data, or security needs.
- Integrated Amazon Web Services (AWS) with other application infrastructures.
- Executed J2EE Testing, developed test cases with **JUnit** and **Mockito** for unit testing, and utilized Log4j for logging.
- Managed code version control with **GIT**, including pull request reviews and check-in/check-out processes.

Environment : **Java8, Spring 3.5, Spring MVC, Spring Security, AWS (EC2, S3, IAM), Hibernate 4.0, Rest, JSP, HTML, CSS, Java Script, OpenShift, Cassandra, Kafka, Typescript, Angular 15, RabbitMQ, Datadog, Junit.**

Client: Western Union- San Francisco, CA

Nov 2018 - Jan 2020

Full stack Java Developer

Responsibilities:

- Involved in the implementation of design using vital phases of the Software development life cycle **SDLC** that includes **Development, Testing, Implementation** and **Maintenance** Support.
- Used **Agile Scrum** methodology for **iterative** incremental software development
- Implemented **Java 1.8** features like **Lambda expressions, Java Optional, Stream API** for **Bulk data operations on Collections**, which would increase the **performance** of the Application.
- Used **Microservices architecture**, with **Spring Boot**-based services interacting through a combination of **REST** and **Apache Kafka** message brokers and leveraging **AWS** to build, test and deploy micro services.

- Implemented **Microservices** with **Spring Cloud** provided library services like **Netflix Eureka Naming Server**, **Netflix Ribbon** and **Feign Client** as a **Rest** client to map response to the client bean.
- Applied **J2EE design patterns** like **Singleton**, **Data Transfer Object DTO**, **Data** and **Business Object VO** during the development of components.
- Design roles and groups for users and resources using **AWS Identity Access Management (IAM)**.
- Used **Visio** to prepare **Flow Diagram**, **Class Diagram** and **Sequence Diagram**.
- Implemented **Spring MVC** flow to interact with different modules and extensively used **Spring AOP** and **Dependency injection** during various modules of project.
- Used **Spring Data JPA** as **ORM** tool for data related functionalities, persistence layer and implemented transactions.
- Involved in creating **POJO Objects** and mapped using **Spring Data JPA** Annotations.
- Implement **Lombok API** annotations to generate boilerplate code for **POJO objects**.
- Used **Spring Core** Annotations for **Dependency Injection Spring DI** and **Spring MVC** for **REST API s** and **Spring Boot** for **Microservices**.
- Composed and executed **MongoDB** scripts to insert and update **NoSQL** database; automating data changes and reporting.
- Worked on back-end services with **Golang** and accomplished essential unit test, designed and developed the **Golang** backend for the next version of **ads GO**.
- Designed a web application to query raw **JSON** files for **Data Analysis** Team. Developed the front-end by **Html**, **CSS**, **JavaScript**, back-end by **Golang** and **Apache Drill**.
- Responsible for Configuring **Apache Kafka** Consumer and Producer metrics to visualize the **Kafka** System performance and monitoring.
- Extensively used the **Java collection Framework** Classes for Holding the Application objects.
- Designed Frontend with in Object Oriented **JavaScript** framework like **Angular.JS**, **Node.js**. Used building rich internet applications, **backbone JS** **Require JS** to optimize in-browser use, to load the module, and to improve the Speed.
- Built Web pages that are more user-interactive using **AJAX** and **JavaScript**.
- Participated in development of a well responsive single page application using **JSF** framework and **JavaScript** in conjunction with **HTML5**, **CSS3** standards, with front-end UI team.
- Designed and developed the UI using **spring** view component, **JSP**, **HTML5**, **CSS 3.0**, **JQuery** and **AngularJS**.
- Used **spring** validator framework for client side and server side validation. Also implemented dynamic loading of **JSP's** using **AJAX**.
- Implemented **AngularJS** controllers, custom directives, filters to maintain each view data. Implemented **Angular** Service calls using **Angular Factory**.
- Planned, constructed and iterated upon a contacts management **single-page application (SPA)** and custom **REST API** using **AngularJS**, **MongoDB**, **Node.js**, and **Express.js**.
- Built custom **Angular 4** Directives and Services for single-page web application for agile-based team.
- Implemented reactive **Angular 4** components using **RXJS**.
- Developed service infrastructure components in **Angular2/Typescript** for a unified web UI initiative
- Implemented **AWS** solutions using **EC2**, **S3**, **RDS**, **EBS**, **Elastic Load Balancer**, **Auto scaling** groups, optimized
- Responsive web design (**RWD**) is developed using frameworks like **Angular2.0**, **typescript** and **MVC frameworks** and **Bootstrap**
- Managed servers on the **AWS** platform instances using **Puppet**, **Chef**, **Ansible**, **Configuration management**.
- Developed and published **Java Web Services PoS Services** so that other systems can use the service using **Web Services**.
- **Accrue** version control system has been used to check-in and checkout the developed artifacts.

- Worked on creating **Microservices**, **API**, and created **Docker** Files for different Microservices. Worked on **Swagger API** and auto-generated documentation for all **REST** calls.
- Used Zipkin to trouble shoot problems in micro-services architectures.
- Created advance **SQL** scripts in **PL/SQL** Developer to facilitate the data in/out flow in **Oracle**
- Created **Stored Procedures** in **Oracle** using **PL/SQL**, **TOAD**.
- Extensively involved in a **Docker** deployment pipeline for custom application images in the cloud using **Jenkins**.
- Used the **Docker** container system with the **Kubernetes** integration.
- Worked in **TDD** environment used **MOCKITO** to develop test cases for java bean components and test them through **JUnit** framework. In addition, used Code coverage plug-ins like **SonarQube** to improve the coverage and quality of code, Implemented **Jasmine** and **Karma** frameworks for UI test cases.
- Implementing automated performance test process using Load Runner.
- Enhanced the **performance** of the application by identifying the bottlenecks and providing advanced **performance tuning**.
- Developed **JMeter** scripts for **load testing**.
- Logging framework **Log4J** is used with **SL4j** annotations to log messages. Used **Gradle** for integration and building of the project.
- Used Stash repository for **Git** version control, **JIRA** tracking tool for assigning and defect management.

Environment: Java 1.8, J2EE , Java 8.0, Spring 4, Spring JPA, Spring boot 1.1.5, JSF, Spring cloud, Spring Security, Hibernate, JavaScript , Angular 2/4, Golang, ReactJS, HTML 5.0/4.0, CSS, Ajax, JQuery, Swagger API, Lombok API, JBoss, Eclipse, Kubernetes, Docker, Gradle, Stash, log4j, Junit, XML, Web Services, SOAP, WSDL, JAX-RS, Splunk, Apache Kafka, MongoDB, Windows XP, Design Patterns, AWS, WebLogic10.2, SQL, PL/SQL, TOAD, Oracle 10g, DB2, Docker, Maven, Jenkins, Cobertura, Sonar, WinSCP, Putty, Log4J, JUnit, Mockito, LoadRunner11.5, Jersey, JSON, XML, Selenium Cucumber, EXT JS, Express JS 4.x, NodeJS, Typescript, ES7.

Ebay - Sunnyvale, CA

May 2014 – Oct 2018

Java Full Stack Developer

Responsibilities:

- Involved in the system analysis, design, and development
- Involved in project Plan, System & **Integration** documents
- Configured the **Jboss** server with the required property files which contain the principals, passwords, database configuration file arguments and their roles.
- Involving in Analysis of, **MongoDB** for best fit for **Dynamic** User Segmentations and reviewed with database architects for approval.
- Experience in creating **JavaScript** for using **DML** operation with **MongoDB**.
- Involved in the Understanding of the Requirements and Design of the Application and Active involvement in many aspects of the **software development lifecycle**.
- Prepared the design document based on requirements. And sending project status report on by weekly basis.
- Implemented of **Maven** dependency with java
- Developed Unit Test Cases using **JUnit**.
- Responsible for Code Review, Code Troubleshooting, Bug Fixing, & Change Requests.
- Responsible for ensuring the quality of deliverables. Expertise in using **Core JAVA Collection API**, Generics, Annotations, **Reflection API**, multi-threading for application development.
- Used **Spring** Transaction Management. Used spring core for **Dependency Injection**.
- Developed the web applications using **Core concept** (Threading and Collection).
- Responsible to Design & Develop the Business components using **Java 7 / Java 6, Java EE 6, MVC**.

- Responsible to Design & Develop the Business components using **Struts, JSP, Servlets, POJO, WebServices, Design Patterns, Angular JS, JMS, and XML.**
- For the User Interface used **HTML, CSS, & ANT** technologies.

Environment: Java 1.5, JavaScript, Struts, spring, EJB, Hibernate, Ajax, JSF, Java Grails, XML, XSL/XSLT, JMS, WebSphere 6.0, Oracle 10g, RMI, Eclipse IDE.
