PROFESSIONAL EXPERIENCE

Financial/Budget Analyst & Bookkeeper

07/2023 – Present

Coastal Construction LLC.

- **Created** automated **financial models** in Excel to monitor live projects costs, which reduced reporting time by 50%
- **Implemented** a system to require bi-weekly check in's with project managers to advise on budgetary performance and capitalize refinements/ improvements as necessary
- **Perform** in-depth reviews of both Profit & Loss statements and balance sheets to present to owners with insights that support **informed decision making**
- Prioritize accuracy in the maintenance of expansive company data via book management for accounts payable and **receivable**, and daily financial entries/reconciliations
- **Manage** a range of key accounting functions, to include general ledger entry maintenance and payment/adjustment recording
- **Manage** and **leverage** payroll data to track labor hours and ensure all projects remain within budget
- Invoice clients and customers, while tracking payments and following up on delinquencies to **maximize financial health**

Operations Manager

06/2021 – 08/2022

Wild Wheat Bakery

- Created and **implemented** Excel-based tracking tools to modernize inventory and vendor cost analysis, which reduced waste by 60%
- **Implemented** standardized billing and reconciliation processes, improving payment timelines and reporting quality by 80%
- Provided motivational **leadership** to a diverse team, including performance oversight, professional development, and goals setting/tracking
- **Delivered high-quality customer experiences** by building authentic relationships, identifying individual needs, and maintaining ongoing communication to mitigate issues, delays, and concerns
- **Managed** both accounts receivable and payable to streamline cashflow, and ensure accuracy financial data management and reporting
- Coordinated payroll for all company employees, while serving as the principal point of contact for inquiries and issues

Office Manager

10/2018 – 06/2021

Seattle Truck Repair

- **Monitored** daily performance and productivity data to identify issues and capitalize on opportunities for improvement – **streamlining operations** and optimizing bottom line profitability
- **Implemented** a parts inventory tracking system using Excel to facilitate timely replenishment
- **Managed accounts receivable and payable**, while serving as a point of escalation for complex billing issues
- **Streamlined** business operations by assigning tasks to workers and providing coaching and support to position them to realize their potential while delivering key company goals
- **Managed** internal data systems

PROJECTS

- Predictive Analysis of Optimal Cash Balance and Future Returns
 - Conducted regression analyses to examine the impact of excess and insufficient cash on future returns, highlighting the critical role of managerial ability.
 - Integrated data from WRDS and Demerjian, covering 1989-2022, to model the effects of firm size, net working capital, sales growth on return net operating assets and buy-and-hold returns.
 - Demonstrated that managerial ability significantly enhances financial performance by positively interacting with both excess and insufficient cash conditions.
- Modelling Passengers' Airport and Airline Choice Behavior
 - Developed and evaluated descriptive models (logistic regression, decision tree) and non-descriptive models (NN, SVM) to analyze passengers' airline and airport choice behaviour, providing actionable insights for the aviation industry.
 - Interpreted modelling results to discuss substantive policy implications, informing decision-making and optimizing operational strategies for airlines and airports.
