PROFESSIONAL SUMMARY

Application Developer with over **10+ years** of experience specializing in **Microsoft technologies** and **Azure Cloud Full Stack development**. Skilled in designing and delivering **enterprise-grade solutions** across banking, infrastructure automation, and e-commerce domains. Expertise includes **.NET Core, ASP.NET, C#, SQL Server, PowerShell, Azure DevOps**, and **microservices architecture**. Adept at building **secure, scalable, and high-performance applications**, with a strong focus on **cloud modernization, DevOps automation**, and **end-to-end application lifecycle management**.

KEY SKILLS

Programming Languages

PowerShell Scripting, C#, JavaScript, VB.NET, XML

Cloud & DevOps

Microsoft Azure, Azure DevOps, Git, TFS, CI/CD Pipelines, API Management, IIS Deployment

Architecture & Design

Microservices, 3-tier and n-tier architecture, RESTful services

Frameworks & Libraries

.NET Core, ASP.NET, MVC, MVVM, MVP, Web API, Xamarin Forms, jQuery, Ajax, GraphQL

Databases

SQL Server, MySQL, PostgreSQL - proficient in writing stored procedures, functions, and views

Tools & Platforms

Visual Studio, Jira, Remedy, Exchange Server, Intune, AirWatch

PROJECT HISTORY

Advisory System Analyst

Nov 2018 – Present | Pune, India

IBM India Pvt Ltd 📧

- **Nationwide Building Society** (Feb 2023 – Present): Modernized UK banking app by replacing the outdated Sencha framework with a modern tech stack and refreshing the UX/UI. Developed secure .NET gateway APIs to facilitate cloud integration, enabling seamless connectivity between mobile apps and backend systems. Focused on cloud solutions, API development, and system performance optimization.
- **SunTrust-LAS Upload** (Dec 2020 – Present): Developed VB.NET code for outbound file generation and database operations. Automated file transfers to mainframe systems using Connect Direct.
- **Suntrust - nCino LOSRequest** (May 2020 – Apr 2021): Developed WCF web service proxy for Loan Origination System. Integrated Credillense web services and handled complex .NET .0 implementations.
- **Micron Technology - NAC Register** (Nov 2019 – Mar 2020): Automated enterprise infrastructure operations using PowerShell and .NET (C#), delivering solutions for server provisioning, system builds, patch management, and cross-site device access. Integrated ISE, Remedy, and security systems via APIs and implemented Azure DevOps CI/CD pipelines to improve reliability, scalability, and deployment efficiency.
- **Micron Technology - DBA Access** (Nov 2018 – Aug 2019): Enhanced and maintained secure database services with backup, recovery, and performance monitoring.
- **Micron Technology - Email to Incident** (Nov 2018 – May 2019): Automated conversion of formatted emails into Remedy incidents using parsing rules.
- **Micron Technology - Autopatch** (Nov 2018 – Mar 2020): Automated patch scheduling for Windows and Linux servers using PowerShell scripting, Orchestrator runbooks and ASP.NET MVC.
- **Micron Technology - System Build** (Nov 2018 – Mar 2020): Developed a system for provisioning virtual and physical workstations using PowerShell scripting, orchestrator runbooks and Jira integration.
- **Sembcorp Industries** (Aug 2018 – Nov 2018): Created a mobile app using Xamarin Forms to manage SAP requests. Integrated SAP services and deployed via Intune and AirWatch.

Sr. Software Engineer

Dec 2017 – Nov 2018 | Nagpur

Bloom Consulting Services Pvt Ltd 📧

- Developed Exchange Timetable Booking System for Singapore Polytechnic.
- Integrated SAP and banking APIs for financial applications.
- Created mobile SAP approval app for Sembcorp Industries using Xamarin

Software Engineer

Nov 2016 – Dec 2017 | Nagpur

NewAge Comtech Pvt Ltd

- Built and maintained money transfer and wallet integration systems for Transcorp.

- Developed and integrated APIs for banking services including NEFT and IMPS transactions.
- Implemented secure web services using ASP.NET and XML for real-time money transfers.
- Designed and optimized SQL Server stored procedures and functions for financial data processing.
- Participated in requirement analysis, system design, and deployment of web-based financial applications.
- Conducted code reviews, unit testing, and performance tuning to ensure high-quality deliverables.

Software Developer

Aug 2014 – Oct 2016 | Nagpur

Phian InfoTech 

- Designed and developed web-based applications for education and retail domains.
- Built SAAS-based school management systems with modules for attendance, communication, and academic tracking.
- Developed online restaurant ordering and inventory management systems.
- Created and consumed web services using ASP.NET and XML.
- Wrote and optimized SQL Server stored procedures and queries.
- Conducted functional testing, code reviews, and deployed applications to production environments.
- Collaborated with cross-functional teams to gather requirements and deliver customized solutions.

EDUCATION

Post Graduate Diploma in General Management

IIM Nagpur

Bachelor of Engineering (Computer Science & Engineering)

RTM Nagpur University

CERTIFICATIONS AND ACHIEVEMENTS

Azure Fundamentals (AZ-900)

Microsoft

Rising Star Award

IBM India Pvt Ltd.

Best team player in web development

Bloom Consulting Services.
