SUMMARY

Highly accomplished Supply Chain Analyst with end-to-end expertise in Supply Chain Operations, Demand Planning, Inventory Management, and Data Analytics, supporting data-driven decision-making across logistics, procurement, warehousing, and distribution. Proven ability to analyze complex supply chain data, forecast demand, optimize inventory levels, and collaborate with cross-functional stakeholders to enhance operational efficiency. Strong proficiency in SAP ERP, WMS, TMS, SQL Server, Power BI, Oracle TMS, and supply chain optimization tools.

SKILLS

- Demand Planning & Forecasting
- Supply Chain Operations Management
- Inventory Management & Optimization
- Data Analytics & Business Intelligence (Power BI, SQL)
- SAP ERP & Supply Chain Systems
- Logistics & Transportation Management (TMS)
- Procurement & Vendor Management
- Warehouse Management Systems (WMS)
- Process Optimization & Automation
- Stakeholder Communication & Collaboration

EXPERIENCE

Supply Chain Analyst

Cogistics Transportation LLC

July 2024 – Present, FL, US

- Analyzed end-to-end supply chain operations to support demand planning, logistics coordination, and inventory optimization across multi-site facilities.
- Developed demand forecasting accuracy audits using SQL Server, improving forecast reliability and enabling supply planning decisions.
- Performed inventory management analysis to maintain optimal stock levels, reduce excess inventory, and minimize material wastage.
- Designed Power BI dashboards to analyze supply chain KPIs, inventory turnover, service levels, and demand-supply alignment.
- Collaborated with procurement, logistics, finance, and warehouse stakeholders to ensure smooth supply chain execution and communication.
- Implemented best practices in inventory valuation and replenishment planning using SAP ERP to improve stock visibility and control.
- Conducted root cause analysis on fulfillment delays and supply disruptions, driving corrective actions to improve delivery performance.
- Supported transportation and logistics planning using TMS data to enhance routing efficiency and reduce transit delays.
- Identified supply chain optimization opportunities through data analysis, improving operational efficiency and cost performance.
- Assisted leadership with actionable insights and reporting to support strategic supply chain planning and continuous improvement initiatives.

Supply Chain Analyst

SCMLinkers

May 2022 – June 2023, India

- Supported supply chain operations by analyzing demand, procurement, inventory, and distribution data to improve end-to-end efficiency.
- Executed demand planning and forecasting analysis using SAP ERP and SQL-based models to align supply with customer demand.
- Managed inventory planning and control processes, reducing stockouts and excess inventory through data-driven replenishment strategies.
- Developed Power BI dashboards to track inventory performance, demand trends, and supply chain KPIs for stakeholders.
- Collaborated with procurement and vendor teams to analyze supplier performance, compliance, and spend optimization.
- Supported logistics and transportation planning initiatives to enhance on-time delivery and distribution performance.
- Implemented supply chain best practices in warehouse management and order fulfillment using WMS.
- Analyzed procurement and logistics data to identify optimization opportunities and cost reduction initiatives.
- Maintained effective communication with cross-functional teams to ensure smooth supply chain execution and issue resolution.
- Assisted in continuous improvement initiatives by leveraging analytics to enhance demand forecasting accuracy and operational efficiency.

EDUCATION

Master of Science (M.S.) – Computer and Information Science

Saint Louis University • MO, St. Louis • 2025

B.Tech – Computer Science and Engineering

Vignan's Foundation for Science, Technology and Research • India • 2023
