EDUCATION

German University in Cairo, Cairo, Egypt

Oct 2020 – Jul 2025

Bachelor of Computer Science and Engineering

Relevant Courses: Algorithms, Databases, Software Engineering, Machine Learning, Big Data Analytics

EXPERIENCE

Backend Engineering Intern, DSquares

Sept 2025

- Developed and maintained backend services using ASP.NET Core within a production microservices environment.
- Built unit and integration tests (xUnit) to improve service stability and reduce deployment regressions.
- Maintained and extended an Ocelot API Gateway, supporting reliable routing, authentication, and inter-service communication.
- Assisted in migrating the API Gateway from Ocelot to Kong by mapping routes, plugins, and middleware logic.
- Collaborated with senior engineers to validate post-migration security and request routing behavior.

Full Stack Developer (Assistant Role), Freepl

Jul 2025

- Worked closely under senior engineers' guidance to design, develop, and enhance ASP.NET Core and Angular client portal modules, following established product lifecycle processes.
- Assisted in implementing functional changes and defect fixes, ensuring high-quality releases across multiple platforms and browsers.
- Participated in code reviews, applying senior feedback to improve maintainability and reduce code smells by 25%.

Software Engineer Intern, Inovasys

Sept 2024

- Supported the development of an internal audit management system using ASP.NET and SQL Server, reducing manual workflows by 30%.
- Followed senior engineers' design direction to implement Power Automate workflows, improving data processing accuracy.
- Assisted in deploying solutions to cloud infrastructure and verified production readiness.

Software Development Intern, National Bank of Egypt

Aug 2024

- Assisted in optimizing a Python-based data compression algorithm, reducing storage usage by 98%.
- Worked under close supervision to integrate the solution into live transaction systems with zero downtime.
- Performed regression and integration testing to verify consistent functionality across production environments.

Backend Developer, German University in Cairo

Jul 2024

- Built secure Node.js/Express/MongoDB backend services under faculty supervision, implementing JWT authentication and role-based access control.
- Collaborated in requirements analysis to ensure academic deliverables aligned with industry quality and documentation standards.

CS Junior Teaching Assistant, German University in Cairo

2022 – 2025

- Supported professors in Data Structures and Algorithms labs by guiding students through debugging and problem-solving techniques.
- Applied structured grading and feedback processes under academic supervision to ensure consistency and fairness.

SELECTED PROJECTS

Java-Based DBMS with Octree Indexing

Java

- Designed and implemented a lightweight DBMS with CRUD operations, persistence, and spatial indexing.
- Followed iterative testing to ensure consistent query accuracy and improve index search efficiency by 20%.

StyleGAN Anime Generator

Python, GANs

- Fine-tuned a StyleGAN model to improve generated image clarity by 40%, applying structured experiment tracking.
- Learned and applied optimization techniques from academic resources and online research communities.

TECHNICAL SKILLS

Programming Languages: C# , Java , Python, C++, SQL, TypeScript, Node.js, Go (familiar)

Frameworks & Tools: .NET, Angular, ASP.NET Core, MongoDB, MySQL, Docker, Power Automate, Git, Linux

Quality & Deployment: Unit Testing (Jest, NUnit), CI/CD Pipelines, Docker Compose, AWS

Soft Skills: Adaptability under supervision, Collaborative problem-solving, Requirements analysis, Documentation

Languages: Arabic: Native **English:** Full Professional **German:** Beginner
