

Professional Summary

Strategic and data driven **Supply Chain Analyst** with 4+ years of experience improving supply chain operations for multinational organizations including **Siemens** and **Deloitte**. Specialized in driving cost savings, improving demand forecasts, and streamlining logistics through data analytics, forecasting tools, and ERP systems. Adept at collaborating with cross functional teams to solve supply chain inefficiencies and enhance visibility. Strong command of **SAP, SQL, Power BI**, and inventory optimization techniques. Certified in **APICS CPIM** and **Lean Six Sigma Green Belt** with a master’s in Information Technology Management.

Technical Skills & Core Competencies

Category	Tools / Competencies
ERP Systems	SAP (MM, APO, S/4HANA), Oracle SCM Cloud, NetSuite
Data Analytics & BI	Power BI, Tableau, Excel (PivotTables, VLOOKUP, Macros), SQL
Programming	Python (basic for forecasting models), R (basic)
Forecasting & Planning	Demand Planning, Predictive Modeling, Time Series Analysis, Replenishment Strategy
Inventory Management	ABC/XYZ Analysis, Cycle Counting, Safety Stock Optimization, Turnover Ratio Tracking
Procurement & Sourcing	Strategic Sourcing, Vendor Risk Assessment, Cost Analysis, Supplier Evaluation
Logistics Optimization	Route Analysis, Lead Time Reduction, Freight Cost Management, Distribution Planning
Reporting & Dashboards	KPI Monitoring, C-Level Dashboards, Spend Analytics, Performance Reporting
Process Improvement	Lean Six Sigma, Root Cause Analysis, Value Stream Mapping, Process Automation
Tools for Workflow	JIRA, Confluence, Microsoft Project, SharePoint
Certifications	APICS CPIM, Lean Six Sigma Green Belt, Oracle SCM Certified, Coursera (Wharton)

Professional Experience

Supply Chain Analyst

Siemens, Aug 2024 – Present

- Optimized end-to-end supply chain operations** by implementing data driven inventory planning strategies across 5 global warehouses, achieving a **22% reduction in excess inventory** and maintaining 97% fill rate.
- Led the development and rollout of real-time Power BI dashboards**, integrating SAP MM and APO data to provide senior leadership with up to date visibility on procurement KPIs, cycle times, and cost variances.
- Reduced transportation and logistics costs by 15%** by conducting in depth freight and route optimization analyses, renegotiating contracts with 3PL providers, and implementing just in time delivery schedules.
- Spearheaded predictive analytics initiatives** using Python and SAP HANA datasets to automate demand forecasting, increasing forecast accuracy from 80% to **93%**, and reducing backorders by **35%**.
- Collaborated with global procurement and finance teams** to streamline purchase order workflows, cut average PO approval time by **40%**, and reduce manual data entry errors by implementing automated processes.
- Played a key role in the **successful migration to SAP S/4HANA**, overseeing supply chain master data cleanup and mapping for over 10,000 SKUs, ensuring data integrity and reducing downtime post I mplementation.
- Drove a **supplier scorecard enhancement project**, benchmarking supplier performance across OTIF, quality, and responsiveness, resulting in a **30% improvement in supplier compliance**.

Supply Chain Analyst

Deloitte, Aug 2020 – Jul 2023

- Delivered strategic supply chain consulting services** to Fortune 500 clients across manufacturing, retail, and healthcare sectors, identifying and implementing cost savings totaling **\$1.2M+ annually**.
- Conducted spend analysis across global procurement networks**, utilizing SQL and Excel based data models to uncover inefficiencies, enabling clients to restructure supplier contracts and reduce unit cost by **8–12%**.
- Reduced inventory holding costs by 18%** by executing a full ABC/XYZ inventory classification, optimizing replenishment cycles, and implementing automated reorder point systems for over 6,000 SKUs.
- Led key workstreams during Oracle SCM Cloud ERP implementations**, mapping client-specific workflows for procurement, sourcing, and inventory, while training end-users to drive adoption and minimize change resistance.
- Developed **dynamic dashboards in Power BI** for executive reporting on procurement, logistics, and warehouse performance, reducing manual reporting effort by **35+ hours/month**.
- Managed quarterly supplier risk assessments**, identifying high risk vendors and presenting mitigation strategies that minimized disruption during global supply chain volatility (COVID-19 era).
- Initiated a process automation project** that replaced manual procurement status tracking with workflow automation, reducing PO cycle time from 7 days to 3 days.

Key Projects

- AI-Based Demand Forecasting**
Developed a machine learning model to forecast demand using Python integrated with SAP HANA. Boosted forecast accuracy from 80% to **93%**, enabling smarter procurement decisions.
- Spend Analytics Dashboard**
Created interactive Power BI dashboards analyzing global supplier spend, cost drivers, and savings opportunities for C-level executives.
- Inventory Optimization Initiative**
Led ABC/XYZ segmentation and redesigned inventory control policies, which resulted in a **28% reduction in obsolete inventory**.

Education

Master of Science in Information Technology Management

Belhaven University

Bachelor of Engineering in Mechanical Engineering

Lingaya’s University
