

## Sutisna Utamasjida Septiawan

### Full-Stack Developer

Yogyakarta, ID | P: +62 812 4359 0903 | [sutisnautamasjida@gmail.com](mailto:sutisnautamasjida@gmail.com) | [LinkedIn](#) | [Github](#)

## Summary

Highly accomplished Full-Stack Developer with 3+ years of experience in designing, developing, and deploying robust web applications. Proven expertise in translating complex Figma designs into pixel-perfect, highly responsive, and interactive user interfaces using modern front-end frameworks like Vue.js and React. Skilled in building scalable and secure back-end systems with technologies such as Laravel, Node.js, and Golang, and proficient in database management (PostgreSQL, MongoDB, MySQL). Adept at optimizing application performance, ensuring cross-browser compatibility, and implementing CI/CD pipelines. Experienced in leveraging open-source tools and AI for marketing automation and SEO enhancement. A collaborative team player with strong problem-solving abilities, committed to delivering high-quality, maintainable, and innovative software solutions in agile environments.

## Skills

- Programming Languages: JavaScript/TypeScript, Python, PHP, Go (Golang)
- Front-End: Vue.js, Nuxt.js, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Webpack
- Back-End: Node.js, Laravel, AdonisJS, Go (Golang)
- Databases: PostgreSQL, MongoDB, MySQL
- DevOps & Tools: Docker, Git, Linux, CI/CD, RabbitMQ
- APIs & Integration: Evolution API, Google Maps API (Scraping)
- AI/ML: AI Content Generation (for SEO)
- Security: JWT, OAuth
- Methodologies: Agile, Scrum
- Soft Skills: Problem Solving, Analytical Thinking, Collaboration, Time Management, Adaptability

## Work Experience

### Full-Stack Developer (Full Time Remote)

GovAssist, LLC – Puerto Rico

November 2023 – June 2024

- Engineered and delivered highly responsive web applications from intricate Figma designs using Vue.js, React, and Laravel Blade, achieving pixel-perfect implementation and seamless cross-device compatibility.
- Collaborated effectively within agile frameworks with designers and product managers to align technical feasibility with product vision and accelerate development cycles.
- Optimized and maintained Webpack configurations, enhancing asset bundling efficiency across diverse Vue.js and React projects.
- Developed and maintained reusable Laravel packages, improving code modularity and ensuring consistency across multiple enterprise-level applications.

### Full-Stack Developer (Full Time Remote)

Niftyzone Pte. Ltd. - Singapore

August 2023 – November 2023

- Developed and maintained responsive web applications, leveraging Laravel for robust back-end services and Nuxt.js for dynamic front-end development.
- Built and optimized interactive user interfaces in Nuxt.js, ensuring a seamless and dynamic user experience across various platforms.
- Contributed to a component library by developing and maintaining reusable UI components, increasing development efficiency by 20%.
- Troubleshooting and debugging cross-stack issues, ensuring optimal application performance and consistent user experience across diverse browsers and devices.
- Maintained high code quality and adherence to coding standards through consistent code reviews and best practices implementation.

## **Full-Stack Developer (Full Time Remote)**

**PT. Aino Indonesia – Indonesia**

**November 2023 – June 2024**

- Developed and enhanced critical Dashboard Reporting features using Vue.js, significantly improving data presentation and user experience for a system processing over 400,000 daily transactions on Jaklingko Project.
- Architected and scaled back-end features utilizing Golang, AdonisJS, PostgreSQL, MongoDB, and RabbitMQ, effectively managing high traffic volumes and optimizing task scheduling.
- Conducted rigorous post-launch Quality Assurance, ensuring data accuracy, optimal user experience, and rapid resolution of bugs.
- Applied application security best practices, including JWT and OAuth implementations, and maintained high standards for clean, maintainable code.

## **Coding Tutor (Freelance Remote)**

**PT. Brightchamps – Indonesia**

**November 2023 – June 2024**

- Educated elementary school students on foundational coding concepts using block-based platforms (Scratch, Code.org).
- Instructed middle school students in developing Android applications using Thunkable, fostering practical mobile development skills.
- Guided high school students through principles of machine learning and data visualization using Python.
- Provided comprehensive instruction in basic web development, covering HTML and JavaScript fundamentals, to middle and high school students.

## **Education**

Bachelor of Information Systems (S1)

Indonesian Digital Technology University (STMIK AKAKOM Yogyakarta)

GPA: 3.61/4.00

## **Personal Projects**

### **MrCarWash (SaaS)**

**mrcarwash.app – Indonesia**

**July 2024 – Present**

- Single-handedly designed, developed, deployed, and currently manage a comprehensive web-based Car Wash Management SaaS solution.
- Built the core dashboard application with Laravel, developed the public-facing landing page with Next.js, and established the entire CI/CD pipeline for high availability and scalability.
- Integrated secure online payment gateways, streamlining transaction processing and enhancing user convenience.
- Implemented an advanced predictive analytics module using Linear Regression to forecast vehicle entry patterns, enabling data-driven optimization of staffing and inventory.
- Designed and deployed a robust inventory management system, generating detailed reports that contributed to a significant reduction in waste and improved cost efficiency.
- Developed and automated the employee salary calculation module, minimizing manual errors and substantially reducing administrative overhead.
- Developed and integrated a marketing automation system, leveraging open-source tools for Google Maps data scraping and executing automated campaigns via Evolution API.
- Incorporated AI-powered content generation for blog articles, significantly boosting the main page's SEO performance.
