
PROFESSIONAL SUMMARY

Data-driven Supply Chain Analyst with around 4 years of experience in demand planning, inventory optimization, and supply chain analytics across manufacturing and e-commerce environments. Strong expertise in forecasting, KPI tracking (**OTIF, fill rate, inventory turnover**), **ERP systems (SAP)**, and analytics tools (**Python, SQL, Tableau, Power BI**). Proven record of improving forecast accuracy, reducing excess inventory, and optimizing warehouse and logistics operations through structured analysis and data-backed decision making.

SKILLS & CERTIFICATION

Technical Skills: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, VBA, SAP ERP, SAP HANA, Ariba, NetSuite, Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Power Query, Macros), SSMS, Alteryx, MySQL, Visio, Lucidchart, GCP, AWS

Analytics & Reporting: KPI Tracking (OTIF, Inventory Turnover, Fill Rate, Forecast Accuracy), Time Series Forecasting, Regression Models, ABC/XYZ Analysis, Trend & Pattern Analysis, Hypothesis Testing, A/B Testing, Cycle Time Analysis

Inventory & Demand Planning: Forecasting, EOQ, Safety Stock Optimization, JIT, Scenario Planning, S&OP, SKU Rationalization

Supply Chain & Operations: Inventory Management, Demand Planning, Procurement & Supplier Management, Logistics Coordination, Warehouse Optimization, ERP/TMS/WMS Systems

Process Optimization: Lean Six Sigma, Value Stream Mapping, Root Cause Analysis (5-Why, Fishbone), DFMEA, PFMEA

Core Competencies: Project Management, Risk Control, Data-Driven Decision Making, Workflow Mapping, Agile Tools (Jira, Scrum)

Certification: AWS Certified Data Engineer – Associate [\[Link\]](#)

WORK EXPERIENCE**Belk, USA | Supply Chain Analyst****May 2024 - Present**

- Analyzed sales and seasonal demand data across apparel, home, and beauty categories using **Python** to support **time-series forecasting**, improving forecast accuracy by 18% and reducing demand variability across regional distribution centers and store replenishment.
- Optimized store-to-DC inventory positioning by applying **EOQ, safety stock**, and replenishment logic within **SAP S/4HANA**, increasing inventory turnover by 22% while maintaining in-stock levels during key retail peaks, including holiday and clearance cycles.
- Tracked omnichannel supply chain KPIs **OTIF, fill rate, lead-time variance**, and backorder rate using **Power BI** and **Alteryx**, enabling weekly executive reporting that improved **OTIF performance** from 91% to 97% across store and e-commerce order execution.
- Supported **S&OP** and **demand planning** cycles by integrating data from **NetSuite, WMS, and TMS**, aligning vendor purchase orders, DC capacity, and store allocation plans, resulting in a 28% reduction in stock-out incidents across core merchandise categories.
- Conducted structured **root cause analysis (5-Why, DFMEA)** on supplier delays, DC bottlenecks, and last-mile fulfillment issues, partnering with merchandising, procurement, and logistics teams to implement corrective actions that reduced late inbound shipments by 35%.

Kpit Technologies, Pune, India | Supply Chain Analyst**August 2020 – July 2022**

- Evaluated demand and inventory data using **Python** and **SQL (MySQL)** to perform forecasting and **ABC/XYZ analysis**, improving forecast accuracy by 16% and prioritizing high-impact SKUs across automotive supply programs.
- Streamlined inventory planning processes in **SAP ERP** by applying **EOQ models** and **SKU rationalization**, reducing excess inventory by 21% while sustaining required service levels for production schedules.
- Tracked supply chain KPIs, including fill rate, cycle time, and supplier lead-time variance through **Tableau dashboards** and **Excel (Pivot Tables, VLOOKUP)**, enabling corrective actions that increased fill rate from 89% to 95%.
- Conducted **hypothesis testing, A/B testing**, and **cycle time analysis** to assess warehouse layout and logistics workflows, achieving a 14% reduction in order processing time and improved warehouse throughput.
- Mapped end-to-end supply chain workflows using **Visio, Value Stream Mapping, Fishbone**, and **PFMEA**, collaborating with procurement, logistics, and warehouse teams to resolve process bottlenecks and lower operational defects by 18%.

ACADEMIC PROJECTS**Sales Performance Analysis | Python, Pandas, SQL, Power BI****April 2024**

- Conducted data extraction and transformation using **Python, Pandas**, and **SQL** to analyze sales data from multiple sources, identifying key trends and patterns that revamped sales forecasting accuracy by 20%.
- Implemented **Power BI dashboards** to present sales performance insights, automating report generation and enabling stakeholders to make data-driven decisions, increasing report utilization by 30%.

NYC Traffic Collision Data Analysis | Talend, Alteryx, GCP, SQL, Power BI**April 2023**

- Collected NYC traffic collision data using **GCP** and developed automated **ETL pipelines** in **Talend**, with **Alteryx** profiling that boosts data integrity by 29.5%.
- Wrote complex **SQL queries** and designed 12 automated **Power BI dashboards** to identify 5+ high-risk accident zones, reducing query time by 35% and enabling **faster reporting**.

EDUCATION**Master of Science in Information Systems | Northeastern University, Boston, USA****May 2024****Bachelor of Engineering, Electronics and Telecommunications | University of Mumbai, India****May 2022**
