

Sri Lasya Gottumukkala

Data Analyst

MO, USA | (908) 633-1676 | Email: gottumukkalasrilasya@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with **3+ years of experience** delivering **business intelligence solutions**. Proven expertise in building scalable **Power BI dashboards** for **executive KPI tracking** and developing **standardized KPI frameworks** to drive **data-driven decision-making**. Strong in **SQL** and **Python (Pandas, NumPy)**, with hands-on experience integrating data from **Snowflake, SQL Server, PostgreSQL, POS and inventory systems**, and **external pricing benchmarks**. Adept at **automating reporting and alerting workflows** using **Power BI Service** and **Azure Logic Apps**, significantly **reducing manual effort** and enabling **faster, more reliable insights**.

TECHNICAL SKILLS

Analytics & BI	Power BI (DAX, Power Query), Tableau, Excel (PivotTables, Power Pivot), Looker, SSRS
SQL & Databases	SQL (CTEs, window functions), Snowflake, SQL Server, PostgreSQL, Azure SQL, Redshift
Python	Pandas, NumPy, data cleaning, automation (matplotlib only if used for stakeholder reporting)
Data Modeling & ETL	Dimensional modeling (Star/Snowflake), dbt, SSIS, Azure Data Factory, Airflow
Cloud	Azure (Synapse, Databricks, Storage), AWS (S3, Redshift, CloudWatch)
Collaboration	GitHub, Azure DevOps, Jira/Confluence, Agile/Scrum

WORK EXPERIENCE

Data Analyst | Centene Corporation, St. Louis, MO, USA

Jan 2025 - Present

- Automated data transformation and analytical workflows using **Python (Pandas, NumPy)** and **SQL**, reducing manual reporting effort by **25%** and saving **10 hours per week** by automating **8 recurring reports**.
- Designed and maintained analytics-ready datasets in **Snowflake** and **Azure Synapse**, improving query performance by **40%** (average runtime reduced from **25 seconds to 15 seconds**) and supporting scalable BI reporting for **5+ business teams**.
- Built and owned **Power BI dashboards** for KPI tracking and trend analysis, used by **30+ stakeholders across 6 teams**, reducing ad-hoc report requests by **35%** and improving reporting turnaround from **2 days to same-day delivery**.
- Implemented **PySpark-based data validation** (null checks, deduplication, schema enforcement), achieving **>99% data accuracy** and reducing downstream data quality issues by **45%** (from **20 issues per month to fewer than 11**).
- Loaded curated datasets into **Amazon Redshift** and monitored AWS RDS performance using **CloudWatch**, maintaining **99.5% pipeline uptime** and reducing incident response time by **30%**.
- Partnered with business stakeholders to consolidate **20+ reporting requirements** into standardized KPI definitions, optimizing pipelines to reduce refresh time by **33%** (from **45 minutes to 30 minutes**) and improving metric consistency across **15+ reports**.
- Conducted exploratory data analysis (EDA) using **PySpark** and delivered insights through **Power BI**, identifying key trends and anomalies that supported quarterly planning and operational decision-making.
- Built automation workflows using **Azure Databricks/Spark, Azure Functions, and Logic Apps** to process **120–150 GB of data daily** across **10+ source systems**, reducing end-to-end pipeline runtime by **30%**.
- Supported **Kafka-based near real-time ingestion pipelines** processing **1M+ events per day** with **under 5 minutes end-to-end latency**, enabling timely availability of data for analytics use cases.
- Used **Azure DevOps and GitHub** for version control and deployment workflows, supporting **10–12 analytics releases per month** and improving deployment stability by reducing rollback incidents by **20%**.
- Integrated external data sources via **REST and GraphQL APIs**, ingesting data from **6+ endpoints**, reducing manual data extraction by **8 hours per week** and improving reporting completeness by **25%**.

Data Analyst | Accenture, India

Sep 2021 – Nov 2023

- Designed and deployed **Power BI dashboards (6+)** visualizing banking KPIs (NIM, LDR, delinquency, churn), used by **25+ stakeholders** to support weekly performance reviews.
- Integrated large datasets from **Snowflake, SQL Server, and PostgreSQL** using **Power Query**, optimizing transformations to cut report load time by **35%**.
- Automated weekly product performance reporting using **Python**, reducing turnaround time by **60%** and saving **8 hours per week** through automated data prep and validation.
- Built and standardized **10+ custom KPIs** (sales velocity, margin contribution, markdown impact, inventory turnover) to support pricing and inventory decisions across multiple categories.
- Automated recurring reporting and alerting using **Power BI Service** and **Azure Logic Apps**, reducing manual intervention by **50%** and improving on-time delivery of weekly reports.

- Consolidated POS, inventory, and external pricing benchmark data into a centralized reporting model covering **8+ data sources**, improving completeness and reducing reconciliation effort.
- Developed regression-based **product risk scoring** to flag high-return SKUs and potential loss leaders, improving risk visibility and reducing analysis time by **40%**.
- Implemented **row-level security (RLS)** by role and region in Power BI to meet compliance needs, supporting secure access for **6+ teams**.
- Reduced manual reporting by **70%** by implementing automated refresh schedules and pipeline-driven datasets in **Power BI Service**.
- Built Python scripts for **SKU-level margin analysis (5,000+ SKUs)**, accelerating profitability insights and reducing manual effort by **6 hours per week**.
- Partnered with data engineers to validate ETL outputs and improve data quality, reducing recurring data issues by **30%**.

PROJECTS

Data Nexus – Analytics Platform (master's Research Project)

- Designed an end-to-end analytics solution to centralize alumni and employer engagement data for reporting.
- Generated realistic datasets using Python and Faker; cleaned and transformed data using Pandas and NumPy.
- Modeled structured data using star schema principles to support efficient analysis.
- Built interactive Power BI dashboards to track KPIs, trends, and cohort-level insights.
- Improved clarity of insights through consistent visual design and stakeholder-focused reporting.

CERTIFICATION

- **Data Visualization for Data Analyst and Analytics**
- **Introduction to Data Science**
- **Python for Data Science and Machine Learning Essential Training**

EDUCATION

Master of Science in Information Systems

Saint Louis University, Saint Louis, Missouri, USA

Bachelor of Technology in Electronics and Communication Engineering

Lakireddy Bali Reddy College of Engineering, Andhra Pradesh, India
