

Mounika Boggavarapu

Data Scientist

(813) 568-7138 | mounikaboggavarapu0@gmail.com | [LinkedIn](#) | Irving, TX

SUMMARY

Data Scientist with 3+ years of experience designing predictive models, optimizing data pipelines, and transforming complex datasets into actionable insights. Proficient in statistical analysis, machine learning, NLP, and cloud platforms such as AWS, with strong expertise in Python, R, SQL, and visualization tools. Skilled at collaborating with cross-functional teams to deliver scalable, explainable, and high-impact data solutions that drive business performance.

SKILLS

Programming & Query: Python, SQL, R, PySpark

ML & Statistics: Regression (Linear/Logistic), Tree-Based Models (Random Forest, XGBoost), Clustering (K-Means), Anomaly Detection, Hypothesis Testing, A/B testing

Deep Learning & NLP: TensorFlow, PyTorch, Keras; Transformers (Hugging Face – BERT, GPT), NLP, LLMs, LangChain

Data Engineering: ETL Pipelines, Feature Engineering, Big Data Processing (PySpark, Hadoop), Data Warehousing (Snowflake, Redshift)

Cloud Platforms: AWS (S3, EC2, Lambda, SageMaker), Azure (Data Factory, Functions, VMs)

Databases: PostgreSQL, SQL Server, MySQL, MongoDB

Visualization & Tools: Tableau, Power BI, Matplotlib, Seaborn, Jupyter

EXPERIENCE

Goldman Sachs, Dallas, TX | Data Scientist

Feb 2025 – Present

- Uncovered hidden patterns in large-scale financial datasets by implementing unsupervised learning techniques, including K-Means Clustering, Gaussian Mixture Models (GMMs), and Autoencoders.
- Architected custom neural networks (CNNs, LSTMs, Transformers) to boost pattern recognition and predictive modeling capabilities.
- Built and deployed credit risk models using Python and XGBoost, driving data-driven underwriting and reducing loan default rates by 18% across portfolios exceeding \$50M.
- Designed and executed A/B testing frameworks to validate the new XGBoost credit risk model against legacy rule-based systems, confirming a statistically significant 12% lift in approval accuracy.
- Developed and maintained interactive Tableau dashboards to track KPIs, credit exposure, and customer segments, spurring a 10% rise in data-driven strategies.
- Integrated AI-powered financial forecasting models using LLMs (GPT-4, LLaMA, Gemini), increasing forecast accuracy by 25% and reducing manual reporting time by 40%.
- Developed a churn prediction model using Scikit-learn, achieving an F1-score of 0.85 and identifying at-risk customers to support retention strategies.

Value Labs, Remote, India | Data Scientist

Nov 2022 to July 2023

- Collaborated with data engineers and operation team to implement ETL process, wrote and optimized SQL queries to perform data extraction to fit the analytical requirements.
- Wrote SQL queries, and scripts for data analysis, reporting, and data visualization, on MS SQL Server, resulting in updated decision-making processes for stakeholders and a 5% decrease in average query execution time.
- Executed security measures, including access controls and encryption protocols, to protect sensitive information within MySQL databases.
- Established an automated report creation process using Power Automate, Power BI, and Excel, reducing manual efforts.

Experion Technologies, India | Data Scientist

Jan 2021 to Oct 2022

- Trained and deployed classifiers including Naïve Bayes, Logistic Regression, and Random Forest to predict loan default probability, achieving an AUC score of 0.85.
- Applied Convolutional Neural Networks (CNN) for image recognition tasks and Natural Language Processing (NLP) algorithms for text analysis and understanding.
- Developed pipeline using Hive (HQL) to retrieve the data from sources, SQL to retrieve data from Oracle database, and used ETL for data transformation.
- Employed big data tools like Spark (Pyspark, SparkSQL, Mllib) for real-time analysis of loan defaults based on AWS, enhancing data processing speed by 25% and improving predictive accuracy by 15%.
- Conceptualized TensorFlow, PyTorch, and Transformer models to build and optimize deep learning architectures, resulting in a 25% improvement in the accuracy and performance of predictive analytics.

EDUCATION

Master of Science in Computer Science

University of South Florida, Tampa, FL

May 2025

CERTIFICATES

- [IBM Data Science Professional Certificate](#)
- [AWS Certified Data Engineer – Associate](#)
- [AWS Certified Cloud Practitioner](#)
