

Summary

- Data Analyst with 6+ years of experience using statistical computer languages like Python, R, and SQL to manipulate and analyze large datasets. Strong background in querying large data sets using SQL, and building interactive dashboards and reports using Power BI, Tableau, Power Pivot, and Excel. Experienced in data management using R and Excel, working with databases like Snowflake, and developing metrics and data linkages for business insight. Proven track record of transforming raw data into actionable strategies that support operational improvements and data-driven decision-making.
- Expertise spans the full data lifecycle, from ETL processes and data warehousing (AWS Redshift, SQL Server) to statistical analysis, predictive modeling, A/B testing, and the creation of intuitive dashboards for diverse stakeholders, consistently improving data accessibility and understanding across organizations.

Skills

- Programming Languages:** Python (libraries: NumPy, Pandas, Matplotlib, SciPy), R (libraries: ggplot2), SQL (Advanced, Query Optimization)
- Database Technologies:** MySQL, SQL Server, Snowflake, Amazon Redshift, Google BigQuery, Microsoft Azure SQL Database
- Data Visualization Tools:** Seaborn, Tableau, Power BI, Google Data Studio, Streamlit, Plotly
- Data Analysis:** Data Cleaning, Data Wrangling, Data Mining, Scikit-learn (for predictive modeling/regression)
- Cloud Computing:** AWS (e.g., S3, Redshift interaction), Azure (e.g., Blob Storage, Azure SQL DB interaction), Google Cloud Platform (e.g., BigQuery interaction)
- Business Intelligence (BI) Tools:** Qlik Sense, Looker
- Statistical Software:** SPSS, SAS
- Methodologies:** Agile, Waterfall, Data Modeling (Star/Snowflake Schema), ETL Processes (Understanding), Data Cleaning & Transformation
- Tools & Environment:** Jupyter Notebook, Git
- Statistical Analysis & Soft Skills:** Descriptive Statistics, Inferential Statistics, Hypothesis Testing (A/B Testing), Regression Analysis, Time Series Analysis, Predictive Modeling, Analytical Thinking, Problem-Solving, Cross-functional Collaboration, Stakeholder Communication, Presentation.

Experience

- Senior Data Analyst | Epik Solutions (Client: Pacific Gas & Electric), USA

APR 2023 – PRESENT

 - Developed and automated ETL pipelines using Python and SQL within the AWS ecosystem (S3, Glue, Redshift), processing over 50GB of utility usage data daily, which reduced data preparation time by 30% and improved data accuracy for regulatory reporting.
 - Created interactive Tableau dashboards monitoring grid performance and outage incidents, providing near real-time visibility to operations teams, leading to a 15% faster response time to critical events and optimizing resource allocation during peak demand periods.
 - Performed complex geospatial analysis combined with time-series forecasting to predict potential equipment failure hotspots, contributing to a proactive maintenance strategy that aimed to decrease unplanned outages by 10% within the first year of implementation.
 - Collaborated with engineering and compliance teams to define key performance indicators (KPIs) and build data models supporting safety and reliability initiatives, ensuring adherence to stringent industry regulations and facilitating data-driven safety improvements.
- Senior Analyst I | Capgemini America Inc. (Client: Citi Bank), USA

APR 2021 – MAR 2023

 - Engineered and maintained complex SQL queries and stored procedures within SQL Server to extract and aggregate financial transaction data for risk analysis, supporting the identification of fraudulent activities totaling over \$5M annually.
 - Designed and deployed Power BI dashboards visualizing key risk metrics and compliance adherence across multiple banking products, enabling senior management to identify risk trends 25% faster and make more informed mitigation decisions.
 - Automated weekly and monthly reporting processes for portfolio performance using Python scripts, saving the team approximately 20 hours per month in manual effort and eliminating data entry errors previously impacting report accuracy.
 - Conducted A/B testing analysis on digital marketing campaigns targeting credit card acquisitions, interpreting results using statistical methods to provide recommendations that increased conversion rates by 8% in subsequent campaigns.
- Data Analyst | Vetro Technologies (Now Dissolved), USA

SEP 2020 – MAR 2021

 - Cleaned, transformed, and analyzed telecommunications network data using SQL and Python (Pandas) to identify infrastructure upgrade opportunities, presenting findings that guided \$2M in capital expenditure towards high-impact network improvements.
 - Built performance monitoring dashboards in Tableau for fiber network deployment projects, tracking progress against milestones and budget, which improved project visibility and helped reduce average project completion delays by 12%.
 - Supported the product team by analyzing user engagement data from a SaaS platform, identifying key features driving retention and providing insights that informed the product roadmap and contributed to a 5% reduction in customer churn.
- Data Scientist | ThreatModeler Software Inc, NJ USA

AUG 2019 – SEP 2020

 - Developed Python scripts for data extraction and feature engineering from cybersecurity threat data sources, preparing datasets for machine learning models aimed at predicting potential application vulnerabilities.
 - Analyzed threat modeling outputs to identify patterns and common security weaknesses across different software architectures, contributing insights that enhanced the core threat modeling engine's accuracy by 10%.
 - Collaborated with software engineers to integrate data analysis modules into the main product, creating visualizations (using libraries like Matplotlib/Seaborn) to help users understand their application's security posture more effectively.
- Executive IT-Trainee | Deccan Techno Solutions, INDIA

JUN 2016 – MAY 2017

 - Provided foundational IT support, including troubleshooting hardware/software issues and managing user accounts, developing core technical problem-solving skills.
 - Assisted senior analysts with basic data entry, report generation using Excel, and database querying (SQL), gaining initial exposure to data handling and analysis principles within a corporate IT environment.
 - Participated in training sessions on database management, network fundamentals, and software development lifecycles, building a broad understanding of IT operations.

Education

MS in Data Analytics New England College	PRESENT
MS in Computer and Information Sciences New York Institute of Technology	MAY 2019
Bachelor of Engineering in Computer Engineering Devi Ahilya Vishwavidyalya	MAY 2015
