Bachelor of Science in Information and Decision Science
Concentration: Management Information System

Graduation: May 2025

Relevant Coursework: Business Programming, Program Design 1, Business Statistics 1, Business Database Technology, Business Object Programming Using Java, Marketing Analytics, Business Systems Analysis Design, Business Project Management, Information Security

WORK EXPERIENCE

CarBacked

Andover, MN, Data Analyst

May 2025 - Present

- Analyze data from 5,000+ *car listings* and 100 *customer-dealer call records* to evaluate app performance, AI search accuracy, and dealership engagement.
- Ingest and analyze data from **CSV/Excel** uploads, application logs, and third-party call exports, storing consolidated datasets in a **SQL** database.
- Use **SQL** to extract, clean, and join data across vehicle inventory, user-entered search descriptions, and dealership interaction logs.
- Track core **KPIs** including lead-to-call conversion rate, search relevance, and dealership response time.
- Identify mismatches between AI-generated search results and dealership inventory, contributing to a 5% improvement in relevant vehicle matches.
- Create concise reports for product and operations teams, reducing manual analysis time.

Endeavor Health

Glenview, IL, Diagnostic Imaging Assistant

April 2024 – April 2025

- Managed daily patient check-in processes for approximately 100 patients using **EPIC software**, ensuring accurate data entry, system integrity, and seamless workflow automation.
- Provided technical support and troubleshooting for **EPIC** system-related issues, assisting healthcare staff in optimizing system usage while ensuring compliance with hospital policies.
- Ensured data accuracy and security within **EPIC** by adhering to **HIPAA** regulations, maintaining high standards of data integrity and patient confidentiality.
- Facilitated user training and support by explaining **EPIC** system functionalities, addressing technical inquiries, and enhancing system adoption among healthcare professionals.
- Collaborated with IT and healthcare teams to optimize **EPIC** system performance, streamline digital workflows, and improve overall efficiency in patient data management.

OneTouch Revenue

Chicago, IL, Marketing Analyst Intern

May 2022 - May 2023

- Managed multiple marketing projects and initiatives to strengthen brand visibility and drive website traffic growth.
- Collaborated with clients to evaluate ad performance, presented insights using **Power BI** dashboards, and implemented optimization strategies that *boosted sales by \$5,000-\$10,000 per month*.
- Directed a team in developing and updating client websites, resulting in a *70% increase in traffic*.
- Engaged with clients proactively to address inquiries, resolve concerns, and maintain strong professional relationships.

PROJECTS

Expense Tracker | Personal Project

- Developed a desktop application that enables users to register, log in securely, and manage personal finances by adding expenses and setting budgets.
- Built the backend in **Python**, implementing data storage and retrieval with **SQLite** to ensure reliable expense tracking.
- Designed a graphical user interface (GUI) using **Tkinter**, allowing for intuitive navigation and ease of use.

Walmart Sales and Revenue Dashboard

- Designed and implemented a sales and revenue dashboard for Walmart, optimizing **SQL** queries to extract insights on revenue trends, top-selling products, and regional sales performance.
- Conducted data cleansing and transformation, ensuring high-quality, structured data for accurate reporting and visualization.
- Created interactive visualizations displaying KPI metrics, sales trends, and profitability analysis to support data-driven decision-making.
- Integrated **SQL database with Tableau**, implementing filters and drilldowns for enhanced user experience and deeper analytical insights.

Senior Capstone Project - Data Analytics Business Simulation (Capsim)

- Conducted a semester-long data analytics project using a business simulation to model company operations and performance.

- Analyzed financial, market demand, and operational datasets to evaluate profitability, market share, unit costs, and contribution margins.
- Applied KPI tracking and trend analysis to support pricing strategy, production planning, and inventory optimization decisions.
- Evaluated workforce and training variables to assess impacts on labor costs, productivity, and operational efficiency.

SKILLS

Software: Microsoft Excel, Microsoft Access, Adobe Suite, PowerBI, Tableau

Technical Language: Python, Java, SQL, SQLite
