

Garrett Gauruder

Fintech & Data Platform Builder

Linden, MI | gauruder21@gmail.com | 734-679-4449

Professional Summary

Product-focused builder with 8+ years designing and shipping data-driven software used in real operations. Founder of production SaaS platforms in fintech and analytics, specializing in automated data pipelines, probabilistic models, and decision-support systems. Strong in Python, APIs, and production deployment, with experience owning products end-to-end from data ingestion through customer onboarding and iteration.

Experience

OptionEV / OutcomeEdge — Founder & Product Developer (Fintech SaaS) | Remote

Jan 2025 – Present

- Built and operate subscription fintech SaaS platforms (OptionEV, OutcomeEdge) that automate data ingestion, probabilistic modeling, and decision support for active traders.
 - Designed and deployed fully automated data pipelines that pull market and pricing data from external APIs, normalize inputs, run scoring and EV models, and publish results to live web applications.
 - Built Python services and background workers to run models, update databases, and trigger scheduled and event-driven alerts.
 - Integrated self-serve onboarding, billing, and account management using Stripe and webhooks.
 - Deployed and maintained production infrastructure including authentication, error handling, logging, and uptime monitoring.
-

EdgeWave AI Solutions — Product & Automation Engineer | Remote

Mar 2024 – Present

- Built and deployed production software systems that replaced manual workflows for small businesses and SaaS teams.
 - Designed and launched data-backed portals and dashboards that centralized intake, tracking, and operational reporting.
 - Developed API-driven web applications with authentication, payments, and background processing to support automated onboarding and data collection.
 - Shipped features in short build–test–deploy cycles, prioritizing working software over prototypes or slideware.
-

Teikametrics — E-Commerce Analyst, Premium Services | Remote

Jan 2023 – Feb 2024

- Analyzed large-scale advertising datasets to evaluate ROI, ROAS, profitability, and performance drivers.
 - Built standardized reporting and dashboards to support budget allocation and optimization decisions.
-

G22Tech LLC — Founder & Operator (Digital Commerce) | Linden, MI

May 2017 – Apr 2025

- Founded and scaled a seven-figure e-commerce business, owning data, pricing, operations, and automation.
 - Built internal analytics dashboards to monitor fulfillment SLAs, returns, and operational performance.
-

General Motors — Global Business Purchasing Service Lead | Detroit, MI

Feb 2017 – Feb 2021

- SAP Subject Matter Expert for Purchasing Department
 - Led data-driven process improvement initiatives across budgeting, approvals, and procurement workflows.
-
