

MUSKAN YADAV

Software Engineer

📞 8287916952 ✉️ muskanyadav0190502@gmail.com

Summary

Results-driven Software Engineer with experience in full-stack development, cloud solutions, and data analytics. Proven record of delivering scalable, high-performance applications and automating workflows to improve operational efficiency. Skilled in **React.js**, **Python**, and **Java**, with strong problem-solving abilities and a track record of measurable impact.

Education

Indraprastha Institute of Information Technology

2020-2024

Bachelor of Technology(B.Tech), Computer Science and Engineering(CSE)(CGPA-8.18/10)

Delhi, India

Relevant Coursework: Data Structures & Algorithms, Computer Vision, Artificial Intelligence, Database Management System, Data Science, Natural Language Processing, Analysis and Design Of Algorithms, Operating Systems

Experience

HCL Software - Software Development Engineer

August 2024 – Present

Bangalore, India

- Architected and deployed **3+ multi-page web applications** using **React.js**, enhancing UI responsiveness and reducing load time by **25%**.
- Developed and integrated **10+ APIs** to enable end-to-end provisioning, synchronization, and automation, reducing manual work by **40%**.
- Streamlined DevOps workflows by automating testing and deployment pipelines, cutting release cycles by **15%**.
- Tech Stack:** React.js, JavaScript, SpringBoot, Java, Jenkins, GitHub

Reliance Jio - Software Engineer Intern

May 2023 – July 2023

Bangalore, India

- Configured **10+ Azure Alerts and Logic Apps**, improving error detection accuracy by **30%** and reducing downtime by **15%**.
- Built an API testing platform (Postman-inspired), reducing API debugging time by **20%**.
- Integrated the platform into CI/CD pipelines, improving release quality.

Research Internship, IIITD

May 2022 – June 2022

Delhi, India

- Analyzed fMRI datasets using SPM, VBM, and MATLAB to study autism-related affective states, achieving **90%** statistical model accuracy with CAT12.
- Processed and visualized neuroimaging data to identify patterns contributing to academic research.

Projects

Online Retail Store System

April 2022

- Designed **MySQL** database schema supporting **100+** products, enabling stakeholder-specific views and reducing query time by **15%**.
- Tools:** MySQL, HTML/CSS

Mood-based Movie Recommendation System

February 2023

- Developed an AI-driven recommendation system using collaborative & context-based filtering, increasing accuracy by **15%**.
- Tools:** Python, Scikit-learn, Pandas, NumPy

Analysis of CrossFit Athlete Performance

December 2023

Processed **1,000+** athlete records using Tableau and statistical models, uncovering performance correlations up to **0.85**.

Technical Skills

Languages: Python, Java, C++, C, HTML/CSS, JavaScript, SQL, Prolog, KQL

Framework and Tools: React.js, Node.js, GitHub, MySQL, MATLAB, OpenCV, TensorFlow, PyTorch, RabbitMQ

Data Analytics and Visualization: Tableau, Excel

Achievements

- Led STEM awareness programs for **100+** participants via GirlUp Udaan.
