

NATSNET TEWOLDE

Data Analyst

Virginia | +1 (202) 455-6549 | tewoldenatsda05@gmail.com | [LinkedIn](#)

Summary

Data Analyst with 7+ years of experience in transforming complex data into actionable insights and improving business operations through strategic analysis and visualization. Proficient in SQL Server, MySQL, Python, Power BI, Tableau, Salesforce, and Azure/AWS, with strong expertise in requirements gathering, gap analysis, ETL processes, and CRM analytics. Adept at collaborating with cross-functional teams to design data-driven solutions, streamline workflows, and support key business decisions. Proven success in developing interactive dashboards, optimizing data pipelines, and implementing cloud-based analytics solutions that drive operational efficiency and enhance stakeholder visibility. Certified in MCSA, AWS Solutions Architect, Salesforce Administration, Agile, and Scrum Master, with a passion for leveraging data and technology to deliver measurable business value.

Skills

Database Platforms: SQL Server 2008, 2012, 2016, MySQL 5.6, Sybase, Oracle

Cloud Platforms: AWS, Azure

Virtualization Tools: VMware

Programming & Scripting: T-SQL, Python, Shell

Data Analysis & Statistics: Descriptive Statistics, Probability, Regression Analysis, Hypothesis Testing, A/B Testing

Data Visualization & BI Tools: Tableau, Power BI, Looker, MicroStrategy

ETL & Integration Tools: Integration Services (SSIS), ODBC / DB Link, SQL Server Migration Assistant

Office & Productivity Tools: Excel, Access, PowerPoint, Microsoft Project, VLOOKUP, HLOOKUP

Collaboration & Management Tools: SharePoint, ServiceNow, Zendesk, CA Workload Automation

Modeling & Documentation Tools: MS Visio, FlexPLM, COT, SAM

Business Analysis Techniques: Requirements Gathering, Gap Analysis, Business Process Modeling, SWOT Analysis

Documentation & Reporting: BRD, FRD, User Stories, Use Cases

Methodologies & Frameworks: SDLC, JAD Sessions, Brainstorming Sessions

Stakeholder Management: Business Owners, Business Users, Stakeholders

Compliance & Standards: HIPAA

CRM / Business Tools: Salesforce

Operating Systems: Windows Server 2008, 2012, Windows 7, 8, Linux, UNIX

Work Experience

Data Analyst

| Nov 2020 – Present

MetLife, Cary, NC

- Designed dynamic Power BI dashboards that provided actionable insights for strategic decision-making, leading to a 10% reduction in excess inventory.
- Streamlined workflows by creating detailed process maps and workflow diagrams in MS Visio, which improved data collection efficiency and ensured alignment across teams.
- Optimized SQL queries and restructured database logic, which significantly improved data retrieval performance and minimized reporting delays.
- Created 5+ Excel dashboards using Pivot Tables and VLOOKUP, tracking marketing performance metrics for campaigns in regions.
- Build and publish customized interactive reports and dashboards using Tableau, ensuring accessibility and report scheduling for stakeholders.
- Wrote complex T-SQL queries, stored procedures, views, and triggers for data extraction, transformation, and loading (ETL) operations.
- Performed data migration and conversion using SQL Server Migration Assistant and ODBC/DB Link between heterogeneous database environments.
- Integrated multiple data sources, including Excel, Access, Salesforce, and FlexPLM, to design unified data views and reports.
- Administer and maintain databases in MSSQL Server, ensuring data integrity and security while performing regular backups and optimizations to enhance database performance.

- Worked on Data cleansing and Data staging of operational sources using ETL processes and developed data visualizations using graphs, charts, and tables to communicate findings to a lay audience
- Design A/B testing and experimentation to optimize marketing campaigns, resulting in a 12% increase in conversion rates.
- Develop Azure Databricks notebooks for business transformation and data cleansing operations, ensuring high data quality and consistency.
- Maintained compliance with data governance and performance management standards, ensuring data integrity.

Business Data Analyst

| Jan 2018 – Nov 2020

Freddie Mac, McLean, VA

- Gathered, analyzed, and documented business and system requirements from diverse stakeholders including business users, product owners, and technical teams, ensuring alignment with business objectives and compliance standards such as HIPAA.
- Supported all key phases of the Software Development Life Cycle (SDLC) — from requirements analysis, solution design, and testing to deployment and post-implementation review.
- Developed and maintained comprehensive BRD, FRD, User Stories, and Use Cases to facilitate clear communication between business and development teams.
- Conducted Gap Analysis, SWOT Analysis, and process mapping to identify inefficiencies, define automation opportunities, and improve data-driven decision-making.
- Supported data integration and migration projects using SQL Server Integration Services (SSIS), ODBC connections, and SQL Server Migration Assistant (SSMA) to ensure data consistency across environments.
- Designed and implemented data visualizations and performance dashboards using Tableau, Power BI, and MicroStrategy, enabling real-time tracking of KPIs, trends, and business metrics.
- Partnered with Azure and AWS cloud teams to align data warehousing and analytics solutions with evolving business requirements and compliance standards.
- Leveraged Python for data cleaning, transformation, and statistical analysis, including Descriptive Statistics, Regression, A/B Testing, and Hypothesis Testing to support predictive insights.
- Created process workflows and data models using MS Visio, Lucidchart, and Microsoft Project for business process re-engineering and system enhancement documentation.
- Collaborated closely with development and QA teams to define acceptance criteria, validate functionality in SIT and UAT, and ensure deliverables met user expectations.
- Facilitated JAD (Joint Application Design) and brainstorming sessions to clarify requirements, mitigate ambiguities, and build stakeholder consensus.
- Worked with ServiceNow and Zendesk to manage incidents, change requests, and service tickets, ensuring timely resolution and accurate communication between business and IT teams.
- Conducted data audits and quality checks using Windows Event Logs, Activity Monitor, and SQL Profiler to ensure integrity and reliability across data pipelines.
- Collaborated with Salesforce teams to analyze business workflows, integrate CRM data, and optimize customer data reporting.

Education

Bachelor of Science: Information Systems and Operations Management

George Mason University, Fairfax, VA

Certifications

- MCSA: Administering MS SQL Server 2012 Database
- Agile Methodology
- AWS Solutions Architect
- Certified Scrum Master
- Salesforce Admin
