(440) 870-1960 | [vanshikakapur2002@gmail.com](mailto:vanshikakapur2002@gmail.com) | [linkedin.com/in/vanshika-kapur](https://www.linkedin.com/in/vanshika-kapur) | [github.com/vanshikakapur](https://github.com/vanshikakapur)

## EDUCATION

---

### Indiana University Bloomington

August 2024 – May 2026

*Master of Science in Data Science* GPA: 3.8/4.0.

*Bloomington, Indiana*

Coursework: Data Visualization, Advanced Database Concepts, Statistics, Applied Machine Learning, Information Visualization, Management Access Using Big Data.

### Medi-Caps University

August 2020 – May 2024

*Bachelor of Technology in Computer Science* GPA: 8.8/10.0.

*Indore, India*

Coursework: Python, Object-Oriented Programming (OOP), Operating Systems, Statistics, Data Structures and Algorithms.

## EXPERIENCE

---

### Data Analyst Associate Instructor, Indiana University Bloomington — US

August 2025 – December 2025

- Mentored **100+** students in building insight-driven dashboards using **Python, Power BI, and Google Analytics**, elevating the clarity and analytical depth of their deliverables.
- Coached students in designing **SQL, PySpark, and ETL pipelines** leveraging Google Cloud and BigQuery, enhancing their capability to manage and analyze large-scale datasets.
- Facilitated weekly doubt-clearing sessions and office hours, delivering detailed feedback on **200+** assignments to strengthen technical precision and analytical skills.

### Data Analyst Intern, Vertiv — Chesterfield, US

May 2025 – August 2025

- Engineered and deployed a capacity allocation tool using **Python and VBA** for **30+** assembly lines, including a comprehensive user manual, reducing manual planning effort by **90%**.
- Modeled and launched **3+** real-time Power BI dashboards across **20+ plants** using **DAX** and **VLOOKUP** to support capacity planning, footprint visualization, and demand composition analysis.
- Presented analytical findings to a **6** member leadership team, translating complex operational data into clear, actionable insights that supported strategic and day-to-day decision-making.

### Data Analyst Intern, Celonis — Indore, India

June 2023 – August 2023

- Executed advanced process mining projects for **Spotify's operational workflows**, improving data visibility and structural clarity across **10+** process variants.
- Leveraged Celonis tools such as Conformance and Variant Explorer to perform root-cause analysis on **KPI** gaps, driving a measurable **20%** improvement in system productivity.
- Analyzed end-to-end data pipelines to identify **5+** workflow bottlenecks, enabling targeted operational optimization and system enhancements.

## PROJECTS

---

### Customer Churn Analytics and Prediction Workflow | *Power BI, Python, SQL Server, Scikit-learn*

- Architected a churn data pipeline in SQL Server, transforming **30+ attributes**, resolving nulls across **25+ fields**, defining **3+ KPIs** like churn rate, and creating views powering **10+ visuals**.
- Implemented a **Random Forest** model by encoding **20+ variables**, evaluating with **confusion matrix** and classification report, and generating churn predictions for BI reporting.

### Amazon Sales Analysis | *Python, TensorFlow, Seaborn, scikit-learn, Tableau*

- Executed in-depth analysis of Amazon sales data using Python for preprocessing and statistical modeling, uncovering **5** key trends that informed targeted marketing strategies.
- Designed interactive **Tableau** dashboards integrating Python-based custom visuals, delivering insights that increased revenue potential by **25%** and improved strategy effectiveness by **20%**.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, SQL, VBA, DAX.

**Tools:** Power BI, Tableau, Microsoft Excel, Google Cloud Analytics, Alteryx.

**Databases:** MySQL, SQL Server, SQLite, Snowflake, MongoDB, PostgreSQL

**Libraries:** Seaborn, Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib

**Concepts:** Statistical Analysis, Exploratory Data Analysis (EDA), Data Visualization.
