

GURPREET KAUR | Data Analyst – Business Intelligence

CA, USA | +1 (909) 815-9793 | paddagurpreet123@gmail.com | [LinkedIn](#) | U. S. Citizen

SUMMARY

Insightful and results-driven **Data Analyst – Business Intelligence** professional with 7+ years of experience in extracting insights from complex datasets using **SQL, Power BI, Python**, and **Tableau**. Proven success in building dashboards, automating ETL workflows, and supporting enterprise analytics in healthcare, insurance, and energy sectors. Hands-on experience with **AWS, relational databases, machine learning models**, and regulatory environments (**HIPAA, GDPR**). Adept at cross-functional collaboration, stakeholder communication, and transforming data into compelling visual stories that drive strategic decisions.

TECHNICAL SKILLS

Business Intelligence & Visualization Tools: Power BI, Tableau, Looker, QlikView, Datorama, Microsoft Excel (Advanced: Pivot Tables, Macros, VLOOKUP), ggplot2, Seaborn, Matplotlib, Dash, Plotly

Programming Languages & Scripting: Python, R, SQL, SAS, DAX, C, JavaScript (for data viz integration)

ETL & Data Integration Tools: SSIS, Informatica, Talend, Alteryx, Apache NiFi, Airflow, Data Factory, dbt, AWS Glue

Databases & Querying: SQL Server, MySQL, PostgreSQL, Oracle, Microsoft Access, Amazon Redshift, Google BigQuery, MongoDB

Statistical & Data Analysis: Descriptive & Inferential Statistics, Hypothesis Testing, ANOVA, Regression (Linear, Logistic), Time Series Forecasting, Cluster Analysis, A/B Testing, Data Mining, Data Wrangling, Statistical Modeling, Experimental Design

Machine Learning & AI: Scikit-learn, TensorFlow, Keras, XGBoost, LightGBM, Feature Engineering, Supervised/Unsupervised Learning, Model Validation, Cross-Validation

Tools & Platforms: Jupyter Notebooks, Google Colab, PyCharm, Visual Studio Code, Git/GitHub, Docker, Jira, Confluence, Trello

Cloud Platforms & Big Data Technologies: AWS (S3, EC2, Lambda, Athena, Redshift, EMR), GCP (BigQuery, Cloud Functions), Azure (Data Lake, Data Factory), Apache Spark, Hadoop, Hive, Pig, Kafka

Methodologies & Frameworks: Agile (Scrum/Kanban), SDLC, Waterfall, CI/CD, DevOps basics

Soft Skills: Data Storytelling, Stakeholder Communication, Report Writing, Presentation, Problem Solving, Critical Thinking, Collaboration across Product, Tech & Business Teams

PROFESSIONAL EXPERIENCE

Arrowhead Regional Medical center USA	Aug 2024 – Present
Data Analyst – Business Intelligence	
- Designed and maintained Power BI dashboards and interactive Excel reports to track key clinical, financial, and operational KPIs, improving executive decision-making speed and transparency across 5+ departments. - Automated recurring reporting workflows using SQL queries and Excel VBA macros, reducing manual reporting time by 40% and increasing report accuracy through real-time data refreshes. - Extracted and integrated patient and operational data from Epic EHR systems, using SQL Server and PostgreSQL to create reliable datasets for weekly performance monitoring and compliance reporting. - Developed and deployed custom Epic Clarity and Reporting Workbench reports, enabling clinical teams to access up-to-date patient records, improving care coordination and reducing reporting lag by 30%. - Conducted predictive analysis using Python, R, and Scikit-learn, forecasting patient inflow and discharge trends, which supported better staffing and resource planning during seasonal fluctuations. - Created and optimized SQL stored procedures and views to support scalable reporting infrastructure, reducing query time by 50% for high-volume datasets. - Ensured data quality and regulatory compliance with HIPAA standards by implementing automated validation checks and maintaining secure access controls throughout the data pipeline. - Participated in Agile team sprints, backlog grooming, and project retrospectives, aligning deliverables with stakeholder expectations and achieving 95% on-time report delivery across projects.	
So-Cal-Edison USA	May 2023 – Jul 2024
Data Analyst	
- Conducted advanced data analysis using SQL, Python, and SAS on over 10 million rows of energy consumption and infrastructure data to identify trends, optimize energy usage, and reduce operational costs across multiple departments. - Developed and deployed Power BI and Tableau dashboards for real-time monitoring of energy grid performance, improving leadership visibility and reducing manual reporting time by 45%. - Built automated ETL pipelines using SSIS, AWS Glue, and Python scripts to streamline integration of structured and unstructured data into centralized data lakes and Redshift warehouses, enabling faster decision-making. - Utilized Apache Spark on AWS EMR to clean and process large-scale datasets, improving data processing speed by 60% and supporting scalable analytics across various business functions. - Applied A/B testing, regression models, and hypothesis testing to evaluate the impact of energy efficiency programs and modernization initiatives, directly influencing project funding and rollout strategies. - Ensured compliance with HIPAA, GDPR, and internal data governance policies by enforcing access controls, conducting regular data audits, and collaborating with cybersecurity and legal teams. - Automated cloud-based infrastructure provisioning using Terraform, reducing deployment time for analytics environments on AWS (EC2, Lambda, S3) by 70% and improving consistency across development environments. - Collaborated with business, product, and engineering teams in an Agile Scrum environment, contributing to sprint planning, data backlog prioritization, and delivery of stakeholder-focused analytical solutions.	
United Health Group USA	Apr 2021 – Apr 2023
Data Analyst	
- Designed and implemented interactive Power BI dashboards and Excel-based reports to monitor claims processing, patient outcomes, and provider performance, reducing report turnaround time by 35%. - Developed SQL queries and automated ETL pipelines to extract, clean, and transform data from SQL Server, MySQL, and internal claims systems, ensuring consistent data across analytics and compliance teams. - Migrated legacy Excel reporting systems to modern BI platforms (Power BI), increasing interactivity and reducing manual reporting errors by 40%. - Participated in cloud migration projects, transitioning legacy reporting workloads to AWS (S3, Redshift, Athena), improving data accessibility, scalability, and cost-efficiency. - Conducted descriptive and inferential statistical analysis using Python and Pandas, delivering insights that supported operational improvements and reduced processing delays in claims workflows. - Ensured compliance with HIPAA and internal audit controls by maintaining secure data access protocols and supporting regular compliance audits.	

- Contributed to **Agile sprints** by developing user stories, participating in daily standups, and delivering on-time reporting enhancements that supported product and operational stakeholders.
- Collaborated with cross-functional teams including actuaries, underwriters, and clinical teams to define data requirements, validate KPIs, and ensure alignment with business goals and regulatory needs.
- Supported enterprise-wide data quality initiatives by implementing automated validation checks, reconciling discrepancies, and standardizing datasets across departments.

Liberty Mutual | USA

Jul 2018 – Mar 2021

IT Coordinator (Data & Reporting Support)

- Supported IT and operations teams by developing and maintaining **Excel-based dashboards**, **SQL-driven reports**, and **Access databases** to streamline business-critical reporting processes across underwriting and claims departments.
- Automated monthly operational and compliance reports using **Excel macros** and **SQL queries**, reducing manual effort by **30%** and improving reporting accuracy for internal audits.
- Created and optimized **SQL Server** queries to extract and reconcile data from multiple systems, resolving data discrepancies and improving overall data reliability across applications.
- Participated in legacy system migration initiatives, assisting with **data cleansing**, validation, and report migration to ensure business continuity during enterprise modernization efforts.
- Maintained proper data access controls and implemented version control for recurring reports, supporting **internal audit readiness** and **data governance standards**.
- Documented **standard operating procedures (SOPs)** and provided end-user training to increase adoption of self-service reporting tools and reduce support ticket volume by 20%.
- Contributed to early adoption of **cloud-based reporting tools** and digital transformation by testing pilot dashboards in **Power BI** and coordinating rollout with key departments.

EDUCATION

Masters in Computer Applications

Punjab technical University, India

Bachelors in Computer Applications

Guru Nanak Dev University, India

CERTIFICATION

- **Certified SQL for Data Analysis**
- **Certified Power BI Essential Training**
