PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience uncovering business opportunities through advanced analytics, statistical modeling, and intuitive data visualization. Proficient in transforming complex, large-scale datasets into meaningful insights using Python (NumPy, Pandas), SQL, Tableau, Power BI, and Snowflake. Adept at designing A/B tests, ANOVA, and hypothesis-driven experiments to validate strategic initiatives, and delivering cloud-enabled analytics solutions on AWS and Azure.

SKILLS

Programming Languages & IDEs: Python, R Programming, SQL, NoSQL, Visual Studio Code, Jupyter Notebook

Statistical & Machine Learning Techniques: Descriptive & Inferential Statistics, Regression Analysis, A/B Testing, Statistical Modeling, Cohort Analysis, Hypothesis Testing, Regression Models, Decision Trees, Random Forests, Naive Bayes, SVM

Artificial Intelligence & Deep Learning: Convolutional Neural Networks (CNN), Reinforcement Learning, Autoencoders, Generative AI (LLMs), Prompt Engineering, AI Model Deployment (TensorFlow Serving), Responsible AI & Model Explainability (SHAP, LIME)

Data Processing & Management: ETL, Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Feature Engineering, Data Modeling, Data Integration, Data Warehousing, Data Governance

Packages & Frameworks: NumPy, Pandas, Matplotlib, SciPy, seaborn, Scikit-learn, TensorFlow, Keras

Data Visualization & Business Intelligence: Tableau, Power BI, Excel (Advanced), Looker, DAX, VBA, KPI Dashboard Design, Data Storytelling, D3.js, Gephi, Google Analytics, ArcGIS

Cloud & Database: AWS (S3, Lambda), Azure (Data Lake, Databricks), GCP (BigQuery), MySQL, SQL Server, MongoDB, Snowflake, SSMS

WORK EXPERIENCE

George Washington University

USA

Institutional Research Analyst

September 2025 – Present

- Built predictive models and conducted cohort, regression, and time-series analyses using Python and SQL to assess student retention, enrollment, and graduation trends, driving data-informed academic planning.
- Developed interactive Power BI dashboards integrating multi-source institutional data, streamlining executive reporting, and improving decision turnaround time by 35%.
- Automated ETL pipelines and data governance workflows to ensure data accuracy, compliance, and standardization across academic, financial aid, and HR systems.

Allstate

USA

Data Analyst

September 2024 – June 2025

- Designed and enhanced predictive risk assessment models using Python, NumPy, Pandas, and Scikit-learn with algorithms such as Random Forests, Naive Bayes, and SVM, improving claim fraud detection accuracy by 21% and reducing false positives.
- Performed comprehensive Exploratory Data Analysis (EDA), data profiling, and data cleaning on large-scale structured and semi-structured datasets from Snowflake and AWS S3, enhancing data quality and model readiness by 30%.
- Orchestrated end-to-end ETL workflows and integrated real-time claim and policy data through AWS Lambda and SSMS, reducing manual reporting and data refresh latency by 40%.
- Engineered and maintained interactive Tableau dashboards with advanced KPI design and data storytelling to monitor underwriting efficiency, claim ratios, and customer retention trends, accelerating stakeholder insights.
- Implemented Responsible AI and explainability techniques (SHAP, LIME) and integrated Generative AI for summarizing analytical findings, ensuring model transparency and compliance with insurance regulatory standards.

Kpit Technologies

India

Data Analyst

July 2020 – June 2022

- Established and deployed statistical models using Python, SciPy, and Keras to analyze system reliability and operational efficiency, delivering data-driven insights that improved client project performance by 18%.
- Conducted descriptive and inferential statistical analyses, including A/B testing and hypothesis testing, to evaluate software update impacts and optimize feature release cycles across product teams.
- Crafted and automated ETL pipelines for large-scale sensor and application data, implementing data transformation, integration, and warehousing on Azure Data Lake and SQL Server, improving data accessibility and governance compliance.
- Created Power BI dashboards and Excel DAX models for executive reporting of KPIs, identifying cost-saving opportunities and improving operational decision-making speed by 25%.
- Collaborated with cross-functional teams to track user interaction metrics through Google Analytics, enabling targeted performance optimization and supporting long-term product strategy.

EDUCATION

Master of Science in Data Science | Indiana University Bloomington, Indiana, USA

May 2025

Bachelor of Technology in Engineering | G Narayanamma Institute of Technology and Science, Hyderabad, India

June 2023

CERTIFICATIONS

PL 300 Power BI Data Analyst Associate, Microsoft | Data Science Professional Certificate, IBM | Tableau Desktop Specialist, Tableau | Google Data Analytics Professional Certificate, Google
