(309) 929-9074 | Rajapraful23@gmail.com | Bloomington, IL | LinkedIn

SUMMARY

Data Analyst with 3+ years of experience in healthcare, fintech, and insurance analytics, specializing in claims optimization, care-gap insights, and fraud detection using SQL, Python, and Snowflake. Proficient in building cloud-based data pipelines, predictive models, and executive dashboards with Azure, AWS, Tableau, and Power BI. Proven track record of improving operational efficiency, reducing unnecessary spend, and delivering data-driven insights that support decision-making across enterprise teams.

SKILLS

Data Analysis & Modeling: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Modeling, Time-Series Forecasting, Cohort Analysis, Segmentation & Clustering, Anomaly Detection, A/B Testing

Programming & Databases: Python (Pandas, NumPy, Scikit-Learn, Prophet), SQL (Advanced Joins, Window Functions), Snowflake, Google BigQuery, PostgreSQL, MySQL

Cloud & Data Engineering Tools: Azure (Data Factory, Cloud Storage), AWS (S3, Redshift basics), ETL/ELT Pipelines, Data Quality Frameworks, Workflow Automation

BI, Reporting & Visualization: Tableau, Power BI, KPI Dashboards, DAX, Data Modeling, Interactive Reporting, Executive Analytics

Healthcare & Financial Analytics: ICD/CPT/HCPCS Coding Analysis, Claims Analytics, HEDIS/QRS Metrics, Care-Gap Analytics, Fraud & Cost-Leakage Insights, Provider Performance KPIs, UPI/Payments Analytics, Risk Scoring Metrics

Tools & Productivity: Excel (Pivot Tables, Power Query, VLOOKUP/XLOOKUP), Jupyter Notebook, Git/GitHub, Agile/Scrum, Documentation & RCA Reporting

EXPERIENCE

Data Analyst | Cigna Healthcare Group | USA Jan 2024 - Present

- Analyzed **120M+ medical and pharmacy claims** using **SQL, Python, Snowflake** to detect improper coding (ICD/CPT/HCPCS), duplicate billing, and outlier cost patterns, enabling cost-containment teams to reduce **avoidable medical spend by 7.8%**.
- Built a cloud-hosted **Provider Efficiency Score (PES)** in **Azure/Snowflake**, integrating metrics such as episode cost, readmission probability, and site-of-service variation, improving network performance insights for Utilization Management teams.
- Developed **claims leakage and high-cost member dashboards** in **Tableau** with automated KPI alerts, helping SIU and cost-optimization teams eliminate **\$18.3M+ in annual reimbursement leakage** and accelerate fraud detection workflows.
- Processed **5+ years of HEDIS, QRS, and eligibility data** in **Snowflake** to uncover chronic-condition risk cohorts and missed preventive screenings, driving **16% improvement in care-gap closure** for Medicare/Medicaid populations.
- Built **member retention and non-engagement risk segments** using behavioral clustering, enabling care coordinators to target high-risk groups and improve outreach prioritization accuracy across population-health programs.
- Automated **cloud-based quality measure reporting pipelines** (Snowflake + Azure Data Factory), reducing recurring manual reporting tasks by **40+ hours/month** and strengthening compliance monitoring for CMS quality programs.

Data Analyst | Hexaware Technologies | India May 2021 - Jun 2022

- Analyzed **multi-source healthcare datasets (4M+ encounter records)** using **SQL, Python (Pandas/Numpy)** to identify throughput bottlenecks, improving hospital discharge efficiency by **14%** and optimizing overall clinical operations.
- Built **Power BI operational dashboards** for ER wait times, bed occupancy, and diagnostic turnaround, enabling leadership to drive **data-driven decision-making** across a 12-hospital network and reduce staffing mismatches by **18%**.
- Conducted **advanced time-series forecasting (ARIMA/Prophet)** for patient inflow and resource planning, improving scheduling accuracy and enhancing **capacity planning KPIs** across clinical and operational teams.
- Delivered **UPI transaction analytics on 60M+ FinTech records** using SQL + Python to uncover payment failure hotspots and fraudulent patterns, supporting risk teams in reducing **fraudulent payouts by 22%**.
- Performed **merchant risk segmentation** using EDA, clustering (KMeans/DBSCAN), and behavioral metrics to create a robust **merchant risk-scoring model**, improving dispute resolution accuracy and lowering operational leakage.
- Developed **interactive Power BI dashboards** for transaction health, user behavior, and peak-load insights, enabling product teams to enhance **digital payments reliability** and decrease manual reporting tasks by **30 hours/month**.
- Executed **insurance claims cost optimization analysis** across 5 years of P&C data, applying SQL-based anomaly detection and cohort analysis to identify inflated claims and high-risk agents, contributing to an **11% reduction in loss ratio**.

EDUCATION

Master of Science in Information Studies Aug 2022 - Dec 2024

Trine University | Angola, Indianapolis, USA

Bachelor's in Computer Science and Engineering Jun 2018 - May 2022

GITAM, Hyderabad | India

PROJECTS

InsightFlow Retail Demand Predictor | Python (Pandas, Prophet), SQL, Power BI, AWS S3, Excel

- Developed a predictive analytics solution that forecasted city-wise and SKU-level retail demand, enabling smarter inventory planning and reducing stockouts by 18% across 40+ stores.

ChurnLens Customer Retention Intelligence Platform | Python (Scikit-Learn), SQL, Tableau, Google BigQuery, Excel

- Created a behavioral segmentation and churn-insight platform for a subscription business, improving retention strategy precision by 22% through actionable customer clusters.

CERTIFICATIONS

Google Data Analytics Professional Certificate

Microsoft Certified: Power BI Data Analyst Associate
